

Prospectus

May 2016

PICTET

SICAV incorporated under Luxembourg law.

PROSPECTUS MAY 2016

Pictet (the “Fund”) is classified as an undertaking for collective investment in transferable securities (“UCITS”) in accordance with Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009, as amended.

The shares of Pictet are usually listed on the Luxembourg Stock Exchange. The Board of Directors may decide which sub-classes of shares are to be listed.

No one is authorised to give any information other than that contained in this Prospectus or in documents referred to herein. The English text alone is legally binding, except for specific requirements in passages from authorities with whom the fund may have been registered. For the articles of Incorporation of the Fund, French remains the official binding language. In case of translation discrepancies between the Prospectus and the Articles of incorporation, the latter will prevail.

PREAMBLE

If you have any doubts whatsoever as to the contents of this document or if you intend to subscribe to Pictet shares, you should consult a professional adviser. No one is authorised to provide information or give presentations regarding the issue of shares of the Fund (“Shares”) that are not contained in or referred to in this document or the reports annexed to it. Neither the distribution of this document, nor the offer, issue or sale of shares shall constitute a presentation that the information contained in this document is correct on any particular date after the date of the document. No person receiving a copy of this document in any jurisdiction may deal with it as if it constituted a call for funds unless, in that particular jurisdiction, such a call could be legally made to the person without him or her having to comply with registration requirements or other legal terms. Anyone wishing to buy shares is responsible for ensuring compliance with the laws of the jurisdiction in question with regard to the acquisition of shares, including obtaining any government approval or other authorisations that may be required, and complying with any other formalities that must be adhered to in that jurisdiction.

The Shares have not been and will not be registered under the United States Securities Act of 1933, as amended (the “1933 Act”), or registered or qualified under the securities laws of any state or other political subdivision of the United States. Shares may not be offered, sold, transferred or delivered either directly or indirectly in the United States or to, or on behalf of, or for the benefit of United States persons (as defined in Regulation S under the 1933 Act), except in certain transactions exempt from the registration provisions of the 1933 Act and any other securities laws of a state. Shares are offered outside the United States on the basis of an exemption from the registration regulations of the 1933 Act as set forth in Regulation S under that Act. Moreover, Shares are offered in the United States to accredited investors within the meaning of Rule 501(a) under the 1933 Act on the basis of exemption from the registration requirements of the 1933 Act, as set forth in Rule 506 under that act. The Fund has not been and will not be registered under the United States Investment Company Act of 1940 (the “1940 Act”) and is, therefore, limited with respect to the number of beneficial owners who may be US persons. The Articles of Association contain clauses intended to prevent US persons from holding Shares in circumstances that could result in the Fund infringing US law, and to enable the Directors to conduct a forced redemption of those Shares that the Directors deem necessary or appropriate in order to ensure compliance with US law. Moreover, any certificate or other document related to Shares issued to United States persons shall bear a legend to the effect that such Shares have not been registered or qualified under the 1933 Act and that the Fund has not been registered under the 1940 Act, and shall refer to certain transfer and sale restrictions.

Potential investors are warned that investment in the Fund entails certain risks. Investments in the Fund are subject to the usual risks concerning investments and, in some instances, may be adversely affected by political developments and/or changes in local laws, taxes, foreign exchange controls and exchange rates. Investing in the Fund may entail certain investment risks, including the possible loss of capital invested. Investors should be aware that the price of shares may fall as well as rise.

GENERAL CLAUSES

Unless otherwise indicated, a Banking Day is defined as a day on which the banks are normally open for business in Luxembourg (a "Banking Day"). For such purpose, the 24th of December is not to be considered as a Banking Day.

Unless otherwise indicated in this prospectus, the term "ancillary", used in respect of investments of a compartment, refers to holdings up to 49% of the total net assets of a compartment, that differ from the main investments of a compartment.

The distribution of this document is authorised only if accompanied by a copy of the Fund's latest annual report and the last semi-annual report, if published after the annual report. These reports form an integral part of this document.

Information relating to the Pictet – Europe Index, Pictet – Japan Index, Pictet – Pacific Ex Japan Index, Pictet – Emerging Markets Index, Pictet – Euroland Index, Pictet – Brazil Index, Pictet – China Index, Pictet – India Index, Pictet – Latam Index and Pictet – Russia Index compartments:

These compartments are not promoted, recommended, or sold by Morgan Stanley Capital International Inc. ("MSCI"), or by its affiliates, information providers or any other third parties (hereinafter the

“MSCI parties”) involved in or associated with the compilation, calculation or creation of any MSCI index. The MSCI indexes are proprietary to MSCI. MSCI and the names of the MSCI indexes are service marks of MSCI or its affiliates and their use by the Management Company has been authorised in certain instances. None of the MSCI parties makes any express or implied warranties or representations to the owners of these compartments, or to any member of the public, regarding the advisability of investing in funds in general or in these compartments in particular, or the ability of any MSCI index to track the performance of a corresponding stock market. MSCI and its affiliates are the licensors of certain registered trademarks, service marks and trade names, as well as the MSCI indexes, which are determined, compiled and calculated by MSCI independently of these compartments, the issuer or the owner of these compartments. None of the MSCI parties is bound to take into account the needs of the issuers or owners of these compartments when determining, compiling or calculating the MSCI indexes. None of the MSCI parties is responsible for or participates in decisions regarding the issue date for these compartments, their prices or the quantities to be issued, nor in the determination or calculation of the redeemable amount of these compartments. None of the MSCI parties is obligated or responsible to the owners of these compartments with respect to the administration, marketing or offering of these compartments.

Although MSCI obtains information used for the calculation of the MSCI indexes derived from sources considered reliable by MSCI, none of the MSCI parties authorises or guarantees the originality, accuracy and/or completeness of any MSCI index or any information in this respect. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the holder of the authorisation, its clients or counterparties, issuers and owners of the funds, or any other person or entity, arising from the use of any MSCI index or any information in this respect relating to the authorised rights or for any other use. None of the MSCI parties is responsible for any error, omission or interruption of any MSCI index, or in relation to it or any information in this respect. Moreover, none of the MSCI parties makes any express or implied warranties, and the MSCI parties disclaim all warranties of merchantability or fitness for a particular purpose with respect to any MSCI index or any information in this respect. Without limiting any of the foregoing, none of the aforementioned MSCI parties shall have any liability for any direct, indirect, special, punitive or any other damages (including lost profits), even if notified of the probability of such damages.

LEGAL STATUS

Pictet (“the Fund”) is an open-ended investment company (SICAV) incorporated under Luxembourg law in accordance with the provisions of Part I of the law of 17 December 2010 (the “2010 Act”) governing undertakings for collective investment. The company was incorporated for an unlimited period on 20 September 1991 under the name of Pictet Umbrella Fund and its Articles of Association were

published in the Official Journal of the Grand Duchy of Luxembourg, the *Mémorial, Recueil Spécial des Sociétés et Associations du Grand-Duché de Luxembourg* (the “Mémorial”), on 29 October 1991. They were last amended by a notarial deed dated 28 December 2011. The Articles of Association were filed with the Luxembourg Trade and Companies Register, where they may be viewed and where copies may be obtained. They were published in the *Mémorial, Recueil Spécial des Sociétés et Associations du Grand-Duché de Luxembourg*.

The Fund is registered in the Luxembourg Trade and Companies Register under No. B 38034.

At all times, the Fund’s capital will be equal to the net asset value and will not fall below the minimum capital of EUR 1,250,000.

INVESTMENT OBJECTIVES AND FUND STRUCTURE

The Fund is designed to offer investors access to a selection of markets worldwide and a variety of investment techniques through a range of specialised products (“compartments”) within a single structure.

The Board of Directors determines the investment policy for the various compartments. Risks will be spread broadly by diversifying investments over a large range of transferable securities, the choice of which will not be limited - except under the terms of the restrictions specified in the section: “Investment Restrictions” below – neither in terms of regions, economic sectors, or the type of transferable securities used.

Pooling

For the purpose of efficient management and if the investment policies of the compartments so allow, the Board of Directors of the Management Company may decide to co-manage some or all of the assets of certain Pictet compartments. In this case, the assets from different compartments will be jointly managed using the technique mentioned above. Assets that are co-managed will be referred to using the term “pool”. These pools will only be used for internal management purposes. They will not constitute distinct legal entities and will not be directly accessible to investors. Each co-managed compartment will have its own assets allocated to it.

When the assets of a compartment are managed using this technique, the assets initially attributable to each co-managed compartment will be determined according to the compartment’s initial participation in the pool. Thereafter, the composition of the assets will vary according to contributions or withdrawals made by the compartments.

This apportionment system applies to each investment line of the pool. Additional investments made on behalf of the co-managed compartments will therefore be allocated to these compartments according to their respective entitlements, while assets sold will be similarly deducted from the assets attributable to each of the co-managed compartments.

All banking transactions involved in the running of the compartment (dividends, interest, non-contractual fees, expenses) will be accounted for in the pool and reassigned for accounting to each of the compartments on a pro rata basis on the day the transactions are recorded (provisions for liabilities, bank recording of income and/or expenses). On the other hand, contractual fees (custody, administration and management fees, etc.) will be accounted for directly in the respective compartments.

The assets and liabilities attributable to each compartment will be identifiable at any given moment.

The pooling method will comply with the investment policy of each of the compartments concerned.

Classes of shares

The net assets forming each compartment are represented by shares, which may be of different classes or sub-classes. All the shares representing the assets of a compartment form a class of shares. All the compartments together constitute the Fund. If sub-classes of shares are issued, the relevant information will be specified in the Annexes to this prospectus.

The Management Company may decide, in the interest of shareholders, that some or all of the assets belonging to one or more compartments of the Fund will be invested indirectly, through a company wholly controlled by the Management Company. Such a company conducts, exclusively for the benefit of the compartment(s) concerned, the management, advisory or distribution activities in the country in which the subsidiary company is established with respect to the redemption of the shares of the compartment in question when requested by shareholders exclusively for itself or for the shareholders.

For the purposes of this prospectus, references to “investments” and “assets” respectively mean either investments made and assets held directly or investments made and assets held indirectly through the aforementioned companies.

In the event that a subsidiary company is used, this will be specified in the annex relating to the compartment(s) concerned.

The Board of Directors is authorised to create new compartments. A list of the compartments available to date is included in the Annexes to this Prospectus, describing their investment policies and key features.

This list is an integral part of the prospectus and will be updated whenever new compartments are created.

For each class of shares, the Board of Directors may also decide to create two or more sub-classes whose assets will generally be invested in accordance with the specific investment policy of the class in question. However, the sub-classes may differ in terms of their specific subscription and/or redemption fee structures, specific exchange rate hedging policies, specific distribution policies and/or specific management or advisory fees, or other specific features applicable to each sub-class. When necessary, this information is specified in the Annexes to this prospectus.

The shares in the Fund are usually listed on the Luxembourg Stock Exchange. The Board of Directors may decide which sub-classes of shares are to be listed.

SUB-CLASSES OF SHARES

A list of the current classes of shares is included in this prospectus. The Board of Directors may decide to create additional classes of shares at any time.

The sub-classes of shares issued or planned at the date of this prospectus, together with any supplementary information, are detailed in the Annexes to the prospectus. Investors are advised to contact their agent for the latest list of sub-classes of shares issued.

Shares may be divided within compartments into “I”, “IS”, “P”, “R”, “S”, “Z”, “J”, “MG” and “E” shares.

“I” Shares are intended (i) for distributors or platforms that have been approved by the Management Company or by the Distributor and have signed a separate remuneration agreement with their customers, (ii) for institutional investors who invest on their own account, and (iii) for any other investor approved by the Management Company. Unless otherwise decided by the Management Company, “I” shares are also subject to a minimum initial subscription, which is specified in the annex to each compartment.”

For “I” shares, the front-end load for intermediaries will be no more than 5%, and the back-end load no more than 1%.

IS shares may be created within certain indexed compartments in order to distinguish them, if needed, from I shares with respect to the application of the anti dilution measures as described in the section “Calculation of the net asset value”.

“IS” shares will be subject to the same conditions as “I” shares.

“J” shares are intended for institutional investors within the meaning of Article 174 of the Law of 2010 (“Institutional Investors”) who wish to invest a minimum initial amount. This amount is specified in the annex for each compartment and is calculated for the class concerned and its corresponding classes (hedged, issued in another currency or distributive). Subscriptions in a class other than these classes will not be taken into account in calculating the initial minimum subscription amount. However, the Board of Directors reserves the right to accept subscriptions for an amount below the required initial amount, at its discretion.

For “J” shares, the front-end load for intermediaries will be no more than 5%, and the back-end load no more than 1%.

“P” and “R” shares are not subject to any minimum investment. Because of their widespread features, either or both respond to different commercial practices in force on the date of this prospectus in the countries in which the Fund is marketed, their flexibility enabling them to be adapted where necessary to changes in the targeted markets.

“P” shares:	Front-end load for intermediaries of no more than 5%.
	Back-end load for intermediaries of no more than 1%.
	Lower management fee than for “R” shares.
“R” shares:	Front-end load for intermediaries of no more than 5%.
	Back-end load for intermediaries of no more than 3%.
	Higher management fee than for “P” shares.

“S” shares (“Staff”) are exclusively reserved for employees of the Pictet group. No intermediary fee will be applied to subscriptions and redemptions. The Board of Directors may apply a maximum 2% switch fee for intermediaries.

“Z” shares are reserved for Institutional Investors who have entered into a specific remuneration agreement with an entity of the Pictet Group.

For “Z” shares, the front-end load for intermediaries will be no more than 5%, and the back-end load no more than 1%.

“MG” shares are reserved for shareholders expressly approved by the manager of the compartment concerned.

For “MG” shares, the front-end load for intermediaries will be a maximum of 5%, and the back-end load a maximum of 1%.

“E” shares are intended for institutional investors within the meaning of Article 174 of the Law of 2010 who have been approved as eligible investors at the discretion of the Board of Directors and who wish to invest a minimum initial amount. This amount is specified in the annex for each compartment and is calculated for the class concerned and its corresponding classes (hedged, issued in another currency or distribution). However, the Board of Directors reserves the right to accept subscriptions for an amount below the required initial amount, at its discretion. “E” shares are open for subscriptions during a defined period after the initial compartment launch date, freely determined by the Board of Directors.

For “E” shares, the front-end load for intermediaries will be a maximum of 5%, and the back-end load a maximum of 1%.

Shares may be divided into accumulation shares and distribution shares. “dy” distribution shares will be entitled to a dividend as decided by the Annual General Meeting, whereas the corresponding amount for accumulation shares will not be distributed, but rather invested in the share class concerned.

The Board of Directors may also decide to issue dm shares for which a monthly dividend may be distributed. This dividend will normally be paid to shareholders in the sub-class concerned who are registered in the shareholders’ register on the 20th day of the month (or the following day if that day is not a Banking Day) and will normally be paid within 4 banking days in the currency of the class after the ex-date. **Unless otherwise decided by the Management Company,**

no fiscal reporting for German investors will be provided for this class of share.

The Board of Directors may also decide to issue ds shares for which a semi-annual dividend may be distributed. This dividend will normally be paid to shareholders in the sub-class concerned who are registered in the shareholders’ register on the 20th day of the months of February and August (or the following day if that day is not a Banking Day) and will normally be paid within 4 banking days in the currency of the class after the ex-date. **Unless otherwise decided by the Management Company, no fiscal reporting for German investors will be provided for this class of share.**

In each compartment, shares issued in currencies other than the compartment’s reference currency may be created. These shares may be hedged (as defined below) or not hedged.

Hedged shares:

Hedged shares (“H” shares) aim to hedge to a large extent the exchange risk in relation to a given currency. These shares will be subject to the same front- and back-end loads as the corresponding non-hedged shares.

The minimum initial investment for shares issued in a currency other than the compartment’s reference currency is the minimum initial investment amount applicable to the shares concerned converted on the net asset value calculation date into the applicable currency for that class.

In each compartment, the Board of Directors may decide to launch “DH” (Duration Hedged) shares that allow investors to benefit from the management of the compartment concerned by limiting possible impacts linked to rate movements. The hedging strategy will be implemented using derivative instruments (interest rate futures) and will bear on the main points of the yield curve and not on each maturity taken individually. There will thus still be a residual risk of variation in the yield curve. The duration of hedged classes will be between -1 and +1. If one of these thresholds is reached, management will be asked for a return to a duration between these two thresholds in a reasonable time. To respond to margin calls, the assets attributable to the duration hedged classes may not be entirely invested and could thus be underinvested on account of the strategy used for these DH classes.

X shares:

For compartments stipulating that the manager may receive a performance fee as specified in the annexes, the Board of Directors may decide to launch “X” shares without a performance fee. These shares are suitable for investors who do not wish to be exposed to performance fees and who therefore accept a higher management fee than the one applied to the corresponding shares. These shares will be subject to the same conditions of access and the same front- and back-end loads as the corresponding shares.

It is the responsibility of each investor to ensure that they meet the conditions for accessing the sub-class of shares in which they wish to subscribe.

Investors choose the sub-class of shares to which they wish to subscribe, bearing in mind that, unless otherwise restricted in the Annexes to this Prospectus, any investor meeting the access conditions of a particular sub-class of shares may request switch of his or her shares to shares of the sub-class.

Similarly, if an investor no longer meets the access conditions of the sub-class of shares he or she holds, the Board of Directors reserves the right to ask that shareholder to switch his or her shares to shares of another sub-class.

Conditions for the switch of shares are described more fully in the section “Switch”.

MANAGEMENT AND ADMINISTRATION STRUCTURE

The Board of Directors

The Board of Directors is responsible for administering and managing the Fund and running its operations, as well as deciding on and implementing its investment policy.

As specified in the 2010 Act, the Board of Directors may designate a management company.

The Management Company

Pictet Asset Management (Europe) S.A., a *société anonyme* (“limited company”) with registered headquarters located at 15 Avenue J.F. Kennedy, Luxembourg, has been designated as the Management Company of the Fund, as defined in Chapter 15 of the 2010 Act.

Pictet Asset Management (Europe) S.A. was created on 14 June 1995 for an unlimited period, under the name of Pictet Balanced Fund Management (Luxembourg) S.A. as a *société anonyme* (“limited company”) governed by the laws of the Grand Duchy of Luxembourg. Its capital at the date of this prospectus is CHF 8,750,000.

The Management Company has established remuneration policies for those categories of staff, including senior management, risk takers, control functions, and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers whose professional activities have a material impact on the risk profiles of the Management Company or the Fund, that are consistent with and promote a sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profiles of the Fund or with its Articles of Association and which do not interfere with the obligation of the Management Company to act in the best interests of the Fund.

The Management Company remuneration policy, procedures and practices are designed to be consistent and promote sound and effective risk management. It is designed to be consistent with the Management Company’s business strategy, values and integrity, and long-term interests of its clients, as well as those of the wider Pictet Group. The Management Company remuneration policy, procedures and practices also (i) include an assessment of performance set in

a multi-year framework appropriate to the holding period recommended to the investors of the Fund in order to ensure that the assessment process is based on the longer-term performance of the Fund and its investment risks and (ii) appropriately balance fixed and variable components of total remuneration.

The details of the up-to-date remuneration policy of the Management Company, including, but not limited to, a description of how remuneration and benefits are calculated, individuals responsible for awarding the remuneration and benefits, including, as the case may be, the composition of the remuneration committee, are available at www.group.pictet/PAMESA_UCITS_Remuneration_Policy. A paper copy is made available free of charge upon request at the Management Company’s registered office.

Management Activity

The objective of the Management Company is to manage undertakings for collective investment in compliance with Directive 2009/65/EC. This management activity includes the management, administration and marketing of undertakings for collective investment such as the Fund.

The Management Company has primarily delegated the management of the Fund’s compartments to the companies listed hereafter. This delegation is made according to the terms of the contracts entered into for an indefinite period that may be cancelled by either party at any time with 3 or 6 months’ notice depending on the terms in the contract.

Subject to prior approval by the Management Company, the managers may appoint one or more sub-managers, which may or may not be part of the Pictet Group, to provide all or part of the management of certain compartments. When sub-managers are used, this will be specified in the Annexes to this prospectus.

For the purposes of this prospectus, any reference to the “manager” should be interpreted, when appropriate, as also referring to the sub-manager(s).

Pictet Asset Management S.A., Geneva (“PAM S.A.”)

PAM S.A. is a Swiss based fund distributor and investment manager that carries out asset management activities for an international client base, mainly focussing on equity, fixed income, quantitative and total return asset classes, together with the execution of trades for other PAM group entities. PAM S.A. is regulated by the Swiss Financial Market Supervisory Authority (FINMA) in Switzerland.

Pictet Asset Management Limited (“PAM Ltd”)

PAM Ltd is a UK registered company that carries out asset management activities for an international client base, mainly focussing on equity and fixed income asset classes, together with the execution of trades for other PAM group entities. PAM Ltd is regulated for business in the UK by the Financial Conduct Authority (FCA). PAM Ltd is also approved by the China Securities Regulatory Commission (“CSRC”) as a Qualified Foreign Institutional Investor and as a Renminbi Qualified Foreign Institutional Investor.

Pictet Asset Management (Singapore) Pte. Ltd. ("PAMS")
PAMS is a private limited company created in Singapore. It which is regulated by the Monetary Authority of Singapore. The activities of PAMS are portfolio management focussing primarily on sovereign and corporate fixed income and the execution of orders on Asian fixed income products initiated by other entities of the PAM group entities.

Pictet Asset Management (Hong Kong) Limited ("PAM HK")
PAM HK is a Hong Kong-licensed company subject to the oversight of the Hong Kong Securities and Futures Commission and authorised by the latter to conduct type 1 (dealing in securities), type 2 (dealing in futures contracts), type 4 (advising on securities) and type 9 (asset management) regulated activities as at the date of this prospectus. The company's principal fund management activities relate to Asian and particularly Chinese equity and debt funds. The distribution of the investment funds of the Pictet Group also forms part of its activities.

Pictet Asset Management Limited, Succursale Italiana ("PAM Ltd- Italy")

PAM Ltd- Italy is supervised by CONSOB in Italy (Commissione per il controllo delle Società e delle Borse) and is responsible for balanced portfolio management for international clients.

Waddell & Reed Investment Management Company "W&R"
W&R is an American portfolio management company whose registered headquarters are located in Overland Park, Kansas. With a staff of 87 investment professionals (as at 31 March 2016), W&R is an investment adviser registered with the United States Securities and Exchange Commission. W&R offers services to approximately 89 investment funds registered in the US and to various institutional clients. W&R is a wholly-owned subsidiary of Waddell & Reed Financial, Inc. The assets managed by the group's entities that include W&R amount to approximately USD 95.2 billion (as at 31 March 2016).

Crescent Capital Group LP ("Crescent")

Registered with the SEC and based in Los Angeles, Crescent Capital Group, founded in 1991, offers investment management services. It is an independent company which is majority-owned by its two founding partners and employees. Crescent Capital Group principally invests in below investment grade debt securities at all levels of a company's capital structure, mainly focusing on segregated portfolio management for institutional clients.

Supervision of the delegated management activities is solely the responsibility of Pictet Asset Management (Europe) S.A.

Central Administration

The function of central administration agent of the Fund is delegated to FundPartner Solutions (Europe) S.A. (the "Central Administration Agent").

FundPartner Solutions (Europe) S.A. has been designated as Transfer Agent and Registrar, Administrative Agent and Paying Agent, under the terms of agreements concluded for an indefinite period.

FundPartner Solutions (Europe) S.A. is a *société anonyme* (public limited company) that has its registered office at 15 Avenue J. F. Kennedy, Luxembourg. It is a management company within the meaning of Chapter 15 of the 2010 Act.

FundPartner Solutions (Europe) S.A. is wholly owned by the Pictet Group and was incorporated in Luxembourg as a *société anonyme* for an unlimited period on 17 July 2008. As registrar and transfer agent, FundPartner Solutions (Europe) S.A. is primarily responsible for the issue, switch and redemption of shares and for maintaining the Company's register of shareholders.

As administrative agent and paying agent, FundPartner Solutions (Europe) S.A. is responsible for calculating and publishing the net asset value (NAV) of the shares of each compartment pursuant to the Law and the Articles of Association of the Fund, and for performing administrative and accounting services for the Fund as necessary.

Distribution

Shares of the Fund will be distributed by the Pictet group (the "Distributor") or more specifically any legal entity of the Pictet group authorised to perform such functions.

The Distributor may enter into distribution agreements with any professional agent, particularly banks, insurance companies, "internet supermarkets", independent managers, brokers, management companies or any other institution whose primary or secondary activity is the distribution of investment funds and customer service.

The Depositary Bank

Pictet & Cie (Europe) S.A. has been designated as Depositary Bank for the Fund pursuant to a Depositary agreement entered into for an indefinite period.

Pictet & Cie (Europe) S.A. is a credit institution established in Luxembourg, whose registered office is situated at 15A, Avenue J.F. Kennedy, L-1855 Luxembourg, and which is registered with the Luxembourg register of commerce and companies under number B32060. It is licensed to carry out banking activities under the terms of the Luxembourg law of 5 April 1993 on the financial services sector, as amended.

On behalf of and in the interests of the Fund's shareholders, as depositary agent (hereinafter the "Depositary Bank"), Pictet & Cie (Europe) S.A. is in charge of (i) the safekeeping of cash and securities comprising the Fund's assets, (ii) the cash monitoring, (iii) the oversight functions and (iv) such others services as agreed from time to time and reflected in the Depositary agreement.

Duties of the Depositary Bank

The Depositary Bank is entrusted with the safekeeping of the Fund's assets. For the financial instruments which can be held in custody, they may be held either directly by the Depositary Bank or, to the extent permitted by applicable laws and regulations, through every third-party custodian/sub-custodian providing, in principle, the same guarantees as the

Depository Bank itself, i.e. for Luxembourg institutions to be a credit institution within the meaning of the law of 5 April 1993 on the financial sector or for foreign institutions, to be a financial institution subject to the rules of prudential supervision considered as equivalent to those provided by EU legislation. The Depository Bank also ensures that the Fund's cash flows are properly monitored, and in particular that the subscription monies have been received and all cash of the Fund has been booked in the cash account in the name of (i) the Fund, (ii) the Management Company on behalf of the Fund or (iii) the Depository Bank on behalf of the Fund.

The Depository Bank must notably:

- perform all operations concerning the day-to-day administration of the Fund's securities and liquid assets, e.g. pay for securities acquired against delivery, deliver securities sold against collection of their price, collect dividends and coupons and exercise subscription and allocation rights;
- ensure that the value of the Shares of the Fund is calculated in accordance with Luxembourg law and the Articles of Association;
- carry out the instructions of the Fund, unless they conflict with Luxembourg law or the Articles of Association;
- ensure that proceeds are remitted within the usual time limits for transactions relating to the Fund's assets;
- ensure that shares are sold, issued, redeemed or cancelled by the Fund or on its behalf in accordance with Luxembourg law in force and the Fund's Articles of Association;
- ensure that the Fund's income is allocated in accordance with Luxembourg law and the Articles of Association.

The Depository Bank regularly provides the Fund and its Management Company with a complete inventory of all assets of the Fund.

Delegation of functions:

Pursuant to the provisions of the Depository agreement, the Depository Bank may, subject to certain conditions and in order to more efficiently conduct its duties, delegate part or all of its safekeeping duties over the Fund's assets including but not limited to holding assets in custody or, where assets are of such a nature that they cannot be held in custody, verification of the ownership of those assets as well as record-keeping for those assets, to one or more third-party delegates appointed by the Depository Bank from time to time. The Depository Bank shall exercise care and diligence in choosing and appointing the third-party delegates so as to ensure that each third-party delegate has and maintains the required expertise and competence. The Depository Bank shall also periodically assess whether the third-party delegates fulfil applicable legal and regulatory requirements and will exercise ongoing supervision over each third-party delegate to ensure that the obligations of the third-party delegates continue to be competently discharged. The fees of any third-party delegate appointed by the Depository Bank shall be paid by the Fund.

The liability of the Depository Bank shall not be affected by the fact that it has entrusted all or some of the Fund's assets in its safekeeping to such third-party delegates.

In case of a loss of a financial instrument held in custody, the Depository Bank shall return a financial instrument of an identical type or the corresponding amount to the Fund without undue delay, except if such loss results from an external event beyond the Depository Bank's reasonable control and the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

An up-to-date list of the appointed third-party delegates is available upon request at the registered office of the Depository Bank and is available at the website of the Depository Bank:

http://www.pictet.com/corporate/fr/home/asset_services/custody_services/sub-custodians.html.

Conflicts of interests:

In carrying out its functions, the Depository Bank shall act honestly, fairly, professionally, independently and solely in the interest of the Fund and the investors of the Fund.

Potential conflicts of interest may nevertheless arise from time to time from the provision by the Depository Bank and/or its delegates of other services to the Fund, the Management Company and/or other parties. As indicated above, Depository Bank's affiliates are also appointed as third-party delegates of the Depository Bank. Potential conflicts of interest which have been identified between the Depository Bank and its delegates are mainly fraud (unreported irregularities to the competent authorities to avoid bad reputation), legal recourse risk (reluctance or avoidance to take legal steps against the depository), selection bias (the choice of the depository not based on quality and price), insolvency risk (lower standards in asset segregation or attention to the depository's solvency) or single group exposure risk (intragroup investments).

The Depository Bank (or any of its delegates) may in the course of its business have conflicts or potential conflicts of interest with those of the Fund and/or other funds for which the Depository Bank (or any of its delegates) acts.

The Depository Bank has pre-defined all kind of situations which could potentially lead to a conflict of interest and has accordingly carried out a screening exercise on all activities provided to the Fund either by the Depository Bank itself or by its delegates. Such exercise resulted in the identification of potential conflicts of interest that are however adequately managed. The details of potential conflicts of interest listed above are available free of charge from the registered office of the Depository Bank and on the following website:

https://www.group.pictet.com/corporate/fr/home/asset_services/custody_services/sub-custodians.html.

On a regular basis, the Depository Bank re-assesses those services and delegations to and from delegates with which conflicts of interest may arise and will update such list accordingly.

Where a conflict or potential conflict of interest arises, the Depositary Bank will have regard to its obligations to the Fund and will treat the Fund and the other funds for which it acts fairly and such that, so far as is practicable, any transactions are effected on terms which shall be based on objective pre-defined criteria and meet the sole interest of the Fund and the investors of the Fund. Such potential conflicts of interest are identified, managed and monitored in various other ways including, without limitation, the hierarchical and functional separation of Depositary Bank's depositary functions from its other potentially conflicting tasks and by the Depositary Bank adhering to its own conflicts of interest policy.

The Depositary Bank or the Fund may terminate the Depositary Bank's duties at any time, by giving at least three months' written notice to the other party; provided, however, that any decision by the Fund to end the Depositary's appointment is subject to another custodian bank taking on the duties and responsibilities of the Depositary Bank as defined in the Articles of Association, and provided further that, if the Fund terminates the Depositary's duties, the Depositary Bank will continue to perform its duties until Depositary Bank has been relieved of all the Fund's assets that it held or had arranged to be held on behalf of the Fund. Should the Depositary Bank itself give notice to terminate the contract, the Fund will be required to appoint a new custodian bank to take over the duties and responsibilities of the Depositary Bank as set out in the Articles of Association; provided, however, that, as of the date when the notice of termination expires and until a new depositary bank is appointed by the Fund, the Depositary Bank will only be required to take any necessary measures to safeguard the best interests of shareholders.

Up-to-date information regarding the description of the Depositary Bank's duties and of conflicts of interest that may arise as well as of any safekeeping functions delegated by the Depositary Bank and any conflicts of interest that may arise from such a delegation will be made available to investors on request at the Fund's registered office.

The Depositary Bank is remunerated in accordance with customary practice in the Luxembourg financial market. Such remuneration is expressed as a percentage of the Fund's net assets and paid on a quarterly basis.

Investment Advisers

The Management Company may be assisted by one or more internal or external investment advisers of the Pictet group whose mission is to advise the Management Company on the Fund's investment opportunities.

Statutory Auditor

These duties have been assigned to Deloitte Audit S.à r.l., 560, Rue de Neudorf, L-2220 Luxembourg.

SHAREHOLDER RIGHTS

Shares

The shares of each class are issued in registered form or as bearer shares recorded in an account, without any par value and fully paid up. Fractions of shares may be issued up to a maximum of five decimal places. They are recorded in a shareholder register, kept at the Fund's registered office. Shares redeemed by the Fund will be cancelled.

All shares are freely transferable and entitle holders to an equal proportion in any profits, liquidation proceeds and dividends for the compartment in question.

Each share is entitled to a single vote. Shareholders will also be entitled to the general shareholders' rights provided for under the law of 10 August 1915, as amended, with the exception of the pre-emptive right to subscribe for new shares.

Shareholders will only receive confirmation of their entry in the register.

General Shareholders' Meeting

The Annual General Shareholders' Meeting is held every year on 3 December at 10.00 am at the Fund's registered office or at any other location in Luxembourg, as specified on the invitation to attend the meeting.

If that day is not a Banking Day in Luxembourg, the meeting will be held on the following Banking Day.

If and to the extent allowed by Luxembourg laws and regulations, the Annual General Meeting of the Shareholders may be held at a date, time and place other than those described in the paragraph above. This other date, time and place will be determined by the Board of Directors.

Notices of meetings will be sent to all registered shareholders at least 8 days prior to the Annual General Meeting. These notices will include details of the time and place of the meeting, the agenda, conditions for admission and requirements concerning the quorum and majority as laid down by Luxembourg law.

All decisions by shareholders regarding the Fund will be taken at the General Meeting of all shareholders, pursuant to the provisions of the Articles of Association and Luxembourg law. All decisions that only concern the shareholders of one or more compartments may be taken – as authorised by law – by the shareholders of the relevant compartments. In this case, the quorum and majority requirements stipulated in the Articles of Association will apply.

Information for shareholders

The Fund draws investors' attention to the fact that they can only fully exercise their investor rights directly with respect to the Company (in particular the right to participate in the General Meetings of the Shareholders), when the investor himself appears, in his own name, in the shareholder register. In cases when an investor has invested in the Fund through an intermediary investing in the Fund in his own name but on behalf of the investor, certain rights attached to the

investor status cannot necessarily be directly exercised by the investor with respect to the Fund. Investors are advised to make inquiries about their rights.

ISSUING OF SHARES

In the case of initial subscriptions for new compartments, an addendum to this prospectus will be issued.

A list of the compartments that are already operational is annexed to this prospectus.

For certain compartments, shareholders may subscribe to different sub-classes of shares.

Subscriptions to shares (or to each sub-class of shares, if applicable) in each compartment in operation will be accepted at their issue price, as defined in the “Issue Price” section below, by the Transfer Agent and all other institutions duly authorised by the Fund.

Provided that the securities contributed comply with the investment policy, shares may be issued in return for a contribution in kind, which will be the subject of a report prepared by the Fund’s auditor to the extent that it is required by Luxembourg law. This report will be available for inspection at the Fund’s registered office. Any costs incurred will be borne by the investor.

Unless otherwise indicated in the Annexes, for any subscription received by the Transfer Agent the last Banking Day preceding a net asset value calculation date as specified for each compartment in the Annexes, the net asset value calculated on that date will apply.

Unless otherwise indicated in the Annexes, for any subscription received by the Transfer Agent after the time specified in the preceding paragraph, the net asset value to be applied will be that calculated on the next net asset value calculation date.

Payment of the issue price is made by remittance or transfer according to the procedures described in the Annexes to Pictet & Cie (Europe) S.A. for Pictet referencing the relevant class(es) and compartment(s).

The fight against money laundering and the financing of terrorism

In accordance with international rules and applicable Luxembourg laws and regulations pursuant to the Law of 12 November 2004 on the fight against money laundering and the financing of terrorism, as amended, and CSSF circulars, financial sector professionals are subject to obligations whose purpose is to prevent the use of undertakings for collective investment for money laundering and the financing of terrorism. These provisions require the transfer agent to identify subscribers in accordance with Luxembourg laws and regulations. The transfer agent can require the subscriber to provide any document that it deems necessary to ensure such identification.

In the event of a delay or failure to provide the required documents, the subscription or redemption request will not be accepted. Neither the undertaking for collective investment, nor the transfer agent can be held liable for the delay or non-execution of transactions when the investor has not provided the documents or has provided incomplete documents.

Shareholders may also be asked to provide additional or updated documents in accordance with the obligations for on-going control and supervision in accordance with applicable laws and regulations.

ISSUE PRICE

The issue price for shares in each compartment (or sub-class of shares) is equal to the net asset value of each share (or each sub-class of shares) in the compartment in question, calculated on the first date on which the net asset value is determined following the subscription date.

This price may be increased by fees paid to financial intermediaries, which will not exceed 5% of the net asset value per share for the compartment in question and will be paid to financial intermediaries and/or distributors involved in the distribution of the Fund’s shares. Front- and back-end load for intermediaries will vary according to the sub-class of share, as described in the “Sub-classes of Shares” section.

This issue price will be increased to cover any duties, taxes and stamp duties due.

The Board of Directors will be authorised to apply corrections to the net asset value as described in the section “Calculation of the net asset value”.

In certain exceptional circumstances, the Board of Directors will also be authorised to apply a “Dilution Levy” on the issue of shares, as described below in the section “Dilution Levy”.

REDEMPTIONS

Shareholders are entitled to apply for the redemption of some or all of their shares (or, where applicable, their sub-class of shares) at any time based on the redemption price, as stipulated in the “Redemption Price” section below, by sending the Transfer Agent or other authorised institutions an irrevocable redemption request accompanied by their share certificates, if relevant.

Unless otherwise indicated in the Annexes, for any redemption application received by the Transfer Agent on the last Banking Day preceding a net asset value calculation date as specified for each compartment in the Annexes, the net asset value calculated on that date will apply.

Subject to the approval of the shareholders concerned, the Board of Directors may allow in-kind payment for shares in the Fund. The Fund’s statutory auditor will report on any such in-kind payment, giving details of the quantity, denomination and valuation method used for the securities in question. The corresponding fees will be charged to the shareholders in question.

Unless otherwise indicated in the Annexes, for any redemption application received by the Transfer Agent after the time specified in the previous paragraph, the net asset value to be applied will be that calculated on the next net asset value calculation date.

If, following redemption or switch requests, it is necessary on a given valuation day to redeem more than 10% of the shares issued for a given compartment, the Board of Directors may decide that all redemptions be deferred until the next date on which the net asset value is calculated for the compartment in question. On that next net asset value calculation date, redemption or switch applications that have been deferred (and not withdrawn) will have priority over applications received for that particular net asset value calculation date (which have not been deferred).

Unless otherwise specified in the Annexes, the equivalent amount paid for shares submitted for redemption shall be paid by credit transfer in the currency of the compartment in question, or in any other currency specified in the Annexes, in which case any costs for currency conversion will be borne by the compartment, within two Banking Days of the net asset value calculation date that applies to the redemption (see “Redemption Price” section below).

REDEMPTION PRICE

The redemption price for shares (or sub-class of shares) of each compartment is equal to the net asset value of each share (or each sub-class of shares) in the compartment in question, calculated on the first net asset value calculation date following the redemption application date.

A commission paid to financial intermediaries and/or distributors may be deducted from this amount, representing up to 3% of the net asset value per share. Front- and back-end load for intermediaries will vary according to the sub-class of share, as described in the “Sub-classes of Shares” section.

The redemption price will also be reduced to cover any duties, taxes and stamp duties to be paid.

The Board of Directors will be authorised to apply corrections to the net asset value as described in the section “Calculation of the net asset value”.

In certain exceptional circumstances, the Board of Directors will also be authorised to apply a “Dilution Levy” on the redemption of shares, as described below in the section “Dilution Levy”.

The redemption price may be higher or lower than the subscription price, depending on changes in the net asset value.

SWITCH

Within the limits defined in the “Sub-classes of Shares” section in the Prospectus, shareholders of one compartment may ask for some or all of their shares to be switched into shares of another compartment or between compartments for different sub-classes, in which case the switch price will be calculated according to the respective net asset values, which may be increased or reduced, in addition to administrative charges, by the commissions to intermediaries for the sub-classes and/or compartments in question. Under no circumstances may these agents’ fees exceed 2%.

However, shares cannot be switched into “J dy” or “J” shares, unless the Board of Directors decides otherwise.

Notwithstanding the provisions of the Annexes to the Prospectus, shareholders of one compartment may ask for some or all of their shares to be switched into shares of the same sub-class in another compartment, at no charge other than an administrative fee.

Unless otherwise indicated in the Annexes, for any switch application received by the Transfer Agent before the deadline specified for each compartment in the Annexes, the net asset values applicable will be those calculated on the following net asset value calculation date for the compartments in question.

The Board of Directors may impose such restrictions as it deems necessary, in particular concerning the frequency of switches, and will be authorised to apply corrections to the net asset value as described in the section “Calculation of the net asset value”. Shares that have been switched into shares of another compartment will be cancelled.

In certain exceptional circumstances, the Board of Directors will also be authorised to apply a “Dilution Levy” on the switch of shares, as described below in the section “Dilution Levy”.

DILUTION LEVY

In certain exceptional circumstances such as, for example:

- significant trading volumes,
- and/or market disturbances,
- and in any other cases when the Board of Directors deems, at its sole discretion, that the interest of the existing shareholders (concerning issues/switches) or of the remaining shareholders (concerning redemptions/switches) might be negatively affected,

the Board of Directors of the Fund will be authorised to charge a “Dilution Levy” for a maximum of 2% of the value of the net asset value on the issue, redemption and/or switch price.

In cases when it is charged, this Dilution Levy will equitably apply, on a given net asset value calculation date, to all shareholders of the relevant compartment. It will be paid to the compartment and will become an integral part of that compartment.

The Dilution Levy thus applied will be calculated with reference in particular to market effects as well as to the dealing costs incurred for transactions on the underlying investments for the compartment, including any applicable commissions, spreads and transfer taxes.

The Dilution Levy may be cumulative with the corrections to the net asset value as described in the section “Calculation of the net asset value” below.

CALCULATION OF THE NET ASSET VALUE

The Central Administration Agent calculates the net asset value, as well as the issue, redemption and switch prices for shares for each compartment in the currency of the compartment in question, at intervals which may vary for each compartment and are indicated in the Annexes.

If one of the days in question is a public holiday, the net asset value of the compartment in question will be calculated on the following Banking Day.

The net asset value of a share of each compartment will be calculated by dividing the net assets of the compartment in question by the compartment's total number of shares in circulation. A compartment's net assets correspond to the difference between its total assets and total liabilities.

If various sub-classes of shares are issued in a given compartment, the net asset value of each sub-class of shares in this compartment will be calculated by dividing the total net asset value (calculated for the compartment in question and attributable to this sub-class of shares) by the total number of shares issued for this sub-class.

The percentage of the total net asset value of the relevant compartment that can be attributed to each sub-class of shares, which was initially identical to the percentage of the number of shares represented by the sub-class of shares in question, varies according to the level of distribution shares, as follows:

- a) if a dividend or any other distribution is paid out for distribution shares, the total net assets attributable to the sub-class of shares will be reduced by the amount of this distribution (thereby reducing the percentage of the total net assets of the compartment in question, attributable to the distribution shares) and the total net assets attributable to accumulation shares will remain identical (thereby increasing the percentage of the compartment's total net assets attributable to the accumulation shares);
- b) if the capital of the compartment in question is increased through the issue of new shares in one of the sub-classes, the total net assets attributable to the sub-class of shares concerned will be increased by the amount received for this issue;
- c) if the shares of a sub-class are redeemed by a given compartment, the total net assets attributable to the corresponding sub-class of shares will be reduced by the price paid for the redemption of these shares;
- d) if the shares of a sub-class are switched into shares of another sub-class, the total net assets attributable to this sub-class will be reduced by the net asset value of the shares switched while the total net assets attributable to the sub-class in question will be increased by the same amount.

The total net assets of the Fund will be expressed in euros and correspond to the difference between the total assets (total wealth) and the total liabilities of the Fund. For the purposes of this calculation, if the net assets of a compartment are not expressed

in euros, they will be converted to euros and added together.

Portfolio transactions are liable to generate expenses as well as a difference between the trading price and the valuation of investments or divestments. To protect the Fund's existing shareholders, at the time of subscriptions and/or redemptions received for a given NAV calculation date, shareholders entering or exiting generally bear the impacts of these negative effects. These costs (estimated at a flat rate or effective value) may be invoiced separately or by adjusting the NAV of a concerned compartment or class either down or up. The Board of Directors may also decide to only apply this correction at a certain level of subscriptions and/or redemptions in a given compartment or class. These procedures apply in an equitable manner to all shareholders of a same compartment on the same net asset value calculation date. The specific method applied for each class is the following:

For the Pictet – USA Index, Pictet – Europe Index, Pictet – Japan Index, Pictet – Pacific Ex Japan Index, Pictet – Emerging Markets Index, Pictet – Euroland Index, Pictet – Brazil Index, Pictet – China Index, Pictet – India Index, Pictet – Latam Index and Pictet – Russia Index compartments:

For I, P and Z shares and their corresponding shares: corrections will be invoiced separately from the NAV.

For IS and R shares and their corresponding shares: the NAV will be adjusted.

For all other compartments:

For I, P, R, S, MG, J and Z shares and their corresponding shares: the NAV will be adjusted.

The effect of any such corrections with respect to the net asset value that would have been obtained without them may not exceed 2% unless otherwise specified in the Annexes.

The assets of each compartment will be valued as follows:

- a) The securities admitted for listing on an official stock exchange or on another regulated market will be valued using the last known price unless this price is not representative.
- b) Securities not admitted to such listing or not on a regulated market and securities thus listed but whose last known price is not representative, will be valued on the basis of the probable selling price, estimated prudently and in good faith.
- c) The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, pre-paid expenses, dividends and interest declared or accrued and not yet obtained, will be constituted by the nominal value of the assets, unless it appears unlikely that this amount will be obtained, in which case the value will be determined after deducting the amount that the Board of Directors deems appropriate to reflect the true value of these assets.

- d) Money market instruments will be valued using the amortised cost method at their nominal value plus any accrued interest or the “mark-to-market” method. When the market value is different to the amortised cost, the money market instruments will be valued using the mark-to-market method.
- e) Securities expressed in a currency other than that of the reference compartment will be converted to the currency of that compartment at the applicable exchange rate.
- f) Units/shares issued by open-ended-type undertakings for collective investment:
 - on the basis of the last net asset value known by the Central Administration Agent, or
 - on the basis of the net asset value estimated on the closest date to the compartment’s valuation day.
- g) The value of companies that are not admitted for listing on an official or regulated market may be determined using a valuation method proposed in good faith by the Board of Directors based on the last audited annual financial statements available, and/or on the basis of recent events that may have an impact on the value of the security in question and/or on any other available valuation. The choice of method and of the medium allowing the valuation will depend on the estimated relevance of the available data. The value may be corrected according to any unaudited periodic financial statements available. If the Board of Directors deems that the price is not representative of the probable selling value of such a security, it will then estimate the value prudently and in good faith on the basis of the probable selling price.
- h) The value of forward contracts (futures and forwards) and option contracts traded on a regulated market or a securities exchange will be based on the closing or settlement prices published by the regulated market or securities exchange that as a general rule constitutes the principal place for trading those contracts. If a forward contract or option contract cannot be liquidated on the valuation date of the net assets in question, the criteria for determining the liquidation value of the forward or option contract will be set by the Board of Directors in a reasonable and equitable manner. Forward contracts and option contracts that are not traded on a regulated market or on a securities exchange will be valued at their liquidation value determined in accordance with the rules established in good faith by the Board of Directors and according to standard criteria for each type of contract.
- i) The expected future flows, to be received and paid by the compartment pursuant to swap contracts, will be valued at their updated values.
- j) When it deems necessary, the Board of Directors may establish a valuation committee whose task will be to estimate prudently and in good faith the value of certain securities.

The Board of Directors is authorised to adopt any other appropriate principles for valuing the compartment’s assets if it is impossible or inappropriate to calculate the values based on the above criteria.

If there is no bad faith or obvious error, the valuation determined by the Central Administration Agent will be considered as final and will be binding on the compartment and its shareholders.

SUSPENSION OF NET ASSET VALUE CALCULATION, SUBSCRIPTIONS, REDEMPTIONS AND SWITCHES

The calculation of the net asset value, and the issue, redemption and switch of the shares of one or more compartments may be suspended in the following cases:

- When one or more stock exchanges or markets on which a significant percentage of the Fund’s assets are valued or one or more foreign exchange markets in the currencies in which the net asset value of shares is expressed or in which a substantial portion of the Fund’s assets is held, are closed, other than for normal holidays or if dealings on them are suspended, restricted or subject to major fluctuations in the short term.
- When, as a result of political, economic, military, monetary or social events, strikes or any other cases of force majeure outside the responsibility and control of the Fund, the disposal of the Fund’s assets is not reasonably or normally practicable without being seriously detrimental to shareholders’ interests.
- When there is a breakdown in the normal means of communication used to calculate the value of an asset in the Fund or if, for whatever reason, the value of an asset in the Fund cannot be calculated as promptly or as accurately as required.
- When, as a result of currency restrictions or restrictions on the movement of capital, transactions for the Fund are rendered impracticable, or purchases or sales of the Fund’s assets cannot be carried out at normal rates of exchange.
- In the event of the publication (i) of a notice of a General Meeting of the Shareholders at which the dissolution and the liquidation of the Fund or of a compartment are proposed or (ii) of a notice informing the shareholders of the Board of Directors’ decision to liquidate one or more compartment(s) or, to the extent that such a suspension is justified by the need to protect shareholders, (iii) of a notice of a General Meeting of the Shareholders called to decide on the merger of the Fund or of one or more compartment(s) or (iv) of a notice informing the shareholders of the Board of Directors’ decision to merge one or more compartments.
- When for any other reason, the value of the assets or of the debts and liabilities attributable respectively to the Fund or to the compartment in question cannot be quickly or accurately determined.

- For any other circumstance in which failure to suspend could result, either for the Fund, one of its compartments or its shareholders, in certain liabilities, financial disadvantages or any other harm for the Fund that the compartment or its shareholders would not otherwise experience.

For compartments which invest their assets through a company wholly-controlled by the Fund, only the underlying investments will be taken into account for the implementation of the above restrictions and the intermediary company will be treated as though it did not exist.

In such cases, shareholders who have submitted applications to subscribe to, redeem or switch shares in compartments affected by the suspension measures will be notified.

The Fund may, at any time and at its discretion, temporarily discontinue, permanently cease or limit the issue of shares in one or more compartments to natural or legal entities resident or domiciled in certain countries or territories. It may also prohibit them from acquiring shares if such a measure is deemed necessary to protect all shareholders and the Fund.

Moreover, the Fund reserves the right to:

- reject any application to subscribe for shares, at its discretion;
- redeem shares acquired in breach of an exclusion measure, at any time.

The Fund, the Management Company, the Registrar and the Transfer Agent will ensure that late trading and market timing practices are prevented in connection with the distribution of shares. The deadlines for submission of the orders described in the Annexes to this prospectus are strictly respected. Orders are accepted on the condition that the transactions do not affect the interests of other shareholders. Investors are unaware of the net asset value per share at the time they submit a request for subscription, redemption or switch. Share subscriptions, redemptions and switches are authorised for investment purposes only. The Fund and the Management Company prohibit market timing and other abusive practices. The repeated purchase and sale of shares in order to exploit imperfections or deficiencies in the system used to calculate the Fund's net asset value, a practice also known as market timing, may disrupt the portfolio's investment strategies, lead to an increase in costs borne by the Fund, and thus prejudice the interests of the Fund's long-term investors. In order to discourage this practice, in the event of reasonable doubt, and whenever it suspects an investment similar to market timing occurs, the Board of Directors reserves the right to suspend, cancel or refuse all subscription or switch orders submitted by those investors making proven frequent purchases and sales within the Fund.

As the guarantor of the equal treatment of all investors, the Board of Directors will take appropriate measures to ensure that (i) the Fund's exposure to market timing practices is measured in an appropriate, continuous way and (ii) appropriate procedures and checks are in place to minimise the risk of market timing within the Fund.

For the reasons outlined in section "TAX STATUS" below, the Shares of the Fund may not be offered, sold, assigned or delivered to investors who are not i) participating foreign financial institutions ("PFFIs"), (ii) deemed-compliant foreign financial institutions, (iii) non-reporting IGA foreign financial institutions, (iv) exempt beneficial owners (v), Active NFFEs or (vi) non-specified US persons, all as defined under FATCA, the US FATCA final regulations and/or any applicable intergovernmental agreement on the implementation of FATCA. FATCA non-compliant investors may not hold Shares of the Fund and Shares may be subject to compulsory redemption if this is deemed appropriate for the purpose of ensuring the Fund's compliance with FATCA. Investors will be required to provide evidence of their status under FATCA by means of any relevant tax documents, in particular a "W-8BEN-E" form from the US Internal Revenue Service that must be renewed on a regular basis according to applicable regulations.

DISTRIBUTION OF INCOME

The Board of Directors reserves the right to introduce a distribution policy that may vary between compartments and sub-classes of shares in issue.

In addition to the aforementioned distributions, the Fund may decide to distribute interim dividends.

The Fund may distribute the net investment revenue, realised capital gains, unrealised capital gains and capital. Investors should thus be aware that distributions may effectively reduce the net value of the Fund. No income will be distributed if the Fund's net assets after distribution would fall below EUR 1,250,000.

The Fund may distribute free bonus shares within the same limits.

Dividends and allotments not claimed within five years of their payment date will lapse and revert to the compartment or to the relevant sub-class of shares in the Fund compartment.

FUND EXPENSES

A service fee will be paid to the Management Company to remunerate it for the services provided to the Fund. This fee will also enable the Management Company to remunerate FundPartner Solutions (Europe) S.A. for the functions of transfer agent, administrative agent and paying agent.

The Management Company will also receive management fees from the compartments and, in some cases, performance fees to remunerate the Managers, Sub-Managers, Investment Advisers and distributors, if any.

In payment for its custodial services, the Depositary Bank will charge a fee for the deposit of assets and the safekeeping of securities.

Service, management and depositary bank fees are charged to a compartment's sub-classes of shares in proportion to its net assets and are calculated on the average of the net asset values of these sub-classes.

Transaction fees will also be charged at rates fixed by common agreement.

For details of the service, management and depositary bank fees, please refer to the Annexes.

The rate indicated in the annexes for the depositary bank fee does not include VAT.

The managers may enter into soft commission agreements, only when these agreements bring a direct and identifiable advantage to their clients, including the Fund, and when the Managers are convinced that the transactions giving rise to the soft commissions will be conducted in good faith, in strict compliance with the applicable regulatory provisions and in the best interests of the Fund. The Managers will enter into such agreements on terms and conditions compliant with best market practice.

All income from securities lending agreements, minus fees and commissions owed to the Depositary Bank and/or Banque Pictet & Cie S.A., acting as securities lender for the Fund (hereinafter the “**Agent**”), with each of these entities belonging to the Pictet Group in the securities lending programme, shall be payable to the relevant compartment of the Fund.

In addition, the Fund will repay the Agent and the Depositary Bank for all reasonably incurred expenses related to the securities lending agreement (including SWIFT fees, teleconferencing fees, fax fees, postage fees, etc.).

All revenue from repurchase/reverse repurchase agreements, minus direct and indirect operating costs/fees owed to the Depositary Bank and/or Banque Pictet & Cie S.A., shall be payable to the relevant compartment of the Fund.

Fixed operating fees charged per transaction may be payable to the counterparty to the repurchase/reverse repurchase transaction, the Depositary Bank and/or Banque Pictet & Cie S.A.

Details of the direct and indirect operational fees/costs arising from securities lending and repurchase/reverse repurchase agreements will be included in the Fund’s annual report.

Other expenses

Other costs charged to the Fund will include:

- 1) All taxes and duties that may be due on the Fund’s assets or income earned by the Fund, in particular the subscription tax (0.05% p.a.) on the Fund’s net assets. This tax will be reduced to 0.01% for assets relating to shares reserved for institutional investors within the meaning of Article 174 (2) of the 2010 Act and for the compartments whose sole objective is collective investment in money market instruments and deposits in credit institutions.

Are exempt from the subscription tax compartments:

- (i) whose securities are listed or traded on at least one stock exchange or another regulated market, operating regularly, and recognised and open to the public; and

- (ii) whose exclusive object is to replicate the performance of one or more indexes.

If there are several classes of securities within the compartment, the exemption is only applicable to the classes meeting the condition described in point (i) above.

- 2) Fees and charges on transactions involving securities in the portfolio.
- 3) Remuneration of the Depositary Bank’s correspondents.
- 4) Fees and expenses reasonably incurred by the Domiciliation Agent, Transfer Agent, Administrative Agent and Paying Agent.
- 5) Remuneration of foreign agents appointed to market the Fund abroad. (In addition, when the Fund is distributed abroad, the regulations in force in some jurisdictions may require the presence of a local Paying Agent. In this case, investors domiciled in these jurisdictions may be required to bear the fees and commissions levied by the local Paying Agents.)
- 6) The cost of exceptional measures, particularly expert appraisals or legal proceedings undertaken to protect shareholders’ interests.
- 7) The cost of preparing, printing and filing administrative documents, prospectuses and explanatory reports with the authorities, fees payable for the registration and maintenance of the Fund with authorities and official stock exchanges, the cost of preparing, translating, printing and distributing periodic reports and other documents required by law or regulations, the cost of accounting and calculating the net asset value, the cost of preparing, distributing and publishing reports for shareholders, fees for legal counsel, experts and independent auditors, and any similar operating costs.
- 8) Advertising costs and expenses, other than those specified above, relating directly to the offer or distribution of shares will be charged to the Fund to the extent decided by the Board of Directors.

All recurring expenses will be charged first to the Fund’s income, then to realised capital gains, then to the Fund’s assets. All other expenses may be amortised over a maximum of five years.

When calculating the net asset values of the various compartments, expenses will be divided among the compartments in proportion to the net assets of these compartments, unless these expenses relate to a specific compartment, in which case they will be allocated to that compartment.

Division into compartments

For each compartment, the Board of Directors will create a group of distinct assets, as described in or as per the 2010 Act. The assets of a compartment will not include any liabilities of other compartments. The Board of Directors may also create two or more sub-classes of shares within each compartment.

- a) Proceeds from the issue of shares of a particular compartment will be booked under the compartment in question in the Fund's accounts and, if relevant, the corresponding amount will accrue to the net assets of the compartment in question, and the assets, liabilities, income and expenses relating to this compartment will be allocated to it in accordance with the provisions of this Article. If there are several sub-classes of shares in such a compartment, the corresponding amount will increase the proportion of the net assets of the compartment in question, and will be assigned to the sub-class of shares concerned.
- b) If an asset is derived from another asset, this derivative asset will be allocated in the books of the Fund to the compartment or sub-class of shares to which the asset from which it is derived belongs and, each time an asset is revalued, the increase or decrease in value will be allocated to the corresponding compartment or sub-class of shares.
- c) If the Fund is charged with a liability attributable to an asset from a particular compartment or a specific sub-class of shares or to an operation carried out in relation to the assets of a particular compartment or particular sub-class of shares, that liability will be allocated to the compartment or sub-class of shares in question.
- d) Where a Fund's asset or liability cannot be allocated to a particular compartment, that asset or liability will be allocated in equal shares to all compartments or allocated in such a way as the Board of Directors determines prudently and in good faith.
- e) The costs incurred for setting up a new compartment or restructuring will, where applicable, be allocated to the new compartment and may be amortised over a five-year period.

TIME LIMITATION

Claims of shareholders against the Board of Directors, the Depositary Bank or the Central Administration Agent will lapse five years after the date of the event that gave rise to the rights claimed.

TAX STATUS

The Fund is subject to Luxembourg tax legislation.

The Fund

The Fund is subject to Luxembourg tax legislation. Purchasers of shares in the Fund are responsible for ensuring that they are informed of the applicable legislation and regulations governing the acquisition, holding and sale of shares, with regard to their residence and nationality.

In accordance with the legislation in force in Luxembourg, the Fund is not subject to any Luxembourg income tax or capital gains tax, withheld at source or otherwise. Nevertheless, the net assets of the Fund are subject to tax at an annual rate of 0.05%, payable

at the end of each quarter and calculated on the basis of the Fund's net assets at the end of each quarter. This tax will however be reduced to 0.01% for assets relating to shares reserved for institutional investors and for the compartments whose sole objective is collective investment in money market instruments and deposits in credit institutions.

Are exempt from the subscription tax compartments:

- (i) whose securities are listed or traded on at least one stock exchange or another regulated market, operating regularly, and recognised and open to the public; and
- (ii) whose exclusive object is to replicate the performance of one or more indexes.

If there are several classes of securities within the compartment, the exemption is only applicable to the classes meeting the condition described in point (i) above.

European tax considerations

On 3 June 2003, the Council of the European Union adopted Council Directive 2003/48/EC on the taxation of savings income in the form of interest payments. In accordance with the Directive, Member States of the European Union will be required to provide to the tax authorities of another Member State of the European Union information relating to interest payments or other similar income made by entities under their jurisdiction to individuals residing in that other Member State of the European Union. Austria and Luxembourg have instead opted to apply a system of withholding taxes on such payments during a transitional period. Other countries including the Swiss Confederation, the dependent or associated territories in the Caribbean, the Channel Islands, the Isle of Man, the Principality of Monaco and the Principality of Liechtenstein will also introduce measures equivalent to the exchange of information or the withholding tax.

The Directive was transposed in Luxembourg by the law of 21 June 2005, as amended by the law of 25 November 2014 (the "Law"), under which the withholding tax system was abolished with effect from 1 January 2015, after which the exchange of information is obligatory.

The dividends distributed by a compartment of the Fund will be subject to the Directive and the Law if more than 15% of the assets of the compartment are invested in debt securities (as defined by the Law), and proceeds realised by shareholders on the redemption or sale of shares of the compartment will be subject to the Directive and the Law if more than 25% of the assets of this compartment are invested in debt securities (such compartments are referred to below as "affected compartment[s]").

Consequently, if, as part of transactions conducted by an affected compartment, a Luxembourg paying agent makes a payment of dividends or redemption proceeds directly to a shareholder who is a physical person, residing or considered to reside for tax purposes in another Member State of the European Union or in certain dependencies or associated territories, the Luxembourg paying agent will exchange information with the tax authorities as stipulated by the Law.

Under the directive 2015/2060/EU, the Savings Directive has been repealed and will no longer apply once all the reporting obligations concerning year 2015 will have been complied with.

Meanwhile, the Organisation for Economic Cooperation and Development (the “OECD”) received a mandate by the G8/G20 countries to develop a common reporting standard (“CRS”) to achieve a comprehensive and multilateral automatic exchange of information (“AEOI”) in the future on a global basis. The CRS will require Luxembourg financial institutions to identify financial assets holders and establish if they are fiscally resident in countries with which Luxembourg has a tax information sharing agreement. Luxembourg financial institutions will then report financial account information of the assets holder to the Luxembourg tax authorities, which will thereafter automatically transfer this information to the competent foreign tax authorities on a yearly basis. Shareholders may therefore be reported to the Luxembourg and other relevant tax authorities under the applicable rules.

On this basis, a Council Directive 2014/107/EU amending the Council Directive amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the “Euro-CRS Directive”) has been adopted on 9 December 2014 in order to implement the CRS among the EU Member States. Under the Euro-CRS Directive, the first AEOI must be applied by 30 September 2017 within the limit of the EU Member States for the data relating to calendar year 2016.

In addition, Luxembourg tax authorities signed the OECD’s multilateral competent authority agreement (“Multilateral Agreement”) to automatically exchange information under the CRS. A bill of law (n°6858) was filed with the Luxembourg Parliament in order to implement the EURO-CRS Directive (the “Bill of Law”).

Under the Bill of Law, the first exchange of information is expected to be applied by 30 September 2017 for information related to the year 2016. Accordingly, the Fund would be committed as of 1 January 2016 to run additional due diligence process on its shareholders and to report the identity and residence of financial account holders (including certain entities and their controlling persons), account details, reporting entity, account balance/value and income/sale or redemption proceeds to the local tax authorities of the country of residency of the foreign investors to the extent that they are resident of another EU Member State or of a country for which the Multilateral Agreement is in full force and applicable.

However the Fund has elected the non-reporting status of ECIV (Exempted Collective Investment Vehicle) and will therefore only allow as shareholders entities that are not reportable persons e.g. entities not resident in a reportable jurisdiction (except Passive NFE with Controlling Persons who are Reportable Persons), insurance companies, banks, government entities, central banks or other financial institutions resident in a reportable jurisdiction.

The Fund may impose measures and/or restrictions to that effect, which may include the rejection of subscription orders or the compulsory redemption of

shares, as further detailed in this Prospectus and in article 8 of the articles of association.

Although the Fund will attempt to comply with all requirements to be considered as an ECIV, no assurance can be given that it will be able to satisfy such obligation and therefore avoid the reporting as mentioned above.

Shareholders should consult their professional advisors on the possible tax and other consequences with respect to the implementation of the CRS.

The Fund reserves the right to reject any subscription if the information provided by a potential investor does not meet the conditions established by the Law and resulting from the Directive.

The preceding provisions represent only a summary of the different implications of the Directive and the Law. They are based only on their current interpretation and are not intended to be exhaustive. These provisions should not in any manner be considered as tax or investment advice and investors should therefore seek advice from their financial or tax advisers on the implications of the Directive and the Law to which they may be subject.

Unless otherwise decided by the Management Company, no tax reporting for the dm and ds subclass of shares will be provided for German investors.

FATCA

The US Foreign Account Tax Compliance Act (“FATCA”) aims at preventing US tax evasion by requiring foreign (non-US) financial institutions to report to the US Internal Revenue Service information on financial accounts held outside the United States by US investors. US securities held by a non-US financial institution that does not comply with the FATCA reporting regime will be subject to a US tax withholding of 30% on gross sales proceeds and income, commencing on 1 July 2014.

Luxembourg entered into an Intergovernmental Agreement (the “IGA”) with the US on 28 March 2014 to implement the FATCA. Pursuant to the IGA, the Fund will be required to comply with the provisions of FATCA under the terms of the IGA and under the terms of Luxembourg legislation implementing the IGA. Under the IGA, Luxembourg-resident financial institutions that comply with the requirements of the Luxembourg IGA Legislation will be treated as FATCA-compliant and, as a result, will not be subject to withholding tax under FATCA (“FATCA Withholding”). In order to elect and keep such FATCA status, the Fund only allows as shareholders (i) participating foreign financial institutions, (ii) deemed-compliant foreign financial institutions, (iii) non-reporting IGA foreign financial institutions, (iv) exempt beneficial owners (v), Active Non-Financial Foreign Entities (“Active NFFE”) or (vi) non-specified US persons, all as defined by the Final FATCA Regulation and any applicable IGA; accordingly, investors may only subscribe for and hold Shares through a financial institution that complies or is deemed to comply with FATCA. The Fund may impose measures and/

or restrictions to that effect, which may include the rejection of subscription orders or the compulsory redemption of Shares, (as further detailed in the section “Suspension of net asset value calculation, subscriptions, redemptions and switches” above and in accordance with the Fund Articles) , and/or the FATCA Withholding from payments to the account of any shareholder found to qualify as a “recalcitrant account” or “non-participating foreign financial institution” under FATCA. Prospective investors should (i) consult their own tax advisors regarding the impact of FATCA further to an investment in the Fund and (ii) be advised that although the Fund will attempt to comply with all FATCA obligations, no assurance can be given that it will be able to satisfy the such obligations and therefore to avoid FATCA Withholding.

The attention of US taxpayers is also drawn to the fact that the Fund qualifies as a passive foreign investment company (“PFIC”) under US tax laws and does not intend to provide information that would allow such investors to elect to treat the Fund as a qualified electing fund (so-called “QEF election”).

DATA PROTECTION

Investors are informed that their personal data and any information that is furnished in connection with an investment in the Fund will be collected, stored in digital form and otherwise processed by the managers, Management Company, Depositary Bank, Central Administration Agent (each as defined hereabove), Distributors or their delegates (the “Entities”) as data processor, as appropriate in compliance with the provisions of the Luxembourg law of 2 August 2002 on data protection (as amended from time to time) (the “2002 Law”). Information may be processed for the purposes of carrying out the services of the Entities to the investors and to comply with applicable legislations or regulations including but not limited to, anti-money laundering legislation, FATCA, legislation for the purpose of application of the CRS or similar laws and regulations on data controllers or processors (as defined in the 2002 Law), as appropriate. The information may be used in connection with investments in other investment fund(s) managed by the managers, the Management Company or their affiliates. Information shall be disclosed to third parties where necessary for legitimate business interests only. This may include disclosure to third parties such as governmental or regulatory bodies including tax authorities, auditors, accountants, distributors, subscription and redemption agents as well as permanent representatives in place of registration or any other agents of the Entities who may process the personal data for carrying out their services and complying with legal obligations as described above. Investors especially acknowledge that the Central Administration Agent of the Fund may have to transmit information regarding an investor to the Luxembourg tax authorities if so required by such tax authorities in accordance with the provisions of the Luxembourg law of 31 March 2010 on the approbation of tax treaties and for the provision of the applicable procedure regarding on demand information exchange.

By subscribing or purchasing shares of the Fund, investors consent to the processing of their information and the disclosure of their information to the parties referred to above including companies situated in countries outside of the European Economic Area which may not have the same data protection laws as in Luxembourg and to answer to some mandatory questions in compliance with FATCA and CRS. The transfer of data to the aforementioned entities may transit via and/or be processed in countries which may not have data protection requirements deemed equivalent to those prevailing in the European Economic Area. Investors may request access to, rectification of or deletion of any data provided to any of the parties above or stored by any of the parties above in accordance with applicable data protection legislation. Reasonable measures have been taken to ensure confidentiality of the personal data transmitted within the above mentioned parties. However, due to the fact that the information is transferred electronically and made available outside of Luxembourg, the same level of confidentiality and the same level of protection in relation to data protection regulation as currently in force in Luxembourg may not be guaranteed while the information is kept abroad.

Investors have a right of access and of rectification of the personal data in cases where such data is incorrect or incomplete.

Personal data shall not be held for longer than necessary with regard to the purpose of the data processing.

FISCAL YEAR

The Fund’s fiscal year will begin on 1 October and end on 30 September of the following year.

PERIODIC REPORTS AND PUBLICATIONS

The Fund will publish audited annual reports within 4 months of the end of the fiscal year and unaudited semi-annual reports within 2 months of the end of the reference period.

The annual report includes the financial statements for the Fund and each compartment.

These reports will be made available to shareholders at the Fund’s registered office and from the Depositary Bank and foreign agents involved in marketing the Fund abroad.

The net asset value per share of each compartment (or each sub-class of shares) and the issue and redemption price are available from the Depositary Bank and the foreign agents involved in marketing the Fund abroad.

Any amendment to the Articles of Association will be published in the Mémorial.

DURATION – MERGER – DISSOLUTION OF THE FUND AND COMPARTMENTS

The Fund

The Fund is formed for an indefinite period. However, the Board of Directors may at any time move to dissolve the Fund at an Extraordinary General Shareholders' Meeting.

If the Fund's share capital falls below two-thirds of the minimum capital required by law, the Board of Directors must refer the matter of dissolution to the General Meeting, deliberating without any quorum and deciding by a simple majority of the shares represented at the meeting.

If the Fund's share capital is less than a quarter of the minimum capital required, the directors must refer the matter of dissolution of the Fund to the General Meeting, deliberating without any quorum; dissolution may be decided by shareholders holding a quarter of the shares represented at the meeting.

Merger of compartments

The Board of Directors may decide to merge a compartment of the Fund with another compartment of the Fund or with another UCITS (Luxembourg or foreign) in accordance with the 2010 Act.

The Board of Directors may also decide to submit the decision to merge to the General Meeting of the shareholders of the compartment concerned. Any decision of the shareholders as described above will not be subject to a quorum requirement and will be adopted by simple majority of the votes cast. If, following a merger of one or more compartments, the Fund should cease to exist, the merger will be decided by the General Meeting of Shareholders deliberating in compliance with the majority and quorum conditions required for amending the Company's Articles of Association.

Liquidation of compartments

The Board of Directors may also propose to dissolve a compartment and cancel its shares at the General Meeting of Shareholders of the compartment. This General Meeting will deliberate without any quorum requirement, and the decision to dissolve the compartment will be taken by a majority of the shares from the compartment in question represented at the Meeting.

If a compartment's total net assets fall below EUR 15,000,000 or the equivalent in the reference currency of the compartment concerned, or if justified by a change in the economic situation or political circumstances affecting a compartment or for economic rationalisation or if it is in the interests of the shareholders, the Board of Directors may, at any time, decide to liquidate the compartment in question and cancel the shares of that compartment.

In the event of the dissolution of a compartment or the Fund, the liquidation will be carried out pursuant to the applicable Luxembourg laws and regulations that define the procedures to enable shareholders to participate in liquidation dividends and in this context

provide for the depositing of any amount that could not be distributed to shareholders when the liquidation is complete with the Caisse de Consignation in Luxembourg. Any amounts deposited that are not claimed will be subject to time-barring in accordance with Luxembourg law. The net proceeds from the liquidation of each compartment will be distributed to holders of shares in the class in question in proportion to the number of shares they hold in that class.

DOCUMENTS AVAILABLE FOR INSPECTION

The following documents are deposited at the Depositary Bank and at the registered office of the Fund:

- 1) the Fund's Articles of Association;
- 2) the latest annual report and the latest semi-annual report if more recent than the former;
- 3) the Management Company agreement between the Fund and the Management Company;
- 4) the Depositary agreement entered into between Pictet & Cie (Europe) S.A. and the Fund.

INVESTMENT RESTRICTIONS

General Provisions

Rather than concentrate on a single specific investment objective, the Fund is divided into different compartments, each of which has its own investment policy and its own risk profile by investing in a specific market or in a group of markets.

The characteristics of each compartment, the investment objectives and policies, as well as the subscription procedures and the procedures for switch and redemption of shares are detailed in the Annexes.

Investment Restrictions

For the purposes of this section, "Member State" means a Member State of the European Union. Countries that are parties to the European Economic Area Agreement that are not Member States of the European Union are considered in the same category as Member States of the European Union, within the limits defined by that agreement and related laws.

A. §1

The Fund's investments shall consist solely of one or more of the following:

- 1) Transferable securities and money market instruments admitted to or dealt in on a regulated market;
- 2) Transferable securities and money market instruments dealt in on another regulated and regularly functioning market of a Member State, that is recognised and open to the public;
- 3) Transferable securities and money market instruments admitted to official listing on a stock exchange of a state, which is not part of the Euro-

pean Union or traded on another market of a state that is not part of the European Union, which is regulated and regularly functioning, recognised and open to the public;

4) Recently issued transferable securities and money market instruments provided that:

- the terms of issue include an undertaking that an application will be made for admission to be officially listed on a stock exchange or other regulated, regularly functioning market which is recognised and open to the public;
- and that this admission is obtained at the latest within one year of the issue.

5) Units or shares of approved Undertakings for Collective Investment in Transferable Securities (UCITS) in compliance with Directive 2009/65/EC and/or other Undertakings for Collective Investment (UCI) within the meaning of Art. 1, paragraph (2), point a) of Directive 2009/65/EC, whether or not established in a Member State, provided that:

- such other UCIs are authorised in compliance under laws stipulating that the entities are subject to supervision that the CSSF considers as equivalent to that laid down by the EC legislation and that cooperation between the authorities is sufficiently ensured;
- the level of protection guaranteed to holders of shares or units in the other UCIs is equivalent to that intended for holders of shares or units of a UCITS and, in particular, that the rules relating to the assets segregation, borrowings, lending, short sales of transferable securities and money market instruments are equivalent to the requirements of Directive 2009/65/EC;
- the business of these other UCIs is reported in half-yearly and annual reports that enable valuation of assets and liabilities, revenues and operations for the period concerned; and that
- the proportion of net assets that the UCITS or the other UCIs whose acquisition is contemplated may invest overall in units or shares of other UCITS or other UCIs in conformity with their management rules or constitutive documents, does not exceed 10%.
- When a compartment invests in units or shares of other UCITS and/or other UCIs that are linked to the Fund within the framework of common management or control or by a significant direct or indirect holding, or is managed by a management company linked to the manager, no subscription or redemption fees may be charged to the Fund for investment in the UCITS or other UCI units or shares.
- Where one of the Fund's compartments invests in the units of other UCITS and/or of other UCIs that are managed either directly or via delegation by the same management company or by any other company to which

the management company is linked as part of a joint management or control process, or via a material direct or indirect interest, said management company or the other company cannot charge subscription or redemption fees relating to the Fund's investment in the units of other UCITS and/or UCIs.

- Where one of the Fund's compartments invests a significant portion of its assets in other UCITS and/or other UCIs linked to the Fund, as set out above, the Fund shall mention the maximum management fee amount that can be charged both to the actual compartment and to the other UCITS and or UCIs in which it intends to invest in the Annexes to this prospectus. The Fund shall indicate the maximum percentage of the management fees incurred both at the level of the compartment and at that of the UCITS and/or other UCIs in which it invests in its annual report.

6) Deposits with credit institutions repayable on request or which can be withdrawn and whose maturity is twelve months or less, provided that the credit establishment has its registered office in a Member State or, if the registered office of the credit establishment are situated in a third country, is subject to prudential rules considered by the CSSF as equivalent to those provided in EU law.

7) Financial derivative instruments, including equivalent cash-settled instruments, that are dealt on a regulated market of the kind specified in points 1), 2) and 3) above, and/or over-the-counter derivative instruments, provided that:

- the underlying assets consist of instruments allowed under Book A, §1, in terms of financial indexes, interest rates, exchange rates or currency rates, in which the Fund may invest in conformity with its investment objectives;
- the counterparties to OTC derivative transactions are establishments subject to prudential supervision and belonging to categories approved by the CSSF; and
- the OTC derivative instruments are reliably and verifiably evaluated on a daily basis and can be, at the Fund's initiative, sold, liquidated or closed by an offsetting transaction, at any time and at their fair value.

8) Money market instruments other than those dealt on a regulated market and designated by Art. 1 of the 2010 Act, provided that the issue or the issuer of these instruments are themselves subject to regulations whose aim is to protect the investors and investments and that the instruments are:

- issued and guaranteed by a central, regional or local administration, by a central bank of a Member State, by the European Central Bank, by the European Union or by the European Investment Bank, by a country outside the EU, or, in the case of a federal state, by one of the members of the federation, or by an international public agency of which one or more Member States are members; or

- issued by a company whose securities are dealt on regulated markets specified in points 1), 2) or 3) above; or
- issued or guaranteed by an establishment subject to prudential supervision according to criteria defined by European Union law, or by an establishment that is subject to and in conformity with prudential rules considered by the CSSF as at least as strict as those laid down by European Union legislation; or
- issued by other entities belonging to categories approved by the CSSF as long as the investments in these instruments are subject to rules for protecting investors that are at least equivalent to those prescribed by the first, second or third indents, and that the issuer is a company whose capital and reserves are at least ten million euros (EUR 10,000,000) and which presents and publishes its annual accounts in accordance with the fourth Directive 78/660/EEC, or is an entity which, within a group of companies including one or more listed companies, is dedicated to financing the group or is an entity which is dedicated to financing securitisation vehicles which benefit from a banking liquidity line.

§2

However:

- 1) the Fund may not invest more than 10% of the net assets of each compartment in transferable securities or money market instruments other than those mentioned in §1 above;
- 2) the Fund cannot directly acquire precious metals or certificates representing precious metals;
- 3) the Fund may acquire movables and immovables which is essential for the direct pursuit of its business.

§3

The Fund may hold liquid assets, on an ancillary basis, unless other provisions are specified in the Annexes for each individual compartment:

B.

- 1) The Fund may invest no more than 10% of the net assets of each compartment in transferable securities or money market instruments issued by the same body and cannot invest more than 20% of its net assets in deposits made with the same entity. The counterparty risk of a compartment of the Fund in a transaction involving OTC derivative instruments may not exceed 10% of the net assets when the counterparty is one of the credit institutions specified in Book A, §1, point 6), or 5% of its net assets in other cases.
- 2) The total value of the transferable securities and money market instruments held by a compartment in the issuing bodies in which it invests more than 5% of its net assets shall not exceed 40% of the value of its net assets. This limitation does not apply to deposits in financial establishments that

are subject to prudential supervision and to transactions of OTC derivative instruments with these establishments. Notwithstanding the individual limits set in paragraph 1) above, a compartment of the Fund shall not combine, where this would lead it to invest more than 20% of its net assets in entity single body, any of the following:

- investments in transferable securities or money market instruments issued by the said body,
- deposits with the said body, or
- risks related to transactions involving OTC derivative instruments with the said body.

- 3) The 10% limit defined in the first sentence of paragraph 1) above may be raised to a maximum of 35% when the transferable securities or the money market instruments are issued or guaranteed by a Member State, by its local authorities, by a third state or by international public bodies of which one or more Member States are members. The transferable securities and money market instruments mentioned in this paragraph are not accounted for when applying the 40% limit mentioned in paragraph 2) above.
- 4) The 10% limit defined in the first sentence of paragraph 1) above may be raised to a maximum of 25% for certain debt securities, when they are issued by a credit establishment having its registered headquarters in a Member State that is legally subject to special public auditing designed to protect holders of the bonds. In particular, the amounts originating from the issue of the bonds must be invested, in accordance with the law, in assets that adequately cover, for the entire duration of the validity of the bonds, the related liabilities and that will be distributed preferentially as redemption of the capital and payment of accrued interest in the event of bankruptcy by the issuer. When a compartment of the Fund invests more than 5% of its net assets in bonds as referred in this paragraph and issued by a single issuer, the total value of the investments may not exceed 80% of the value of the net assets of a compartment of the Fund. The transferable securities and money market instruments mentioned in this paragraph are not accounted for when applying the 40% limit mentioned in paragraph (2), above.
- 5) The limits set out in the previous points 1), 2), 3) and 4) may not be combined and therefore, the investments in transferable securities or money market instruments of a single issuer, in deposits or financial derivative instruments involving this entity, in conformity with these paragraphs, shall not exceed a total of 35% of the net assets of the compartment in question.
- 6) The companies that are grouped together in the consolidated accounts, within the meaning of Directive 83/349/EEC or in conformity with recognised international accounting rules, are considered as a single body for the calculation of the limits described in points 1) to 5) of this Book B.

Each compartment of the Fund may invest cumulatively up to 20% of its net assets in the transferable securities or money market instruments within the same group.

7) **Notwithstanding the above and respecting the principle of risk diversification, the Fund may invest up to 100% of the net assets of each compartment in different issues of transferable securities and money market instruments issued or guaranteed by an EU Member State, by the local authorities of an EU Member State, by a country that is not part of the European Union (at the date of this prospectus, the Member States of the Organisation for Economic Cooperation and Development (the OECD), Singapore, Brazil, Russia, Indonesia and South Africa) or by an international public body of which one or more EU Member States are members, provided that these securities belong to at least six different issues and that the securities belonging to a single issue do not exceed 30% of the net assets of the compartment in question.**

8) The Fund may not invest more than 20% of the net assets of each compartment in a single UCITS or other UCI as defined in Book A, §1 5). For the purpose of this limit, each compartment of a UCI with multiple compartments is considered a separate issuer, provided that the liabilities of the different compartments with regard to third parties are segregated.

The investment in units or shares of UCIs other than UCITS may not in aggregate exceed of 30% of the net assets of each compartment.

When a compartment's investment policy allows it to invest via total return swaps in shares or units of UCITS and/or other UCIs, the 20% limit defined above also applies, such that the potential losses resulting from this kind of swap contract creating an exposure to a single UCITS or UCI, together with direct investments in this single UCITS or UCI, will not in total exceed 20% of the net assets of the compartment in question. If these UCITS are compartments of the Fund, the Swap contract will include provisions for cash settlement.

9) a) The limits specified in points B 1) and B 2) above are raised to a maximum of 20% for investments in shares and/or debt securities issued by a single body when, in accordance with the investment policy of a compartment of the Fund, its objective is to replicate the composition of a specific index of equities or debt securities that is recognised by the CSSF, on the following bases:

- the composition of the index is sufficiently diversified;
- the index is a representative benchmark for the market to which it refers;
- it is published in an appropriate manner.

b) The limit laid down in paragraph a) above is raised to 35% where that proves to be justified by exceptional market conditions, in

particular on regulated markets where certain transferable securities or money market instruments are largely dominant. Investment up to that limit is only permitted for a single issuer.

10) A compartment of the Fund (defined as an "Investing Compartment", for purposes of this paragraph) may subscribe for, acquire and/or hold securities to be issued or that have been issued by one or more other compartments of the Fund (each a "Target Compartment"), without the Fund being subject to the requirements imposed by the Law of 10 August 1915 governing commercial companies, as amended, with respect to a company's subscription, acquisition and/or holding of its own shares, provided that:

- the Target Compartment does not invest in the Investing Compartment that is invested in this Target Compartment; and
- the proportion of assets that the Target Compartments whose acquisition is envisaged and which may be wholly invested, in accordance with their investment policy, in units or shares of other UCITS and/or other UCIs, including other Target Compartments of the same UCI, does not exceed 10%; and
- any voting right attached to the shares concerned is suspended as long as they are held by the Investing Compartment and notwithstanding appropriate accounting treatment in the periodic financial statements; and
- in any event, for as long as these securities are held by the Investing Compartment their value is not taken into account in the calculation of the Fund's net assets for verification of the minimum threshold of net assets imposed by the 2010 Act.

C. §1

The Fund may not acquire across all the compartments together:

- 1) shares granting voting rights in sufficient number to allow it to exert a significant influence on the management of an issuing body;
- 2) more than:
 - 10% of the non-voting shares of the same issuer;
 - 10% of the debt instruments of the same issuer;
 - 25% of the units or shares of the same UCITS or other UCI within the meaning of Article 2 §2 of the 2010 Act;
 - 10% of money market instruments of any single issuer.

The limits laid down in the second, third and fourth indents above may be disregarded at the time of acquisition if, at that time, the gross amount of bonds or of the money market instruments or the net amount of the instruments in issue cannot be calculated;

The restrictions mentioned in points 1) and 2) above are not applicable:

- a) to the transferable securities and money market instruments issued or guaranteed by a Member State, by its local authorities, or by a state that is not a member of the European Union;
- b) to the transferable securities and money market instruments issued by international public bodies of which one or more Member States are members;
- c) to shares held in the capital of a company incorporated in a state outside the EU that invests its assets mainly in the securities of issuers of that state, where under the legislation of that state such a holding represents the only way in which the UCITS can invest in the securities of issuing bodies in that state. This derogation is, however, only applicable when the state outside the EU respects in its investment policy the limits established by Articles 43 and 46 and Article 48, paragraphs (1) and (2), of the 2010 Act. In the case that the limits defined in Articles 43 and 46 of this law are exceeded, Article 49 applies with the necessary modifications;
- d) to shares held by one or more investment companies in the capital of subsidiary companies exercising management, advising, or sales activities in the country where the subsidiary is established in regard to the redemption of units at the unitholders' request exclusively on its own or their behalf.

§2

- 1) The Fund may, for each compartment, on a temporary basis, borrow in a proportion not exceeding 10% of the assets of the compartment concerned.
- 2) The Fund may not grant loans or act as guarantor for third parties.

The paragraph above does not prevent the acquisition by the Fund of transferable securities, money market instruments or other financial instruments allowed under Book A, §1, points 5), 7) and 8) not fully paid.

- 3) The Fund may not, for any compartment, carry out uncovered sales of transferable securities, money market instruments or other financial instruments specified in Book A, §1, points 5), 7) and 8).

§3

While adhering to the principle of risk spreading, a newly-approved compartment of the Fund is allowed to derogate from Articles 43, 44, 45 and 46 of the 2010 Act, for a period of six months following the date of its authorisation.

Use of derivative financial products and instruments

Options, warrants, futures contracts, exchange contracts on transferable securities, currencies or financial instruments

To ensure that the portfolio is managed effectively or for hedging purposes, the Fund may buy and sell call and put options, warrants and futures contracts, and enter into exchange contracts, and for the compartments mentioned in Annexes 2 and 3, CFDs (Contracts For Difference) on transferable securities, currencies or any other type of financial instrument, provided that these financial derivative instruments are traded on a regulated market, operating regularly, that is recognised and open to the public; however, these financial derivative instruments may also be traded over-the-counter (OTC), provided they are contracted with leading financial institutions specialising in this type of transaction.

Credit derivatives

The Fund may invest in buying and selling credit financial derivative instruments. Credit derivative products are used to insulate and transfer the credit risk associated with a base asset. There are two categories of credit derivatives: "financed" and "non-financed" depending on whether or not the protection seller has made an initial payment in relation to the base asset.

Despite the great variety of credit derivatives, the three most common types of transaction are:

The first type: transactions on credit default products (such as Credit Default Swaps [CDS] or CDS options), are transactions in which the debts of the parties are linked to the presence or absence of one or more credit events in relation to the base asset. The credit events are defined in the contract and represent a decline in the value of the base asset. Credit default products may either be paid in cash or by physical delivery of the base asset following the default.

The second type, total return swaps, is an exchange on the economic performance of an underlying asset without transferring ownership of the asset. When a buyer purchases a Total Return Swap, it makes a regular payment at a variable rate, in return for which all the results relating to a notional amount of that asset (coupons, interest payments, change in asset value) accrue to it over a period of time agreed with the counterparty. The use of these instruments can help offset the relevant compartment's exposure.

Nonetheless, these transactions can never be made in order to modify the investment policy.

When the investment policy of a compartment provides that the latter may invest in total return swaps and/or other financial derivative instruments that display similar characteristics, these investments will be made in compliance with the investment policy of such compartment. Unless the investment policy of a compartment provides otherwise, such total return swaps and other financial derivative instruments that display the same characteristics may have underlying assets such as currencies, interest rates, transferable securities, a basket of transferable securities, indexes, or undertakings for collective investment.

The counterparties of the Fund will be leading financial institutions specialised in this type of transaction and subject to prudential supervision.

These counterparties do not have discretionary power over the composition or management of the investment portfolio of the compartment or over the underlying assets of the financial derivative instruments.

The total return swaps and other financial derivative instruments that display the same characteristics only give the Fund a right of action against the counterparty in the swap or in the derivative financial instrument, and any potential insolvency of the counterparty may make it impossible for the payments envisioned to be received.

The amounts paid out by a compartment, pursuant to the Total Return Swap contracts, are discounted at the valuation date at the rate of the zero-coupon swap for the flows at maturity. The amounts received by the protection buyer, which result from a combination of options, are also discounted, depending on several parameters, including price, volatility, and the probability of defaults on the underlying assets. The value of Total Return Swap contracts results from the difference between the two discounted flows described above.

The third type, “credit spread” derivatives, are credit protection transactions in which the payments may be made either by the buyer or by the seller of the protection based on the relative credit value of two or more base assets.

However, at no time may these operations be conducted for the purpose of modifying the investment policy.

The rebalancing frequency for an index that is the underlying asset for a financial derivative is determined by the provider of the index in question. The rebalancing of the index will not result in any costs for the compartment in question.

Application of sufficient hedging on transactions involving derivative financial products and instruments whether or not traded on a regulated market

Sufficient hedging in the absence of a cash settlement

When the derivative financial contract provides, either automatically or at the choice of the Fund’s counterparty, for the physical delivery of the underlying financial instrument on the date of expiry or on exercise, and as long as physical delivery is common practice for the instrument concerned, the Fund must hold the underlying financial instrument in its portfolio as a hedge.

Exceptional substitution by another underlying hedge in the absence of a cash settlement

When the underlying financial instrument of a derivative financial instrument is very liquid, the Fund is allowed, on an exceptional basis, to hold other liquid assets as hedges, provided that these assets can be used at any time to acquire the underlying financial instrument due to be delivered and that the additional market risk associated with this type of transaction is adequately valued.

Substitution by another underlying hedge in the event of a cash settlement

When the derivative financial instrument is settled in cash, automatically or at the Fund’s discretion, the Fund is allowed to not hold the specific underlying instrument as a hedge. In this case, the following categories of instruments are acceptable hedges:

- a) cash;
- b) liquid debt securities, provided that appropriate safeguard methods (such as discounts or “haircuts”) exist;
- c) any other very liquid asset, considered because of its correlation with the underlying asset of the derivative instrument, provided appropriate safeguard methods exist (such as a discount, where applicable).

Calculating the amount of the hedge

The amount of the hedge must be calculated using the liabilities approach.

Efficient portfolio management techniques

In order to reduce risks or costs or to procure capital gains or revenues for the Fund, the Fund may lend or borrow securities and engage in repurchase or reverse repurchase transactions as described below.

The Fund will ensure that these transactions are kept at a level at which it can fulfil its obligation at any time to redeem its shares and that these transactions do not compromise the management of the Fund’s assets, in compliance with its investment policies.

These transactions will be conducted in compliance with the rules specified in CSSF circulars 08/356, 13/559 and 14/592 as amended.

To the full extent permitted by and within the regulatory limits, and in particular pursuant to (i) Article 11 of the Luxembourg Regulations of 8 February 2008 on certain definitions of the amended Law of 20 December 2002 on undertakings for collective investment, (ii) CSSF circular 08/356 regarding rules applicable to undertakings for collective investment when certain techniques and instruments on transferable securities and money market instruments are used (as amended, supplemented or replaced) and (iii) circular 13/559 regarding the ESMA guidelines on ETFs and other points relating to UCITS, any compartment can enter into securities lending agreements and repurchase/reverse repurchase agreements to increase its capital or its income or to reduce its costs or risks.

Securities lending

The Fund may enter into securities lending agreements only if the following conditions are met:

- (i) the counterparty is subject to prudential supervision rules that the CSSF deems equivalent to those required under European law;
- (ii) if the counterparty is an entity linked to the Management Company, care should be taken to avoid any resulting conflicts of interest in order to ensure that the agreements are entered into at arm’s length;

- (iii) the counterparty must be a financial intermediary (such as a banker, a broker, etc.) acting for its own account; and
- (iv) the Fund may recall any securities lent or terminate any securities lending transaction that it has entered into.

Implementation of the above-mentioned securities lending programme should not have any impact on the risk profile of the concerned compartments of the Fund.

Repurchase and reverse repurchase agreements

The Fund may engage in reverse repurchase agreements consisting of transactions at the conclusion of which the seller (counterparty) is required to repurchase the asset sold and the Fund must relinquish the asset held.

The Fund may enter into reverse repurchase agreements only if the following conditions are met:

- (i) the counterparty is subject to prudential supervision rules that the CSSF deems equivalent to those required under European law;
- (ii) the value of a transaction is maintained at a level that allows the Fund to meet its redemption obligations at any time; and
- (iii) the Fund may recall the total amount in cash or terminate the reverse repurchase agreement at any time, either on a prorated basis or on a mark-to-market basis.

The Fund may also engage in repurchase agreements consisting of transactions at the conclusion of which the Fund is required to repurchase the asset sold and the buyer (counterparty) must relinquish the asset held.

The Fund may enter into repurchase agreements only if the following conditions are met:

- (i) the counterparty is subject to prudential supervision rules that the CSSF deems equivalent to those required under European law;
- (ii) the value of a transaction is maintained at a level that allows the Fund to meet its redemption obligations at any time; and
- (iii) the Fund may recall any security subject to the repurchase agreement or terminate the repurchase agreement into which it has entered at any time.

Management of collateral

For each securities lending agreement, the Fund must receive collateral, the value of which for the full term of the lending agreement must be at least equivalent to 90% of the total valuation (including interests, dividends and any other rights) of the securities lent to the borrower. However, the Agent shall request collateral equivalent to 105% of the market value of the securities lent, and no discount shall be applied to that value.

The collateral furnished for the lent securities will be either (i) bonds issued or guaranteed by the government or by a regional or local government in a member state of the OECD, or issued or guaranteed by

local, regional or international branches of supranational institutions or organisations that have a rating of at least AA and/or (ii) bonds issued or guaranteed by leading issuers offering adequate liquidity.

The market value of the lent securities and of the collateral will be reasonably and objectively calculated by the Agent each Banking Day (“**mark to market**”) taking into consideration the market conditions and any supplementary fees, as applicable. If the collateral already furnished seems inadequate in view of the amount to be covered, the Agent will ask the borrower to promptly furnish additional collateral in the form of securities that meet the criteria listed above. The collateral received by the Fund as part of the securities lending agreements will not be reinvested.

With regard to OTC derivative financial instrument transactions and repurchase/reverse repurchase agreements, (1) the compartment will monitor the market value of each transaction daily to ensure that it is secured in an appropriate manner and will make a margin call if the value of the securities and that of the liquid assets increases or decreases in respect of one another beyond the minimum applicable margin-call amount (the collateral having been provided in the form of liquid assets) and (2) will only enter into these transactions with counterparties whose resources and financial soundness are adequate according to an analysis of the counterparty’s solvency conducted by the Pictet Group.

Collateral received by the Fund in the form of liquid assets as part of OTC derivative financial instrument transactions and repurchase/reverse repurchase agreements may be reinvested in accordance with the investment policy of the compartment(s) concerned and subject to point 43 j) of the ESMA guidelines on ETFs and other points relating to UCITS. The risks to which investors are exposed within the context of these reinvestments are outlined in the appendix relating to the compartment(s) concerned.

Acquisition and sale of securities under repurchase agreements

The Fund may act as buyer in repurchase agreements that consist of purchases of securities that contain clauses allowing the seller (the counterparty) to repurchase from the Fund the securities sold, at a price and term stipulated between the Parties at the time of signing the contract.

The Fund may act as seller in repurchase agreements that consist of purchases of securities containing clauses allowing the Fund to repurchase the securities sold from the buyer (the counterparty), at a price and term stipulated between the Parties at the time of signing the contract.

Structured Finance Securities

The Fund may invest in Structured Finance Securities; however, when compartments invest in structured finance securities of the credit-linked notes-type, this will be clearly indicated in the compartment’s investment policy.

Structured finance securities include, but are not limited to, asset-backed securities, asset-backed commercial papers and portfolio credit-linked notes.

Asset-backed securities are securities that are backed by financial cash flows from a group of debt securities (current or future) or by other underlying assets that may or may not be fixed. Such assets may include, but are not limited to, mortgages on residential or commercial property, leases, credit card debts as well as consumer or commercial loans. Asset-backed securities may be structured in various ways, either as a “true-sale” in which the underlying assets are transferred within an ad hoc structure that then issues the asset-backed securities or synthetically, in which the risk linked to underlying assets is transferred via derivative instruments to an ad hoc structure that issues the asset-backed securities.

Portfolio credit-linked notes are securities in which payment of the nominal amount and the interest is directly or indirectly linked to one or more managed or unmanaged portfolios of reference entities and/or assets (“reference credit”). Until a threshold credit event occurs in relation to a reference credit (such as bankruptcy or payment default), a loss will be calculated (corresponding, for example, to the difference between the nominal value of an asset and its recovery value).

Asset-backed securities and portfolio credit-linked notes are usually issued in different tranches. Any losses occurring in regard to underlying assets or, depending on the case, calculated in relation to reference credits, are first assigned to the most junior tranches until the nominal amount of the securities is brought to zero; then it is assigned to the nominal amount of the next most junior tranche remaining and so on.

Consequently, in the event that (a) for asset-backed securities, the underlying assets do not produce the expected financial flows and/or (b) for portfolio credit-linked notes, one of the defined credit events occurs with regard to one or more underlying assets or reference credits, there may be an effect on the value of the related securities (which may be nil) and any amount paid on such securities (which may be nil). This may in turn affect the Net Asset Value per share of the compartment. Moreover, the value of the structured finance securities and thus the net asset value per share of the compartment may, from time to time, be negatively affected by macro-economic factors, including for example unfavourable changes in the economic sector of the underlying assets or the reference credits (including the industrial, service, and real estate sectors), economic recession in the respective countries or global recession, as well as events linked to the inherent nature of the assets (thus, a loan to finance a project is exposed to risks related to the type of project).

The extent of such negative effects is thus linked to the geographic and sectoral concentrations of the underlying assets, and the type of underlying assets or reference credits. The degree to which a particular asset-backed security or a portfolio credit-linked note is affected by such events will depend on its issue tranche; the most junior tranches, even ones rated

“investment grade”, may consequently be exposed to substantial risks.

Investments in structured finance securities may be more exposed to a greater liquidity risk than investing in government or corporate bonds. When a liquid market for these structured finance securities does not exist, such securities may only be traded for an amount lower than their nominal amount and not at the market value which may subsequently affect the Net Asset Value per share of the compartment.

Risk management

The Fund utilises a risk management method that allows it at all times to monitor and measure the risk associated with positions and the contribution of the positions to the overall portfolio risk profile.

The Fund also utilises a method that allows a precise and independent evaluation of the value of its OTC financial derivatives.

The Fund makes sure that the overall risk associated with the financial derivative instruments does not exceed the total net value of its portfolio. Risks are calculated taking account of the current value of the underlying assets, the counterparty risk, foreseeable changes in the markets and the time available for liquidating the positions.

The Fund utilises the VAR (Value at Risk) method, coupled with stress testing in order to evaluate the market risk component of the overall risk associated with financial derivative instruments.

The counterparty risk associated with OTC derivative instruments is evaluated in accordance with the market value notwithstanding the need to use ad hoc price fixing models when the market price is not available.

RISK CONSIDERATIONS

Investors must read this “Risk Considerations” section before investing in any of the compartments.

This “Risk Considerations” section contains explanations of the various types of investment risks that may be applicable to the compartments. Please refer to the section “Risk Profile” of appendices for details as to the most relevant risks applicable to each compartment. Investors should be aware that other risks may also be relevant to the compartments from time to time.

Counterparty risk

The risk of loss due to a counterparty failing to meet its contractual obligations in a transaction. This may entail the compartments to delayed delivery. In the case of default of the counterparty, the amount, nature and timing of recovery may be uncertain.

- **Collateral risk.** The risk of loss caused by delayed or partial recovery as well as loss of rights on assets pledged as collateral. Collateral can take the form of initial margin deposits or assets with a counterparty. Such deposits or assets may not be segregated from the counterparty’s own assets and, being freely exchangeable and

replaceable, the compartment may have a right to the return of equivalent assets rather than the original margin as-sets deposited with the counterparty. These deposits or assets may exceed the value of the relevant compartments' obligations to the counterparty in the event that the counterparty requires excess margin or collateral. In addition, as the terms of a derivative may provide for one counterparty to provide collateral to the other counterparty to cover the variation margin exposure arising under the derivative only if a minimum transfer amount is triggered, the compartments may have an uncollateralised risk exposure to a counterparty under a derivative up to such minimum transfer amount.

- **Settlement risk.** The risk of loss resulting from a counterparty's failure to deliver the terms of a contract at the time of settlement. The acquisition and transfer of holdings in certain investments may involve considerable delays and transactions may need to be carried out at unfavourable prices as clearing, settlement and registration systems may not be well organised in some markets.

Credit risk

The risk of loss resulting from a borrower's failure to meet financial contractual obligations, for instance timely payment of interest or principal. Depending on contractual agreements, various credit events may qualify as default, which include but are not limited to: bankruptcy, insolvency, court-ordered reorganisation/liquidation, rescheduling of debts or non-payment of debts payable. The value of assets or derivative contracts may be highly sensitive to the perceived credit quality of the issuer or reference entity. Credit events may adversely affect the value of investments, as the amount, nature and timing of recovery may be uncertain.

- **Credit rating risk.** The risk that a credit rating agency may downgrade an issuer's credit rating. Investment restrictions may rely on credit rating thresholds and thus have an impact on securities selection and asset allocation. The Investment Managers may be forced to sell securities at an unfavourable time or price. Credit rating agencies may fail to correctly assess the credit worthiness of issuers.
- **High Yield investment risk.** High yield debt (also known as non-investment-grade or speculative-grade) is defined as debt generally offering high yield, having low credit rating and high credit event risk. High yield bonds are often more volatile, less liquid and more prone to financial distress than other higher rated bonds. Bonds from issuers in distress are often defined as those (i) that have been given a very speculative long-term rating by credit rating agencies or those (ii) that have filed for bankruptcy or expected to file for bankruptcy. In some cases, the recovery of investments in distressed or defaulted debt securities is subject to uncertainty related to court orderings and corporate reorganisations among other things. The valuation of high yield (including distressed) securities may be more difficult than other higher rated securities because of lack of liquidity. Investment in this kind of secu-

rities may lead to unrealised capital losses and/or losses that can negatively affect the net asset value of the compartment.

Liquidity risk

The risk that arises from lack of marketability or presence of sale restrictions.

- **Asset liquidity risk.** The inability to sell an asset or liquidate a position within a defined timeframe without a significant loss in value. Asset illiquidity can be caused by lack of established market for the asset or lack of demand for the asset. Large positions in any class of securities of a single issuer can cause liquidity issues. Risk of illiquidity may exist due to the relatively undeveloped nature of financial markets in some countries. The Investment Managers may be unable to sell assets at a favourable price and time because of illiquidity.
- **Investment restriction risk.** The risk arising from governmental capital controls or restrictions that may negatively impact the timing and amount of capital being divested. In some cases, the compartments may not be able to withdraw investments made in some countries. Governments may change restrictions on foreign ownership of local assets, including but not limited to restrictions on sectors, individual and aggregate trading quotas, percentage of control and type of shares available to foreigners. The compartments may not be able to implement their strategies due to restrictions.
- **Restricted securities risk.** In some jurisdictions, and under particular circumstances, some securities may have a temporary restricted status which can limit the fund's ability to resell them. In consequence of such market restrictions, the compartment may suffer from reduced liquidity. For instance under the United States Securities Act of 1933, rule 144 addresses resale conditions of restricted securities, which include, but are not limited to, the purchaser qualifying as a qualified institutional buyer.

Market risk

The risk of loss due to movements in financial market prices and changes in factors that affect these movements. Market risk is further declined into risk items corresponding to major asset classes or market characteristics. Recessions or economic slowdowns impact financial markets and may decrease the value of investments.

- **Commodity risk.** The risk which arises from potential movements of commodity values, which include for instance agricultural products, metals, and energy products. The value of the compartments can be indirectly impacted by changes in commodity prices.
- **Currency risk.** The risk which arises from potential movements of currency exchange rates. It is the risk which arises from the holding of assets denominated in currencies different from the compartment's base currency. It may be affected by changes in currency exchange rates between the base currency and these other currencies

or by changes in regulations controlling these currency exchange rates. It must therefore be expected that currency exchange risks cannot always be hedged and the volatility of currency exchange rates to which the compartment is exposed may affect the net asset value of the compartment.

- **Equity risk.** The risk which arises from potential movements in level and volatility of stock prices. Equity holders often support more risk than other creditors in the capital structure of an entity. Equity risk includes among other risks, the possibility of loss of capital and suspension of income (dividend) for dividend paying stocks. Initial Public Offering (IPO) risk also applies when companies are listed on an exchange for the first time.
- **Interest rate risk.** The risk which arises from potential movements in the level and volatility of yields. The value of investments in bonds and other debt securities or derivative instruments may rise or fall sharply as interest rates fluctuate. As a general rule, the value of fixed-rate instruments will increase when interest rates fall and vice-versa. In some instances, prepayments (i.e. early unscheduled return of principal) can introduce reinvestment risk as proceeds may be reinvested at lower rates of return and impact the performance of the compartments.
- **Real estate risk.** The risk which arises from potential movements in the level and volatility of real estate values. Real estate values are affected by a number of factors, including but not limited to changes in general and local economic conditions, changes in supply of and demand for competing properties in an area, changes in government regulations (such as rent control), changes in real property tax rates and changes in interest rates. The compartment's value may be indirectly impacted by real estate market conditions.
- **Volatility risk.** The risk of uncertainty of price changes. Usually, the higher the volatility of an asset or instrument, the higher its risk. The prices for transferable securities in which the compartments invest may change significantly in short-term periods.
- **Emerging market risk.** Emerging markets are often less regulated and less transparent than developed markets and are often characterised by poor corporate governance systems, non-normal distributions of returns and are more exposed to market manipulation. Investors should be aware that, due to the political and economic situation in some emerging countries, investments may present greater risk than those in developed markets. The accounting and financial information on the companies in which the compartments invest may be more cursory and less reliable. The risk of fraud is usually greater in emerging countries than in developed countries. Companies in which frauds are uncovered may be subject to large price movements and/or suspension of quotation. The risk that audit firms fail to uncover account-

ing errors or frauds is usually larger in emerging countries than in developed countries. The legal environment and laws governing ownership of securities in emerging countries may be imprecise and do not provide the same guarantees as the laws in developed countries, in the past there have been cases of fraudulent and falsified securities. Emerging markets risk includes various risks defined throughout this section such as capital repatriation restriction, counterparty, currency risk, interest rate risk, credit risk, equity risk, credit risk, liquidity risk, political risk, fraud, audit, volatility, illiquidity as well as restrictions on foreign investments risk among other risks. The choice of providers in some countries may be very limited and even the best-qualified providers may not offer guarantees comparable to those given by financial institutions and brokerage firms operating in developed countries.

Compartment Specific Risks

The set of risks attached to investment compartments. The compartments may not be able to implement its investment strategy or its asset allocation and the strategy may fail to achieve its investment objective. This may cause loss of capital and income, and index tracking risk.

- **Hedging risk.** The risk arising from a compartment's share class or investment being over or under hedged with regards to, but not limited to currency exposure and duration.
- **Redemption risk.** The inability to meet a redemption within a contractual timeframe without serious disruption of the portfolio structure or loss of value for the remaining investors. Compartments' redemptions whether in cash or in kind may impair the strategy. Swings may apply to redemption and may differ from the NAV per share price at the disadvantage of the shareholder redeeming shares. In crisis periods, the risk of illiquidity may give rise to suspension of the calculation of the NAV and temporarily impede the right of shareholders to redeem their shares.
- **Fund liquidation risk.** Liquidation risk is the inability to sell some holdings when a compartment is being liquidated. This is the extreme case of redemption risk.
- **Dividend distribution risk.** Dividend distributions reduce the NAV and may erode the capital.

Operational risk

The risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. Operational risk includes but is not limited to multiple risks such as: systems and process risk that arises from systems vulnerability, insufficiency or controls failure, valuation risk when an asset is overvalued and is worth less than expected when it matures or is sold, service providers risk when service providers do not deliver the desired level of service, execution risk when an order may not be executed as desired, resulting in a loss for the compartments or having regulatory consequences, and risk surrounding the human being (insufficient or inappropriate skills/competencies, loss of key personal, availability, health, safety, fraud/collusion risk, etc.).

Other risks

This category lists all risks that do not belong to other categories and that are not specific to a market.

- **Legal risk.** The risk from uncertainty due to legal actions or uncertainty in the applicability or interpretation of contracts, laws or regulations.
- **Regulatory and compliance risk.** The risk that regulations, standards or rules of professional conduct may be violated resulting in legal and regulatory sanctions, financial losses or damage to one's reputation.
- **Concentration risk.** The risk of losses due to the limited diversification in the investments made. Diversification may be sought in terms of geography (economic zone, country, region, etc.), currency or sector. Concentration risk also relates to large positions in a single issuer relative to a compartment's asset base. Concentrated investments are often more prone to political and economic factors and may suffer from increased volatility.
- **Political risk.** Political risk may arise from sudden changes in political regime and foreign policy which may result in large unexpected movements in the level of currencies, repatriation risk (i.e. restrictions on repatriation of funds from emerging countries) and volatility risk. This may lead to increased fluctuations in the exchange rate for these countries, asset prices and capital repatriation restrictions risk. In extreme cases, political changes can stem from terrorist attacks or lead to economic and armed conflicts. Some governments are implementing policies of economic and social liberalisation but there is no assurance that these reforms will be continued or that they will be beneficial to their economies in the long term. These reforms may be challenged or slowed by political or social events, or by national or international armed conflicts (such as the conflict in the former Yugoslavia). All these political risks may impair objectives set for a compartment and negatively impact the NAV.
- **Tax risk.** The risk of loss incurred by changes in tax regimes, loss of tax status or advantages. This may impact the compartments' strategy, asset allocation and NAV.
- **Trading venues risk.** The risk that exchanges discontinue the trading of assets and instruments. Suspensions and de-listings constitute the main risks related to trading exchanges. The compartments may not be able to trade certain assets for a period of time.
- **Conflict of interest risk.** A situation that occurs when a service provider may disadvantage one party or client over another when holding multiple interests. Conflict of interest may concern but are not limited to voting right, soft dollar policies and in some cases securities lending. Conflicts of interest may be at the compartments' disadvantage or cause legal issues.
- **Leverage risk.** The acquisition of financial derivatives instruments may lead to considerable leverage effect. Leverage may accelerate losses.

- **Sub-custody risk.** The risk of loss arising from a depositary's inability to ensure the safekeeping of assets, which includes loss of ownership. The compartment may incur losses resulting from the acts or omissions of the sub-custodian bank when performing or settling transactions or when transferring money or securities.
- **Disaster risk.** The risk of loss caused by natural and/or man-made hazards. Disasters can impact economic regions, sectors and sometimes have a global impact on the economy and therefore the performance of the compartment.

Specific risks

This category lists all risks that are specific to certain geographical areas or investment programmes.

- **Risk of investing in Russia.** Investments in Russia are subject to custody risk inherent to the country's legal and regulatory framework. This could cause loss of ownership of securities.
- **Risk of investing in the PRC.** Investments in the People's Republic of China ("PRC") are subject to restrictions by the local regulators, and include among other things: daily and market aggregate trading quotas, restricted classes of shares, capital restrictions and ownership restrictions. The PRC authorities could impose new market restrictions, capital restrictions as well as nationalise, confiscate and expropriate firms or assets. On 14 November 2014, the Ministry of Finance, State of Administration of Taxation and CSRC jointly issued a notice in relation to the taxation rule on the Stock Connect under Caishui [2014] No.81 ("Notice No.81"). Under Notice No.81, Corporate income tax, individual income tax and business tax will be temporarily exempted on gains derived by Hong Kong and overseas investors (such as the compartments) on the trading of China A-Shares through the Stock Connect with effect from 17 November 2014. However, Hong Kong and overseas investors (such as the compartments) are required to pay tax on dividends and/or bonus shares at the rate of 10% which will be withheld and paid to the relevant authority by the listed companies. The Management Company and/or Investment Managers reserve the right to provide for tax on gains of the relevant compartments that invest in PRC securities thus impacting the valuation of the relevant compartments. With the uncertainty of whether and how certain gains on PRC securities are to be taxed, the possibility of the laws, regulations and practice in the PRC changing, and the possibility of taxes being applied retrospectively, any provision for taxation made by the Management Company and/or the Investment Managers may be excessive or inadequate to meet final PRC tax liabilities on gains derived from the disposal of PRC securities. In the event of insufficient provision, the tax due will be charged on the Fund's assets, and this may adversely affect them as a result. Consequently, investors may be advantaged or disadvantaged depending upon the final outcome of how such gains will be taxed, the level of provision and when they purchased and/or sold their shares in/from the relevant compartments.

- **QFII risk.** Investments in the People's Republic of China ("PRC") can be made via a QFII ("Qualified Foreign Institutional Investor") programme. The programme enables capital flows to/from the PRC within the limits of quotas allocated to institutional investors. In some circumstances, the compartment may not be able to immediately repatriate proceeds from sales of China A-Shares due to asset repatriation restrictions imposed by local authorities. Such restrictions may impair the compartment's strategy and have an impact on the compartment's performance. The QFII status is subject to the approbation of the CSRC and the investment quota is subject to the approbation of SAFE ("State Administration of Foreign Exchange"). This quota will be allocated to the Investment Manager (i.e. PAM Ltd), who will have the right to use it for multiple purposes. Transactions are dealt in USD, in eligible renminbi (RMB) denominated products approved by CSRC. CSRC and SAFE can at any time modify the terms and conditions of the programme. Changes in quota sizes or China A-Share eligibilities could impede the relevant compartments' investment strategies.
- **RQFII risk.** Investments in the People's Republic of China ("PRC") can be made via a RQFII ("Renminbi Qualified Foreign Institutional Investor") programme. The programme enables capital flows to/from China within the limits of regional quotas allocated to offshore regions. The RQFII status is subject to the approbation of the CSRC and the investment quota is subject to the approbation of SAFE. The Investment Manager (i.e. PAM Ltd) will have the right to use his quota for multiple funds and compartments. Transactions are dealt in RMB, in eligible RMB denominated products approved by CSRC. CSRC and SAFE can at any time modify the terms and conditions of the programme. Please consult the websites and <http://www.safe.gov.cn> for more information. Changes in quota sizes or China A-Share eligibilities could impede the relevant compartments investment strategy.
- **CIBM risk.** The China Interbank Bond Market ("CIBM") is an OTC market with a dominant share of the whole Chinese interbank market and is regulated and supervised by the People's Bank of China ("PBC"). Trading on the CIBM market may expose the Compartment to higher liquidity and counterparty risk. In order to access the CIBM market, the RQFII manager must obtain prior approval from the PBC as a market participant. The manager's approval may be refused or withdrawn at any time, at the discretion of the PBC, which may limit the Compartment's investment opportunities in the instruments traded on the CIBM market. Investors' attention is drawn to the fact that clearing and settlement systems on the Chinese securities market may not as yet be extensively tested, and are subject to increased risks due to errors in assessment and delays in settling transactions.
- **Shanghai-Hong Kong Stock Connect risk.** Certain compartments may invest and have direct

access to certain eligible China A-Shares via the Shanghai-Hong Kong Stock Connect ("**Stock Connect**"). The Stock Connect is a securities trading and clearing linked program developed by Hong Kong Exchanges and Clearing Limited ("**HKEx**"), Shanghai Stock Exchange ("**SSE**") and China Securities Depository and Clearing Corporation Limited ("**ChinaClear**"), with an aim to achieve mutual stock market access between the PRC and Hong Kong.

The Stock Connect comprises a Northbound Trading Link (for investment in China A-Shares) by which certain compartments may be able to place orders to trade eligible shares listed on SSE.

Under the Stock Connect, overseas investors (including the compartments) may be allowed, subject to rules and regulations issued / amended from time to time, to trade certain China A-Shares listed on the SSE (the "**SSE Securities**") through the Northbound Trading Link. The SSE Securities include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A-Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except (i) those SSE-listed shares which are not traded in RMB and (ii) those SSE-listed shares which are included in the "risk alert board". The list of eligible securities may be changed subject to the review and approval by the relevant PRC regulators from time to time.

Further information about the Stock Connect is available online at the website: http://www.hkex.com.hk/eng/market/sec_tradinfra/chinaconnect/chinaconnect.htm.

In addition to the risks associated with investments in China and risks related to investments in RMB, investments through the Stock Connect are subject to additional risks, namely, restrictions on foreign investments, trading venues risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, settlement risk, custody risk, nominee arrangements in holding China A-Shares, tax and regulatory risks.

- **Differences in trading day.** The Stock Connect only operates on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the PRC market but Hong Kong investors (such as the compartments) cannot carry out any China A-Shares trading. The compartments may be subject to a risk of price fluctuations in China A-Shares during the time when the Stock Connect is not trading as a result.
- **Restrictions on selling imposed by front-end monitoring.** PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise SSE will reject the sell order

concerned. SEHK will carry out pre-trade checking on China A-Shares sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling.

- **Clearing settlement and custody risks.** The China A-Shares traded through Shanghai-Hong Kong Stock Connect are issued in scripless form, so investors, such as the relevant compartments, will not hold any physical China A-Shares. Hong Kong and overseas investors, such as the compartments, who have acquired SSE Securities through Northbound trading should maintain the SSE Securities with their brokers' or custodians' stock accounts with the Central Clearing and Settlement System operated by HKSCC for the clearing securities listed or traded on SEHK. Further information on the custody set-up relating to the Stock Connect is available upon request at the registered office of the Company.
- **Operational risk.** The Stock Connect provides a new channel for investors from Hong Kong and overseas, such as the compartments, to access the China stock market directly. The Stock Connect is premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in this programme subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house. It should be appreciated that the securities regimes and legal systems of the two markets differ significantly and in order for the trial program to operate, market participants may need to address issues arising from the differences on an on-going basis. Further, the "connectivity" in the Stock Connect programme requires routing of orders across the border. This requires the development of new information technology systems on the part of the SEHK and exchange participants (i.e. a new order routing system ("**China Stock Connect System**") to be set up by SEHK to which exchange participants need to connect). There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems failed to function properly, trading in both markets through the program could be disrupted. The relevant compartments' ability to access the China A-Shares market (and hence to pursue their investment strategy) will be adversely affected.
- **Nominee arrangements in holding China A-Shares.** HKSCC is the "nominee holder" of the SSE securities acquired by overseas investors (including the relevant compartments) through the Stock Connect. The CSRC Stock Connect rules expressly provide that investors such as the compartments enjoy the rights and benefits of the SSE securi-

ties acquired through the Stock Connect in accordance with applicable laws. However, the courts in the PRC may consider that any nominee or custodian as registered holder of SSE securities would have full ownership thereof, and that even if the concept of beneficial owner is recognised under PRC law those SSE securities would form part of the pool of assets of such entity available for distribution to creditors of such entities and/or that a beneficial owner may have no rights whatsoever in respect thereof. Consequently, the relevant compartments and the Depositary Bank cannot ensure that the compartments' ownership of these securities or title thereto is assured in all circumstances. Under the rules of the Central Clearing and Settlement System operated by HKSCC for the clearing of securities listed or traded on SEHK, HKSCC as nominee holder shall have no obligation to take any legal action or court proceeding to enforce any rights on behalf of the investors in respect of the SSE securities in the PRC or elsewhere. Therefore, although the relevant compartments' ownership may be ultimately recognised, these compartments may suffer difficulties or delays in enforcing their rights in China A-Shares. To the extent that HKSCC is deemed to be performing safekeeping functions with respect to assets held through it, it should be noted that the Depositary and the relevant compartments will have no legal relationship with HKSCC and no direct legal recourse against HKSCC in the event that a compartment suffers losses resulting from the performance or insolvency of HKSCC.

- **Investor compensation.** Investments of the relevant compartments through Northbound trading under the Stock Connect will not be covered by Hong Kong's Investor Compensation Fund. Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Since default matters in Northbound trading via the Stock Connect do not involve products listed or traded in SEHK or Hong Kong Futures Exchange Limited, they will not be covered by the Investor Compensation Fund. On the other hand, since the relevant compartments are carrying out Northbound trading through securities brokers in Hong Kong but not PRC brokers, therefore they are not protected by the China Securities Investor Protection in the PRC.
- **Trading costs.** In addition to paying trading fees and stamp duties in connection with China A-Share trading, the relevant compartments may be subject to portfolio fees, dividend tax and tax concerned with income arising from stock transfers.
- **Regulatory risk.** The CSRC Stock Connect rules are departmental regulations having

legal effect in the PRC. However, the application of such rules is untested, and there is no assurance that PRC courts will recognise such rules, e.g. in liquidation proceedings of PRC companies.

The Stock Connect is novel in nature, and is subject to regulations promulgated by regulatory authorities and implementation rules made by the stock exchanges in the PRC and Hong Kong. Further, new regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under the Stock Connect.

The regulations are untested so far and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that the Stock Connect will not be abolished. The relevant compartments which may invest in the PRC markets through Stock Connect may be adversely affected as a result of such changes.

- **Chinese currency exchange rate risk.** RMB can be traded onshore (in CNY in mainland China) and offshore (in CNH outside mainland China, mainly in Hong Kong). Onshore RMB (CNY) is not a free currency and is controlled by PRC authorities. The Chinese renminbi is traded both directly within China (code CNY) and outside the country, primarily in Hong Kong (code CNH). The currency in question is one and the same. The onshore renminbi (CNY), traded directly within China, is not freely convertible, and is subject to exchange controls and a number of requirements made by the Chinese government. The offshore renminbi (CNH), traded outside China, is free-floating and subject to the impact of private demand on the currency. It may be that the exchange rates traded between a currency and the CNY or CNH, or in “non-deliverable forward” transactions, are different. As a result, the Compartment may be exposed to greater currency exchange risks. Trading restrictions on CNY may limit currency hedging or result in ineffective hedges.

Product / Techniques risks

This category lists all risks that related to investment products or technics.

- **Securities lending risk.** The risk of loss if the borrower (i.e. the counterparty) of securities loaned by the Fund/Compartment defaults on payment, there is a risk of delayed recovery (which may limit the Fund/Compartment’s ability to meet its commitments) or risk of loss of rights on the collateral held. This risk, however, is mitigated by the solvency analysis of the borrower performed by the Pictet Group. The securities lending agreements are also subject to the risk of conflict of interest between the Fund and another entity in the Pictet Group, including the Agent providing services related to the securities lending agreements.
- **Repurchase and reverse repurchase agreement risk.** The risks associated with repurchase

and reverse repurchase transactions arise if the counterparty to the transaction defaults or goes bankrupt and the compartment experiences losses or delays in recovering its investments. Although repurchase transactions are by their nature fully collateralised, the compartment could incur a loss if the value of the securities sold has increased in value relative to the value of the cash or margin held by the compartment. In a reverse repurchase transaction, the compartment could incur a loss if the value of the purchased securities has decreased in value relative to the value of the cash or margin held by the compartment.

- **Sukuk risk.** Sukuk are mainly issued by issuers of emerging countries and the relevant compartments bear the related risks. Sukuk prices are mostly driven by the interest rate market and react like fixed-income investments to changes in the interest rate market. In addition, the issuers may not be able or willing to repay the principal and/or the return in accordance with the term scheduled due to external or political factors/events. Sukuk holders may also be affected by additional risks such as unilateral rescheduling of the payment calendar and limited legal recourses against the issuers in case of failure or delay in repayment. Sukuk issued by governmental or government-related entities bear additional risks linked to such issuers, including but not limited to political risk.
- **Financial derivative instruments risk.** Derivative instruments are contracts whose price or value depends on the value of one or multiple underlying assets or data as defined in standardized or tailored contracts. Assets or data may include but are not limited to equity, index, commodity and fixed-income prices, currency pair exchange rates, interest rates, weather conditions as well as, and when applicable, volatility or credit quality related to these assets or data. Derivative instruments can be very complex by nature and subject to valuation risk. Derivatives instruments can be exchange traded (ETD) or dealt over-the-counter (OTC). Depending on the nature of instruments, counterparty risk can accrue to one or both parties engaged in an OTC contract. A counterparty may not be willing or able to unwind a position in a derivative instrument and this inability to trade may cause the relevant compartments to be over-exposed to a counterparty among other things. Derivative instruments may have a considerable leverage effect, and due to their volatility, some instruments, such as warrants, present an above-average economic risk. The use of derivative instruments involves certain risks that could have a negative effect on the performance of the compartments. While the compartments expect that the returns on a synthetic security will generally reflect those of the related investment, as a result of the terms of the synthetic security, and the assumption of the credit risk of the applicable counterparty, a synthetic security may have, when applicable, a different expected return, a different (and potentially greater) probability of default, a different (and potentially greater) expected loss characteristic following a default, and

a different (and potentially lower) expected recovery following default. Upon default on a related investment, or in certain circumstances, default, or other actions by an issuer of a related investment, the terms of the relevant synthetic security may permit, or require the counterparty to satisfy its obligations under the synthetic security by delivering to the compartments the investment or an amount equal to the then current market value of the investment. In addition, upon maturity, default, acceleration, or any other termination (including a put or call) of the synthetic security, the terms of the synthetic security may permit, or require the counterparty to satisfy its obligations under the synthetic security by delivering to the compartments' securities, other than the related investment or an amount different to the then current market value of the investment. In addition to the credit risks associated with holding investments, with respect to some synthetic securities, the compartments will usually have a contractual relationship with the relevant counterparty only, and not with the underlying issuer of the relevant investment. The compartment generally will not have the right to directly enforce compliance by the issuer with the terms of the investment, or any rights of set-off against the issuer, nor have any voting rights with respect to the investment. The main types of derivative financial instruments include but are not limited to Futures, Forwards, Swaps, Options, on underlyings such as equity, interest rates, credit, foreign exchange rates and Commodity. Example of Derivatives include but are not limited to Total Return Swaps, Credit Default Swaps, Swaptions, Interest Rate Swaps, Variance Swaps, Volatility Swaps, Equity Options, Bond Options and Currency Options. Derivative financial products and instruments are defined in the section "Investment restrictions" of the prospectus.

- **Structured Finance Securities risk.** Structured finance securities include, but are not limited to, asset-backed securities, asset-backed commercial papers, credit-linked notes and portfolio credit-linked notes. Structured finance securities may sometimes have embedded derivatives. Structure finance securities may have different degrees of risk depending on the characteristics of the security and the risk of the underlying asset or pool of assets. In comparison to the underlying asset or pool of assets, structured finance securities may have greater liquidity, credit and market risk. Structured finance securities are defined in the section "Investment Restrictions" of the prospectus.
- **Contingent Convertibles instruments risk.** Certain Compartments may invest in Contingent Convertible Bonds (sometimes referred to as "CoCo Bonds"). Under the terms of a Contingent Convertible Bond, certain triggering events, including events under the control of the management of the Contingent Convertible Bond's issuer, could cause the permanent write-down to zero of principal investment and/or accrued interest, or a conversion to equity. These triggering events may include (i) a deduction in the issuing

bank's Core Tier 1/Common Equity Tier 1 (CT1/CET1) ratio (or other capital ratios) below a pre-set limit, (ii) a regulatory authority, at any time, making a subjective determination that an institution is "nonviable", i.e., a determination that the issuing bank requires public sector support in order to prevent the issuer from becoming insolvent, bankrupt, unable to pay a material part of its debts as they fall due or otherwise carry on its business and requiring or causing the conversion of the Contingent Convertibles Bonds into equity in circumstances that are beyond the control of the issuer or (iii) a national authority deciding to inject capital. The attention of investors investing in Compartments that are allowed to invest in Contingent Convertibles Bonds is drawn to the following risks linked to an investment in this type of instruments.

- **Trigger level risk.** Trigger levels differ and determine exposure to conversion risk depending on the CET1 distance to the trigger level. The conversion triggers are disclosed in the prospectus of each issuance. The amount of CET1 varies depending on the issuer while trigger levels differ depending on the specific terms of issuance. The trigger could be activated either through a material loss in capital as represented in the numerator or an increase in risk weighted assets as measured in the denominator.
- **Write-down, conversion and coupon cancellation risk.** All Contingent Convertible Bonds (Additional Tier 1 and Tier 2) are subject to conversion or write down when the issuing bank reaches the trigger level. Compartments could suffer losses related to write downs or be negatively affected by the unfavourable timing of conversion to equity. Additionally, coupon payments on Additional Tier 1 (AT1) Contingent Convertible Bonds are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time, in a going concern situation. The cancellation of coupon payments on AT1 Contingent Convertible Bonds does not amount to an event of default. Cancelled payments do not accumulate and are instead written off. This significantly increases uncertainty in the valuation of AT1 Contingent Convertible Bonds and may lead to mispricing of risk. AT1 Contingent Convertible Bonds holders may see their coupons cancelled while the issuer continues to pay dividends on its common equity and variable compensation to its workforce.
- **Capital structure inversion risk.** Contrary to classic capital hierarchy, holders of Contingent Convertible Bonds may suffer a loss of capital when equity holders do not. In certain scenarios, holders of Contingent Convertible Bonds will suffer losses ahead of equity holders, e.g., when a high trigger principal write-down Contingent Convertible Bond is activated. This cuts against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss.

This is less likely with a low trigger Contingent Convertible Bond when equity holders will already have suffered loss. Moreover, high trigger Tier 2 Contingent Convertible Bonds may suffer losses not at the point of gone concern but conceivably in advance of lower trigger AT1 Contingent Convertible Bonds and equity.

- **Call extension risk.** Most Contingent Convertible Bonds are issued as perpetual instruments, callable at pre-determined levels only with the approval of the competent authority. It cannot be assumed that the perpetual Contingent Convertible Bonds will be called on call date. Perpetual Contingent Convertible Bonds are a form of permanent capital. The investor may not receive return of principal if expected on call date or indeed at any date.
- **Unknown risk.** The structure of the instruments is innovative yet untested. In a stressed environment, when the underlying features of these instruments will be put to the test, it is uncertain how they will perform. In the event a single issuer activates a trigger or suspends coupons, potential price contagion and volatility to the entire asset class is possible. This risk may in turn be reinforced depending on the level of underlying instrument arbitrage. There exists uncertainty in the context of a supervisory decision establishing when the point of non-viability has been reached as well as in the context of a statutory bail-in set up under the new Bank Recovery and Resolution Directive.
- **Sector concentration risk.** Contingent Convertible Bonds are issued by banking/insurance institutions. If a Compartment invests significantly in Contingent Convertible Bonds its performance will depend to a greater extent on the overall condition of the financial services industry than a Compartment following a more diversified strategy.
- **Liquidity risk.** In certain circumstances finding a ready buyer for Contingent Convertible Bonds may be difficult and the seller may have to accept a significant discount to the expected value of the bond in order to sell it.
- **Valuation risk.** Contingent Convertible Bonds often have attractive yields which may be viewed as a complexity premium. Relative to more highly rated debt issues of the same issuer or similarly rated debt issues of other issuers, Contingent Convertible Bonds tend to compare favourably from a yield standpoint. The risk of conversion or, for AT1 Contingent Convertible Bonds, coupon cancellation, may not be fully reflected in the price of Contingent Convertible Bonds. The following factors are important in the valuation of Contingent Convertible bonds: the probability of a trigger being activated, the extent and probability of any losses upon trigger conversion (not only from write-downs

but also from unfavourably timed conversion to equity) and (for AT1 Contingent Convertible Bonds) the likelihood of cancellation of coupons. Individual regulatory requirements relating to the capital buffer, the issuers' future capital position, issuers' behaviour in relation to coupon payments on AT1 Contingent Convertible Bonds, and any risks of contagion are discretionary and/or difficult to estimate.

- **ABS and MBS risk.** Certain compartments may have exposure to a wide range of asset-backed securities (including asset pools in credit card loans, auto loans, residential and commercial mortgage loans, collateralised mortgage obligations and collateralised debt obligations), agency mortgage pass-through securities and covered bonds. The obligations associated with these securities may be subject to greater credit, liquidity and interest rate risk compared to other debt securities such as government issued bonds. ABS and MBS are securities that entitle the holders thereof to receive payments that are primarily dependent upon the cash flow arising from a specified pool of financial assets such as residential or commercial mortgages, motor vehicle loans or credit cards. ABS and MBS are often exposed to extension and prepayment risks that may have a substantial impact on the timing and size of the cash flows paid by the securities and may negatively impact the returns of the securities. The average life of each individual security may be affected by a large number of factors such as the existence and frequency of exercise of any optional redemption and mandatory prepayment, the prevailing level of interest rates, the actual default rate of the underlying assets, the timing of recoveries and the level of rotation in the underlying assets.
- **Depository receipts risk.** Depository receipts (ADRs, GDRs and EDRs) are instruments that represent shares in companies trading outside the markets in which the depository receipts are traded. Accordingly whilst the depository receipts are traded on Recognised Exchanges, there may be other risks associated with such instruments to consider- for example the shares underlying the instruments may be subject to political, inflationary, exchange rate or custody risks.
- **Real Estate Investment Trusts (REITs) risk.** There are special risk considerations associated with investing in the real estate industry securities such as Real Estate Investment Trusts (REIT) and the securities of companies principally engaged in the real estate industry. These risks include: the cyclical nature of real estate values, risks related to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, demographic trends and variations in rental income, changes in zoning laws, casualty or condemnation losses, environmental risks, regulatory limitations on rents, changes in neighbourhood values, related party risks, changes in the appeal of properties to tenants, increases in interest rates and other real estate capital market

influences. Generally, increases in interest rates will increase the costs of obtaining financing, which could directly and indirectly decrease the value of a Fund investing in the Real Estate Industry.

- **Risks linked to investments in other UCIs.** The investment of the Compartment in other UCIs or UCITS involves the following risks:
 - Fluctuations in the currency of the country in which that UCI/UCITS fund invests, or the regulations governing exchange control, the application of tax regulations of the various countries, including withholding, and changes in governmental, economic or monetary policies of the countries concerned,

can have an effect on the value of an investment represented by a UCI/UCITS in which the Compartment invests; in addition, it should be noted that the net asset value per share of the Compartment can fluctuate in the wake of the net asset value of the UCI/UCITS in question, in particular where the UCI/UCITS funds that invest mainly in equities are concerned, due to the fact that they present volatility greater than that of UCI/UCITS funds that invest in bonds and/or other liquid financial assets.

- Nonetheless, the risks linked to investments in other UCI/UCITS are limited to the loss of the investment made by the Compartment.

Annex 1: Fixed-income compartments

This annex will be updated to account for any change in an existing compartment or when a new compartment is created.

1. PICTET – EUR BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income instruments denominated in euros.
- Who seek a stable saving strategy and thus have some aversion to risk.
- Who have a medium-term investment horizon (at least 3 years).

Investment policy and objectives

This compartment invests at least two-thirds of its assets in a diversified portfolio of bonds and convertible bonds, within the limits allowed by the investment restrictions. These investments may be made in all markets while seeking capital growth in the reference currency.

A minimum of two-thirds of its total assets/ total wealth will be denominated in euros.

Investments in convertible bonds (including contingent convertible bonds (“CoCo Bonds”)) may not exceed 20% of the Compartment’s net assets.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest up to one-third of its assets in money market instruments.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- High yield investment risk
- Credit rating risk
- Interest rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 100%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

2. PICTET – USD GOVERNMENT BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income instruments denominated in US dollars.
- Who seek a stable saving strategy and thus have some aversion to risk.
- Who have a medium-term investment horizon (at least 3 years).

Investment policy and objectives

This compartment invests mainly in a diversified portfolio of bonds and other debt securities denominated in US dollars issued or guaranteed by national or local governments, or by supranational organisations, within the limits allowed by the investment restrictions.

The investments not denominated in US dollars will generally be hedged in order to avoid exposure to a currency other than the US dollar.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For efficient management and within the limits of the investment restrictions set out in the prospectus, the Compartment may use any type of financial derivative traded on a regulated and/or over-the-counter (OTC) market if obtained from a leading financial institution that specialises in these types of transactions. In particular, the Compartment may, among other investments but not exclusively, invest in warrants, futures, options, swaps (such as total return swaps, contracts for difference and credit default swaps) and futures contracts with underlying assets compliant with the 2010 Act and the Compartment's investment policy, as well as currencies (including non-deliverable forwards), interest rates, transferable securities, a basket of transferable securities, indexes, and undertakings for collective investment.

Specifically, the Compartment may conduct credit default swaps.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, i.e. deposits, money market instruments, and monetary-type UCITS and other UCIs (within the above-mentioned 10% limit).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Com-

partment. Please refer to the section “Risk Considerations” for a full description of these risks.

3. PICTET – SHORT-TERM MONEY MARKET CHF

The Compartment intends to meet the criteria of a “Short-Term Money Market fund” in accordance with the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high quality short-term fixed-income securities.
- Who are averse to risk.

Investment policy and objectives

The Compartment’s objective is to offer investors a high level of protection of their capital denominated in Swiss francs and to provide a return in line with money market rates.

To fulfil this objective, the Compartment invests in money market instruments that meet the criteria for money market instruments set in Directive 2009/65/EC or in deposits.

The Compartment limits its investments to securities whose residual maturity until the legal redemption date is less than or equal to 397 days.

The average weighted maturity of the portfolio cannot exceed 60 days and the average weighted lifetime cannot exceed 120 days.

The reference currency of the Compartment is not necessarily identical to the Compartment’s investment currencies. The related exchange rate risk will be systematically hedged against the Compartment’s reference currency.

The above-mentioned investments will be made in securities issued by issuers that have a minimum rating of A2 and/or P2 as defined by each of the leading rating agencies. When there is no official rating system, the Board of Directors will decide on acquiring transferable securities with identical quality criteria.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act. These UCITS and other UCIs must be short-term money-market-type UCITS and other UCIs only (as defined in the CESR/10-049 recommendations, as amended).

The Compartment may also invest, in accordance with its investment strategy, in structured products such as bonds whose returns may for example be linked to the performance of an index, transferable securities or money market instruments, or a basket of securities, or an undertaking for collective investment.

The Compartment may enter into repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments within the limits stipulated in the investment restrictions and by the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

6. PICTET – EUR CORPORATE BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high quality fixed-income securities denominated in EUR, issued by “investment grade” companies.
- Who have some aversion to risk.
- Who prefer a medium-term saving strategy (at least 3 years).

Investment policy and objectives

This compartment invests at least two-thirds of its assets without geographic limitation in a diversified portfolio of bonds and convertible bonds issued by private companies, within the limits allowed by the investment restrictions.

Investments in convertible bonds (including contingent convertible bonds (“CoCo Bonds”)) will not exceed 20% of the Compartment’s net assets.

Investments will offer significant liquidity and will be rated at least B3 by Moody’s and/or B- by Standard & Poor’s or, when there is no Moody’s or Standard & Poor’s rating, be of equivalent quality based on the manager’s analysis. Investments whose rating is less than Moody’s Baa3 or Standard & Poor’s BBB- or equivalent quality based on the manager’s analysis will not exceed 25% of the net assets of the Compartment, provided that the exposure to an issuer of that quality does not exceed 1.5% of the Compartment’s net assets.

Using credit risk analysis of companies and their sectors, the Compartment aims to generate a return greater than that of government bonds. Investments in government bonds, generally those issued by OECD member countries, may nevertheless be conducted when required by market conditions.

A minimum of two-thirds of its total assets/ total wealth will be denominated in euros.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest up to one-third of its assets in money market instruments.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an

index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

7. PICTET – GLOBAL EMERGING DEBT

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities from issuers located in emerging markets.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The Compartment's objective is to seek income and capital growth by investing its portfolio in bonds and money market instruments in Emerging Countries, within the limits allowed by the investment restrictions.

At least two-thirds of the total assets/ total wealth of the Compartment will be invested in bonds and other debt instruments issued or guaranteed by national or local governments of emerging countries and/or other issuers domiciled in emerging countries.

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

The Compartment may invest up to 30% of its net assets in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

Investments in money market instruments will not exceed one-third of the net assets of the Compartment.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

The Compartment may also invest in warrants on fixed-income transferable securities, but investments in such warrants may account for no more than 10% of the Compartment's net assets.

Investments may be denominated in any currencies.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Counterparty risk
- Collateral risk
- Settlement risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Asset liquidity risk
- Investment restriction risk

- Currency risk
- Interest rate risk
- Emerging market risk
- Political risk
- QFII risk
- RQFII risk
- Chinese currency exchange rate risk
- CIBM risk
- Risk of investing in Russia
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 275%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd

Sub-Manager: PAMS

8. PICTET – GLOBAL BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in an internationally-diversified portfolio that includes bonds and other fixed-income instruments.
- Who are willing to bear variations in market value and thus have a medium aversion to risk.

Investment policy and objectives

The objective of this compartment is to seek revenue and capital growth by investing primarily in any form of debt securities (including but not limited to government or corporate bonds, convertible bonds, inflation-indexed bonds, ABS and MBS) and money market instruments.

The Compartment will thus invest primarily as follows:

- directly in the securities/asset classes listed above; and/or
- in transferable securities (such as structured products, as described below) linked to performance or offering exposure to the securities/asset classes mentioned in the preceding paragraph; and/or
- via financial derivative instruments whose underliers are the securities mentioned in the preceding paragraph or assets offering exposure to these securities/asset classes.

The Compartment may invest in any country (including emerging countries), in any economic sector and in any currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

This Compartment may also invest in high-yield bonds including fixed-rate, variable-rate or convertible bonds, and up to a maximum of 20% in contingent convertible bonds (“CoCo Bonds”).

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

To achieve its investment objective and through the use of financial derivative instruments, the Compartment can hold a significant portion of liquid assets (such as deposits and money market instruments).

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference, credit default swaps) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract’s financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

If the manager deems it necessary and on an occasional basis (in circumstances other than those mentioned above), and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as deposits, money market instruments and money market UCITS and other UCIs (subject to a limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Currency risk
- Interest rate risk
- Emerging market risk
- Securities lending risk

- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 400%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

9. PICTET – EUR HIGH YIELD

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high-yield bonds denominated in euros.
- Who have medium to high risk tolerance.
- Who prefer a medium-term saving strategy (at least 5 years).

Investment policy and objectives

This compartment invests at least two-thirds of its total assets/ total wealth in a diversified portfolio of second quality high-yield bonds and convertible bonds with a minimum rating equivalent to B-, within the limits allowed by the investment restrictions. Second quality investments, compared to investments in securities from top quality debtors, may present an above-average yield but also carry greater risk with regard to the issuer's solvency.

The Compartment may also invest up to 10% of its net assets in securities pledged by assets, securities of issuers enjoying state support, issues securitised by bonds, issues securitised by loans and mortgages (including the securitisation of such debts).

The Compartment may also invest in warrants on fixed-income transferable securities, but investments in such warrants may account for no more than 10% of the Compartment's net assets.

Investments in convertible bonds (including contingent convertible bonds ("CoCo Bonds")) may not exceed 20% of the Compartment's net assets. Following the conversion of such bonds, the Compartment may hold up to 5% of its net assets in the shares issued.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

These investments may be made in all markets while seeking capital growth in the reference currency.

In addition, the Compartment may invest up to 20% of its net assets in emerging countries.

A minimum of two-thirds of the Compartment's assets will be denominated in euros.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Asset liquidity risk
- Interest rate risk
- Emerging market risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the Merrill Lynch Euro High Yield Constrained index €.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

10. PICTET – EUR SHORT MID-TERM BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in short and medium-term, high quality fixed-income securities denominated in euros.
- Who have some aversion to risk.
- Who prefer a medium-term saving strategy (at least 2 years).

Investment policy and objectives

The assets of the Compartment are invested according to the principle of risk spreading, with at least two-thirds of its assets held in short/medium-term bonds with a residual maturity for each investment of no more than 10 years (including convertible bonds, bonds with warrants and zero-coupon bonds) and in similar transferable securities denominated in euros. The average residual duration of the portfolio (the “duration”) cannot, however, exceed 3 years. These investments may be made in all markets while seeking capital growth in the reference currency.

A minimum of two-thirds of its total assets/total wealth will be denominated in euros.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware

that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Interest rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

12. PICTET – CHF BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income instruments denominated in Swiss francs.
- Who seek a stable saving strategy and thus have some aversion to risk.
- Who have a medium-term investment horizon (at least 3 years).

Investment policy and objectives

This compartment invests at least two-thirds of its assets in a diversified portfolio of bonds and a maximum of one-third of its assets in money market instruments and convertible bonds, with this last category not exceeding 20%, within the limits allowed by the investment restrictions. These investments may be made in all markets while seeking capital growth in the reference currency.

A minimum of two-thirds of its total assets/total wealth will be denominated in Swiss francs and the investments not denominated in Swiss francs will generally be hedged in order to avoid exposure to a currency other than the Swiss franc.

Investments in convertible bonds may not exceed 20% of the Compartment's net assets.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

13. PICTET – EUR GOVERNMENT BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income instruments denominated in euros.
- Who seek a stable saving strategy and thus have some aversion to risk.
- Who have a medium-term investment horizon (at least 3 years).

Investment policy and objectives

This compartment invests mainly in a diversified portfolio of bonds and other debt securities denominated in euros issued or guaranteed by national or local governments, or by supranational organisations, within the limits allowed by the investment restrictions.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For efficient management and within the limits of the investment restrictions set out in the prospectus, the Compartment may use any type of financial derivative traded on a regulated and/or over-the-counter (OTC) market if obtained from a leading financial institution that specialises in these types of transactions. In particular, the Compartment may, among other investments but not exclusively, invest in warrants, futures, options, swaps (such as total return swaps, contracts for difference and credit default swaps) and futures contracts with underlying assets compliant with the 2010 Act and the Compartment's investment policy, as well as currencies (including non-deliverable forwards), interest rates, transferable securities, a basket of transferable securities, indexes, and undertakings for collective investment.

Specifically, the Compartment may conduct credit default swaps.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, i.e. deposits, money market instruments, and monetary-type UCITS and other UCIs (within the above-mentioned 10% limit).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

14. PICTET – EMERGING LOCAL CURRENCY DEBT

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities from issuers located in emerging markets and/or by holding money market instruments of emerging countries.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The Compartment's objective is to seek income and capital growth by investing a minimum of two-thirds of its total assets/total wealth in a diversified portfolio of bonds and other debt securities linked to local emerging debt.

The Compartment may invest up to 30% of its net assets in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

The Compartment may also invest in warrants on transferable securities and indexes and in subscription warrants and may use currency transactions for a purpose other than hedging.

The Compartment may also invest up to 25% of its net assets, not including the investments in Non-Deliverable Forwards described below, in structured products, including in particular credit-linked notes and bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment.

The investments are primarily denominated in the local currencies of the emerging countries. In all cases, the Compartment's exposure to these currencies will be at least two-thirds, either by direct or indirect investment or by authorised derivative instruments.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including

other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The total amount of commitments resulting from currency transactions made for purposes of speculation and hedging may not exceed 100% of the Compartment's net assets. These transactions will be conducted as Non-Deliverable Forwards, forward contracts or other instruments such as options or currency warrants. To achieve this, the Compartment may enter into over-the-counter agreements with leading financial institutions.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

Pursuant to its investment policy, the Compartment may hold a significant portion of liquid assets and money market instruments that are traded regularly and whose residual maturity does not exceed 12 months. In addition, if the manager deems that it is in the best interest of the shareholders, the Compartment may also hold up to 33% of its net assets in liquid assets and money market instruments that are regularly traded and whose residual maturity does not exceed 12 months.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures contracts on financial instruments, options on such contracts as well as over-the-counter swaps on various types of financial instruments and Total Return Swaps.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

Risk management method: absolute value-at-risk approach.

Expected leverage: 350%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

15. PICTET – ASIAN LOCAL CURRENCY DEBT

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities from issuers located in Asian emerging markets and/or by holding money market instruments in the Asian emerging countries.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The Compartment's objective is to seek income and capital growth by investing a minimum of two-thirds of its total assets/ total wealth in a diversified portfolio of bonds and other debt securities linked to Asian local emerging debt.

The Compartment may invest up to 49% of its net assets in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Asian emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Hong Kong, Singapore, the Philippines, Thailand, South Korea, Taiwan, Indonesia, India, China, and Malaysia.

The Compartment may also invest in warrants on transferable securities and indexes and in subscription warrants and may use currency transactions for a purpose other than hedging.

The Compartment may also invest up to 20% of its assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.

The Compartment may also invest up to 25% of its net assets, not including the investments in Non-Deliverable Forwards described below, in structured products, including in particular credit-linked notes and bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment.

The investments are primarily denominated in the local currencies of the Asian emerging countries. In all cases, the Compartment's exposure to these currencies will be at least two-thirds, either by direct or indirect investment or by authorised derivative instruments.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The total amount of commitments resulting from currency transactions made for purposes of speculation and hedging may not exceed 100% of the Compartment's net assets. These transactions will be conducted as Non-Deliverable Forwards, forward contracts or other instruments such as options or currency warrants. To achieve this, the Compartment may enter into over-the-counter agreements with leading financial institutions.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

Pursuant to its investment policy, the Compartment may hold a significant portion of liquid assets and money market instruments that are traded regularly and whose residual maturity does not exceed 12 months. In addition, if the manager deems that it is in the best interest of the shareholders, the Compartment may also hold up to 33% of its net assets in liquid assets and money market instruments that are regularly traded and whose residual maturity does not exceed 12 months.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures contracts on financial instruments, options on such contracts as well as over-the-counter swaps on various types of financial instruments and Total Return Swaps.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange may not exceed 10% of the Compartment's net assets.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

16. PICTET – GLOBAL EMERGING CURRENCIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who seek exposure to variations in the currencies of emerging countries.
- Who are risk tolerant.

Investment policy and objectives

The Compartment's objective is to seek income and capital growth by investing a minimum of two-thirds of its total assets/total wealth in a diversified portfolio of currencies and of any kind of financial derivative instruments (traded on a regulated market or over the counter) on currencies of emerging countries. These derivative techniques and instruments will be used for efficient management, within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures, forward exchange contracts, non-deliverable forward transactions, swaps (such as but not limited to Credit Default Swaps and Total Return Swaps).

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

The Compartment may invest in warrants, and to a lesser extent, in options.

The Compartment may invest in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in

the assets listed above are also included in the 10% limit.

The Compartment may also invest up to 25% of its net assets, not including the investments in Non-Deliverable Forwards described below, in structured products, including in particular credit-linked notes and bonds or other transferable securities whose returns are linked to changes in currencies, an index, transferable securities or a basket of transferable securities, or currencies or an undertaking for collective investment.

The investments are primarily denominated in the local currencies of the emerging countries. In all cases, the Compartment's exposure to these currencies will be at least two-thirds, either by direct or indirect investment or by authorised derivative instruments.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

These transactions will be in particular conducted by means of Non-Deliverable Forwards.

A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

In pursuit of its investment policy (direct and indirect investments), the Compartment may invest up to 100% in money market instruments, monetary funds (up to 10%), floating-rate bonds whose residual maturity on individual investments does not exceed 12 months or whose return is subject to regular adjustments, at least every 397 days, in conformity with the conditions of the monetary market, or whose risk profile, in particular regarding credit risk and interest rate risk, corresponds to that for instruments that have a maturity or residual maturity in conformity with those mentioned above, and any other kind of debt instrument provided that these are issued or guaranteed by a government or public corporation in the OECD or by international public organisations, including Switzerland or a Member State of the European Union.

The Compartment may also hold liquidities on an ancillary basis. The Compartment may however, in order to reduce exposure to market risk, temporarily hold up to 100% of its net assets in liquidities.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

17. PICTET – SHORT-TERM MONEY MARKET JPY

The Compartment intends to meet the criteria of a “Short-Term Money Market fund” in accordance with the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high quality short-term fixed-income securities.
- Who are averse to risk.

Investment policy and objectives

The Compartment’s objective is to offer investors a high level of protection of their capital denominated in Japanese yen and to provide a return in line with money market rates.

To fulfil this objective, the Compartment invests in money market instruments that meet the criteria for money market instruments set in Directive 2009/65/EC or in deposits.

The Compartment limits its investments to securities whose residual maturity until the legal redemption date is less than or equal to 397 days.

The average weighted maturity of the portfolio cannot exceed 60 days and the average weighted lifetime cannot exceed 120 days.

The reference currency of the Compartment is not necessarily identical to the Compartment’s investment currencies. The related exchange rate risk will be systematically hedged against the Compartment’s reference currency.

The above-mentioned investments will be made in securities issued by issuers that have a minimum rating of A2 and/or P2 as defined by each of the leading rating agencies. When there is no official rating system, the Board of Directors will decide on acquiring transferable securities with identical quality criteria.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act. These UCITS and other UCIs must be short-term money-market-type UCITS and other UCIs only (as defined in the CESR/10-049 recommendations, as amended).

The Compartment may also invest, in accordance with its investment strategy, in structured products such as bonds whose returns may for example be linked to the performance of an index, transferable securities or money market instruments, or a basket of securities, or an undertaking for collective investment.

The Compartment may enter into repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments within the limits stipulated in the investment restrictions and by the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Interest rate risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structure Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 60%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

18. PICTET – LATIN AMERICAN LOCAL CURRENCY DEBT

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities from issuers located in emerging countries of Latin America and/or by holding money market instruments in emerging countries in Latin America.
- Who are risk tolerant.

Investment policy and objectives

The Compartment's objective is to seek income and capital growth by investing a minimum of two-thirds of its total assets/ total wealth in a diversified portfolio of bonds and other debt securities linked to Latin American local emerging debt.

Emerging countries in Latin America are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Chile, Brazil, Argentina, Colombia, Peru, Belize, Bolivia, Costa Rica, Cuba, the Dominican Republic, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Nicaragua, Paraguay, Panama, Puerto Rico, Suriname, Uruguay and Venezuela.

Within the limits of point 7 of § 3 of the investment restrictions, the Compartment is authorised to invest up to 100% of its assets in securities issued by any Latin American country, even if it is not an OECD Member State.

The Compartment may also invest in warrants on transferable securities and indexes and in subscription warrants and may use currency transactions for a purpose other than hedging.

The Compartment may also invest up to 25% of its net assets, not including the investments in Non-Deliverable Forwards described below, in structured products, including in particular credit-linked notes and bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment.

The investments are primarily denominated in the local currencies of the emerging countries in Latin America. In all cases, the Compartment's exposure to these currencies will be at least two-thirds, either by direct or indirect investment or by authorised derivative instruments.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The total amount of commitments resulting from currency transactions made for purposes of speculation and hedging may not exceed 100% of the Compartment's net assets. These transactions will be conducted as Non-Deliverable Forwards, forward contracts or other instruments such as options or currency warrants. To achieve this, the Compartment may enter into over-the-counter agreements with leading financial institutions.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

Pursuant to its investment policy, the Compartment may hold a significant portion of liquid assets and money market instruments that are traded regularly and whose residual maturity does not exceed 12 months. In addition, if the manager deems that it is in the best interest of the shareholders, the Compartment may also hold up to 33% of its net assets in liquid assets and money market instruments that are regularly traded and whose residual maturity does not exceed 12 months.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures contracts on financial instruments, options on such contracts as well as over-the-counter swaps on various types of financial instruments and Total Return Swaps.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

Risk profile

19. PICTET – SOVEREIGN SHORT-TERM MONEY MARKET USD

The Compartment intends to meet the criteria of a “Short-Term Money Market fund” in accordance with the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in short-term fixed-income securities issued or guaranteed by a government or a public corporation in the OECD or in Singapore or by an international public organisation that includes Switzerland or a Member State of the European Union among its members.
- Who are averse to risk.

Investment policy and objectives

The investment objective of the Compartment is to offer investors the opportunity to invest in a vehicle that preserves capital and stability of value while obtaining a return in line with money market rates, having a high level of liquidity and observing a policy of risk spreading.

The Compartment invests its assets in deposits or in money market instruments that meet the criteria for money market instruments set in Directive 2009/65/EC as long as:

- they are issued or guaranteed by a government or public corporation in the OECD or in Singapore or by an international public organisation that includes Switzerland or a Member State of the European Union among its members;
- they have a minimum rating equivalent to A2 and/or P2, as defined by each of the recognised rating agencies. When there is no official rating system, the Board of Directors will decide on acquiring securities with identical quality criteria;
- their residual maturity until the legal redemption date is less than or equal to 397 days.

The average weighted maturity of the portfolio cannot exceed 60 days and the average weighted lifetime cannot exceed 120 days.

The reference currency of the Compartment is not necessarily identical to the Compartment's investment currencies. The related exchange rate risk will be systematically hedged against the Compartment's reference currency.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act. These UCITS and other UCIs must be short-term money-market-type UCITS and other UCIs only (as defined in the CESR/10-049 recommendations, as amended).

The Compartment may also, in accordance with its investment strategy, invest in structured products such as bonds whose returns may for example be linked to the performance of an index, transferable securities or money market instruments, or a basket

of securities, or an undertaking for collective investment.

The Compartment may enter into repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments within the limits stipulated in the investment restrictions and by the recommendations of the ESMA (formerly the CESR) referenced CESR/10-049.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

21. PICTET – US HIGH YIELD

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high-yield bonds denominated in USD.
- Who have medium to high risk tolerance.

Investment policy and objectives

This compartment invests primarily in a diversified portfolio of high-yield bonds including fixed-rate, variable-rate and convertible bonds.

The Compartment may also invest in asset-backed securities (bonds whose real assets guarantee the investment), in debt securitisations (such as but not exclusively ABS and MBS) as well as other debt securities in compliance with Article 2 of the Luxembourg regulations of 8 February 2008.

Investment in ABS and MBS will represent a maximum of 10% of the Compartment's net assets.

Likewise, the Compartment may invest up to a maximum of 10% of its net assets in banking loans that are considered (with respect to Articles 2 or 3 and 4 of the Luxembourg regulations of 8 February 2008) as transferable securities or money market instruments listed or traded on regulated markets, within the limits stipulated by the investment restrictions.

Investments in convertible bonds (including contingent convertible bonds ("CoCo Bonds")) may not exceed 20% of the Compartment's net assets.

In seeking capital appreciation in the reference currency, these investments may be made on all markets, but mainly in securities traded on the US domestic market or in securities of issuers residing in the US and/or whose main business and/or principal registered office are located in the US.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

The Compartment's assets will be mainly denominated in American dollars. The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, including deposits, money market instruments, and money market investment funds (within the 10% limit mentioned below).

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including

other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are or that offer exposure to equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may use derivative financial techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Counterparty risk
- Collateral risk
- Settlement risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Asset liquidity risk
- Interest rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the Barclays Capital U.S. High-Yield 2% Issuer Capped Bond Index Tr.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

22. PICTET – EUR CORPORATE BONDS EX FINANCIAL

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities denominated in euros, issued by investment grade companies, excluding the financial sector.
- Who have some aversion to risk.

Investment policy and objectives

This compartment invests principally in a diversified portfolio of bonds and other debt securities, and convertible bonds denominated in euros issued by private companies, excluding the financial sector.

The investment universe is not limited to a specific geographic region.

Investments in convertible bonds will not exceed 20% of the Compartment's net assets.

The investments must offer a high level of liquidity and be rated at least B3 by Moody's and/or B- by Standard & Poor's or, in the absence of a rating by Moody's or Standard & Poor's, be of equivalent quality according to the manager's analysis. Investments whose rating is less than Moody's Baa3 or Standard & Poor's BBB- or equivalent quality based on the manager's analysis will not exceed 25% of the net assets of the Compartment, provided that the exposure to an issuer of that quality does not exceed 1.5% of the Compartment's net assets.

Using credit risk analysis of companies and their sectors, the Compartment aims to generate a return greater than that of government bonds. Investments in government bonds, generally those issued by OECD member countries, may nevertheless be conducted when required by market conditions.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, including deposits, money market instruments, and money market type UCITS and other UCIs (within the above-mentioned 10% limit).

The Compartment may also invest in structured products, such as, in particular, credit-linked notes, certificates or any other transferable security whose returns are linked to, among others, an index that adheres to the procedures stipulated in Article 9 of the Luxembourg regulations of 8 February 2008 (including indexes on commodities, precious metals, volatility, etc.), currencies, interest rates, transferable securities, a basket of transferable securities, or an undertaking for collective investment, in compliance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Interest rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the Barclays Capital Euro-Aggregate Corporate Ex-financial index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM S.A., PAM Ltd

Reference currency of the Compartment: EUR

Cut-off time for receipt of orders

Subscription

By 3:00 pm on the Banking Day preceding the NAV calculation date.

Redemption

By 3:00 pm on the Banking Day preceding the NAV calculation date.

Switch

23. PICTET – EUR SHORT TERM HIGH YIELD

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in high-yield bonds denominated in euros.
- Who have medium to high risk aversion.
- Who prefer a medium-term saving strategy (at least 5 years).

Investment policy and objectives

This Compartment invests principally in a diversified portfolio of bonds and other

- high yield, second quality debt securities,
- denominated in EUR or in other currencies as long as the securities are generally hedged in EUR, and
- have a minimum rating, at the time of acquisition, equivalent to “B-”, as defined by Standard & Poor’s or an equivalent rating from other recognised rating agencies. When there is no official rating system, the Board of Directors will decide on acquiring transferable securities with identical quality criteria.

These investments will have a short/medium duration. The residual maturity for each investment will not exceed six years. The average residual duration of the portfolio (the “duration”) cannot, however, exceed three years.

The choice of investments will not be limited to a particular geographic sector neither sector of economic activity. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector.

The Compartment may also invest up to 10% of its net assets in securities pledged by assets, securities of issuers enjoying government support, issues securitised by bonds, and issues securitised by loans and mortgages (including the securitisation of such debts).

Investments in convertible bonds (including contingent convertible bonds (“CoCo Bonds”)) may not exceed 20% of the Compartment’s net assets.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

These investments may be made in all markets while seeking capital growth in the reference currency.

In addition, the Compartment may invest up to 20% of its net assets in emerging countries.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

Specifically, the Compartment may conduct credit default swaps.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, financial derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are, or offer exposure to, equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk

- High Yield investment risk
- Asset liquidity risk
- Interest rate risk
- Emerging market risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the Merrill Lynch Euro High Yield Ex-Financials, BB-B, 1-3y constrained (3%) index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

24. PICTET – GLOBAL BONDS FUNDAMENTAL

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities from issuers located in developed and emerging economies. These investments will be denominated in one of the main currencies or in a currency of an emerging country.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The objective of this compartment is to seek revenue and capital growth.

This Compartment invests mainly in a diversified portfolio of bonds and other debt securities issued or guaranteed by national or local governments in developed or emerging countries, or by supranational organisations, without limitation regarding the choice of the currency in which the securities are denominated.

The Compartment may invest in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Compartment's exposure to certain local currencies will be obtained by direct or indirect investments, such as via financial derivative instruments.

The manager will select the securities based on a fundamental approach that takes account of the main macro-economic indicators (Gross domestic product, population, debt, etc.).

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia and Russia.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transfe-

rable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter "Investment restrictions" of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

The total amount of commitments resulting from currency transactions made for purposes of speculation and hedging may not exceed 100% of the Compartment's net assets. These transactions will be conducted as Non-Deliverable Forwards, forward contracts or other instruments such as options or currency warrants. To achieve this, the Compartment may enter into over-the-counter agreements with leading financial institutions.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, financial derivative instruments (including warrants) and/or structured products (in particular delta-ad-

justed convertible bonds) whose underliers are, or offer exposure, to equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Asset liquidity risk
- Currency risk
- Interest rate risk
- Emerging market risk
- Risk of investing in the PRC
- QFII risk
- RQFII risk
- Chinese currency exchange rate risk
- CIBM risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the Citigroup WGBI index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

25. PICTET – EMERGING CORPORATE BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in debt securities issued by companies whose registered headquarters are located in, or that conduct a majority of their business in, an emerging country.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The objective of this compartment is to seek revenue and capital growth by investing primarily in a diversified portfolio of bonds and debt securities issued or guaranteed by companies organised under private or public law (such as public establishments and/or companies that are majority held by the State or its local authorities) and whose registered headquarters are located in, or that conduct the majority of their business in, an emerging country.

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

The choice of investments will not be limited to a particular geographic sector or sector of economic activity. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

Investments may be denominated in any currencies.

The Compartment may also invest up to 20% of its assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or similar securities, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) and/or undertakings for collective investment

(UCIs) whose underlying assets are, or offer exposure to, shares or similar securities.

The Compartment may also invest up to 20% of its net assets in contingent convertible bonds ("CoCo Bonds").

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

The Compartment may also invest in structured products such as bonds or other transferable securities whose returns could be, for example, related to the performance of an index in accordance with Article 9 of the Luxembourg regulations of 8 February 2008, transferable securities or a basket of transferable securities, or an undertaking for collective investment in accordance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may conduct Non-Deliverable Forward. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract's financial result in the strong currency.

The Compartment may use derivative techniques and instruments for hedging or for efficient portfolio management within the limits stipulated in the investment restrictions.

Specifically, the Compartment may conduct credit default swaps.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Counterparty risk
- Collateral risk
- Settlement risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Asset liquidity risk
- Investment restriction risk

- Currency risk
- Interest rate risk
- Emerging market risk
- Political risk
- Risk of investing in Russia
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Sukuk risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the JP Morgan CEMBI Broad Diversified Index.

Expected leverage: 100%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

26. PICTET – EUR SHORT TERM CORPORATE BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the EUR-denominated corporate bonds market.
- Who have some aversion to risk.
- Who prefer a medium-term saving strategy (at least 3 years).

Investment policy and objectives

This compartment invests principally in a diversified portfolio of bonds and other debt securities (including money market instruments):

- denominated in EUR or in other currencies as long as the securities are generally hedged in EUR; and
- investment-grade companies; and/or
- having a minimum rating, at the time of acquisition, equivalent to BBB- as defined by the Standard & Poor's rating agency or an equivalent rating from other recognised rating agencies. When there is no official rating system, the Board of Directors will decide on acquiring transferable securities with identical quality criteria.

The Compartment will not invest, at the time of acquisition, in bonds that have a rating of less than B- as defined by the Standard & Poor's rating agency or an equivalent rating from other recognised rating agencies.

Investments in bonds with a rating of less than BBB- (that is, non-investment grade) as defined by the Standard & Poor's rating agency (or an equivalent rating from other recognised rating agencies) cannot exceed 25% of the net assets of the Compartment.

If the credit rating of a security held by the Compartment deteriorates to non-investment grade, the security may be kept or sold, at the Manager's discretion, in the best interests of the shareholders.

If the credit ratings differ among several rating agencies, the highest rating will be taken into account.

Each direct investment in a debt security will be for a short/medium duration. The residual maturity for each investment should not exceed 6 years. The average residual duration of the portfolio (the "duration") cannot, however, exceed three years.

Apart from exposure to euros, the Compartment may invest in any other currency, any geographic region and any business sector. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector.

The Compartment may also invest up to 10% of its net assets in asset-backed securities, securitised bond issues, securitised loan and mortgage issues (including the securitisation of such debts).

Investments in convertible bonds (including contingent convertible bonds ("CoCo Bonds")) will not exceed 20% of the Compartment's net assets. In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

These investments may be made in all markets while seeking capital growth in the reference currency.

In addition, the Compartment may invest up to 10% of its net assets in emerging countries.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns may for example be linked to the performance of an index, transferable securities or a basket of transferable securities, or a UCI.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter "Investment restrictions" of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

Specifically, the Compartment may conduct credit default swaps.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, financial derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are or that offer exposure to equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

27. PICTET – SHORT TERM EMERGING CORPORATE BONDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the debt securities of issuers located in emerging markets or which offer exposure to emerging countries.
- Who have medium to high risk tolerance.

Investment policy and objectives

The objective of this compartment is to seek revenue and capital growth by investing primarily in a portfolio of bonds and other debt securities (including money market instruments) of any kind (including convertible bonds) issued or guaranteed by private or public companies (such as public institutions and/or companies that are majority held by a state or its local authorities) that are headquartered or conduct the majority of their business in an emerging country.

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

Each direct investment in a debt security will be for a short/medium duration. The residual duration for each investment will not exceed six years. The average residual duration of the portfolio (the “duration”) cannot, however, exceed three years.

This compartment may also invest in high-yield bonds including fixed-rate, variable-rate or convertible bonds. The Compartment may invest up to 10% of its net assets in bonds from issuers “in distress”. Bonds from issuers in distress are defined as those that have been given a very speculative long-term rating (Caa1/CCC+ or any other lower rating) by at least one of the main agencies (Moody’s and S&P). If the issuer has not been given a credit rating by a recognised agency, the Fund’s Board of Directors may decide whether the instrument possesses the equivalent quality criteria. The Compartment may invest up to a maximum of 10% of its net assets in banking loans that are considered (under Articles 3 and 4 of the Luxembourg regulations of 8 February 2008) as money market instruments listed or traded on regulated markets, within the limits stipulated by the investment restrictions.

The Compartment may also invest up to 20% of its assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.

Except for geographic allocation, the choice of investments will not be limited to a particular sector

of economic activity or a specific currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

Investments in unlisted securities and investments in Russia other than on the MICEX-RTS exchange will not exceed 10% of the Compartment’s net assets.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its net assets in shares or similar securities, derivative instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) and/or UCIs for which the underlying asset is stocks or which offer exposure to shares or similar securities.

The Compartment may also invest in structured products such as bonds or other transferable securities whose returns could be, for example, related to the performance of an index in accordance with Article 9 of the Luxembourg regulations of 8 February 2008, transferable securities or a basket of transferable securities, or an undertaking for collective investment in accordance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for hedging or for efficient portfolio management within the limits stipulated in the investment restrictions.

In particular, the Compartment may, among other investments but not exclusively, invest in warrants, futures, options, swaps (such as total return swaps, contracts for difference and credit default swaps) and forward contracts with underlying assets compliant with the 2010 Act and the Compartment’s investment policy, among others, currencies (including Non-Deliverable Forwards), interest rates, securities, a basket of securities, and indexes.

The Compartment may conduct Non-Deliverable Forwards. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract’s financial result in the strong currency.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

28. PICTET – CHINESE LOCAL CURRENCY DEBT

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in fixed-income securities, money-market instruments and deposits issued in Renminbi.
- Who are risk tolerant.
- Who prefer a medium-term saving strategy (at least 4 years).

Investment policy and objectives

The objective of this compartment is to seek revenue and capital growth by primarily investing in:

- bonds and other debt securities denominated in Renminbi (RMB) (including but not limited to bonds issued or guaranteed by governments or companies),
- deposits, and
- money-market instruments denominated in Renminbi (RMB).

Investment in debt securities and money-market instruments in RMB may be conducted in CNY (onshore Renminbi, the Chinese currency only used in mainland China), or in CNH (offshore Renminbi, generally available in Hong Kong). Exposure to non-RMB denominated assets may be hedged to help maintain a currency exposure in RMB. The Compartment will be primarily exposed to CNY and/or CNH, directly or indirectly.

Within the limits of point 7 of § 3 of the investment restrictions, the Compartment is authorised to invest up to 100% of its assets in transferable securities and money-market instruments issued or guaranteed by the Chinese state, and/or its regional public authorities.

In order to achieve its investment objective, investments may be focused on one currency and/or one economic sector and/or a sole country (China).

Investments in China may be performed, inter alia, on the China Interbank Bond Market (“CIBM”).

The Compartment may invest in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group.

The Compartment may also invest up to 10% of its net assets, not including the investments in non-deliverable forwards described below, in structured products, including in particular credit linked notes and bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including

other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in shares or any other similar security, derivative financial instruments (including warrants) and/or structured products (in particular delta-adjusted convertible bonds) whose underliers are or that offer exposure to equities or similar securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the above-listed assets are also included in the 10% limit.

The Compartment may enter into repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

The total amount of commitments resulting from currency transactions made for purposes of speculation and hedging may not exceed 100% of the Compartment’s net assets. These transactions will be conducted by means of non-deliverable forwards, forward contracts or other instruments such as options or currency warrants. To achieve this, the Compartment may enter into over-the-counter agreements with leading financial institutions.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract’s financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA master agreement.

The Compartment may conduct credit default swap transactions for up to 100% of its net assets.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money-market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

If the Compartment were to reach its maximum size and could thus no longer be effectively managed, the Board of Directors reserves the right to temporarily limit subscriptions to the Compartment.

For assets invested in local Chinese securities pursuant to an RQFII license (restricted to open-ended funds), the local regulator requests that the RQFII name be used to trade securities and other accounts on behalf of the Fund. Securities will thus be registered in the name of "Pictet Asset Management Limited - Pictet-Chinese Local Currency Debt", with the Compartment recognised as the beneficial owner of the securities. The Depositary Bank must ensure that the sub-custodian bank has taken the appropriate steps to ensure proper custody of the Compartment's assets, including the keeping of records that clearly show that the Compartment's assets are held in its name, and are held separately from the other assets of the sub-custodian bank. Investors' attention is drawn to the fact that the Compartment may incur losses resulting from the acts or omissions of the sub-custodian bank when performing or settling transactions or when transferring

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

(1) USD 1,000,000 converted to EUR or RMB on the day of the NAV calculation.

29. PICTET – EMERGING DEBT BLEND

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in emerging debt securities denominated in local currencies and hard currencies.
- Who are risk tolerant.

Investment policy and objectives

The Compartment's objective is to seek revenue and capital growth by investing primarily in:

- a diversified portfolio of bonds and other debt securities (including rule 144A Securities, non-investment grade debt securities and money market instruments) denominated either in local currencies or hard currencies,
- issued or guaranteed by sovereign issuers of emerging countries (including Mainland China) and/or corporate issuers whose registered headquarters are located in, or that conduct the majority of their business in an emerging country.

The Compartment may invest in bonds and other debt securities denominated in RMB through (i) the QFII quota granted to the Managers (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to the Managers.

Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Compartment may also invest a substantial part of its assets in financial derivative instruments such as but not limited to Credit Default Swaps.

Except the geographical exposure, the choice of investments will neither be limited by an economic sector, credit ratings, nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single emerging country (or some emerging countries) and/or in a single currency and/or in a single economic sector.

On an ancillary basis, the Compartment may invest in any other type of eligible assets, such as debt securities other than those above-mentioned, cash, structured products without embedded derivatives, credit-linked notes and bonds or other transferable securities whose returns are linked to the performance of (i) an index, (ii) transferable securities or (iii) a basket of transferable securities, or (iv) an undertaking for collective investment.

The underliers of the structured products in which the Compartment will invest will be in line with the grand-ducal regulation dated 8 February 2008 and the Law of 2010.

The Compartment will however respect the following limits:

- The Compartment may be exposed to distressed and defaulted securities up to 10% of its net assets.

- The Compartment may also invest up to 10% of its net assets in contingent convertible bonds and up to 10% of its net assets in convertible bonds.
- The Compartment may invest up to 20% of its net assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.
- The Compartment may invest up to 10% of its net assets in UCITS and other UCIs in compliance with the provisions of Article 41.1.E of the 2010 Act, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.
- The Compartment will not invest more than 10% of its net assets in shares, or in derivative instruments (including warrants) whose underliers are, or offer exposure to, equities and which are in line with the grand-ducal regulation dated 8 February 2008 and the Law of 2010. Those investments may not be used to elude the investment policy of the Compartment.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% above-mentioned limit.

- The compartment may also invest up to 10% of its net assets in asset-backed securities (bonds whose real assets guarantee the investment) and in debt securitisations (such as but not exclusively ABS and MBS) in compliance with article 2 of the grand-ducal regulation dated 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for hedging and/or efficient portfolio management within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures, forward exchange contracts, non-deliverable forward transactions, swaps (such as but not limited to Credit Default Swaps and Total Return Swaps).

However, if the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits and money market UCIs (within the limit of 10% for UCIs).

Risk profile

The risks listed below are the most relevant risks of the compartment. Investors should be aware that other risks may also be relevant to the compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

(1) USD 1,000,000 converted to EUR, GBP, CHF or JPY on the NAV calculation date.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

Annex 2: Equity compartments

This annex will be updated to account for any change in an existing compartment or when a new compartment is created.

30. PICTET – EUROPEAN EQUITY SELECTION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in Europe and/or whose main business is conducted in Europe.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This compartment's objective is to enable investors to benefit from growth in the European equities market.

This compartment will also invest in securities traded on the Russian "RTS Stock Exchange".

The Compartment will invest a minimum of two-thirds of its total assets/ total wealth in equities issued by companies that are headquartered in Europe or conduct the majority of their business in Europe.

The portfolio will be composed of a limited selection of securities that, in the opinion of the manager, have the most favourable outlook.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and, to a lesser extent, warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transfe-

rable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI AC Europe index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

31. PICTET – SMALL CAP EUROPE

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in Europe and/or whose main business is conducted in Europe.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment will invest at least two-thirds of its total assets/ total wealth in equities issued by small-capitalisation companies that are headquartered in and/or conduct their main business in Europe.

European small-capitalisation companies are companies that, at the time of investment, have a capitalisation of less than 5 billion euros.

The Compartment will invest a minimum of 75% of its net assets in shares issued by companies that have their registered headquarters in the European Economic Area (excluding Liechtenstein).

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

French tax resident investors should be aware that the Compartment is eligible to be held within a “plan d’épargne en actions” (“PEA”) in France. The Fund undertakes that the Compartment will invest at least 75% of its assets on a permanent basis in securities or rights eligible to the PEA.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Europe Small Cap index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

32. PICTET – EMERGING MARKETS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in and/or whose main business is conducted in emerging markets.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment invests at least two-thirds of its total assets/total wealth in securities issued by companies that are headquartered in and/or have their main business in emerging countries.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

This compartment will also invest in securities traded on the Russian “RTS Stock Exchange”.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd

Reference currency of the Compartment: USD

Investment through Pictet (Mauritius) Limited

The Management Company may decide that the portion of the Compartment's assets to be invested in India should be invested indirectly through a company incorporated in Mauritius named Pictet (Mauritius) Limited, which is wholly controlled by the Fund and conducts investment and advisory activities exclusively for the Compartment (hereafter "PML") and in particular the advisory activities concerning large-volume redemptions of the Compartment's shares. Indirect investments are generally covered by the double taxation agreement (DTA) in existence between India and Mauritius.

To this end, the Management Company will use the portion of the Compartment's assets available for investment in India to acquire all the PML shares, which will thus be controlled entirely by the Fund. PML shares will be issued in registered form only.

The exclusive purpose of PML is to perform investment and advisory activities on behalf of the Compartment. The members of the PML Board of Directors are:

Eric A Venpin
Jimmy Wong Yuen Tien
Pascal Chauvaux
Benoît Beisbardt
Alexandre Ris

The Board of Directors will at all times include at least two residents of Mauritius and a majority of directors who are also directors of the Fund.

PML's advisory activities for the Compartment include providing regular information regarding the applicability of the treaty between India and Mauritius as well as making investment recommendations for the Indian market. PML also advises in cases of redemptions of the Compartment's shares greater than 20% of the net value in order to enable the manager to divest as necessary when faced with large volumes of redemption requests.

The financial statements of PML will be audited by Deloitte S.A., which is the statutory auditor for the Fund, or by any other statutory auditor established in Mauritius that is an associate of the Fund's statutory auditor. For the establishment of the Compartment's financial statements and semi-annual and annual reports, PML's financial results will be consolidated in the financial results of the Compartment. Similarly, these reports will contain a breakdown of the Compartment's portfolio in terms of the underlying securities held by PML. In accordance with the investment restrictions contained in the prospectus, the underlying investments will be taken into consideration as if PML did not exist.

PML was initially incorporated on 3 May 1996 as an offshore limited company under the Mauritius Offshore Business Activities Act 1992. PML holds a Category 1 Global Business Licence in compliance with the 2007 Financial Services Act.

PML has been granted a tax residence certificate from the Commissioner of Income Tax in Mauritius.

Accordingly, PML is considered to be resident in Mauritius for tax purposes and may thus benefit from the DTA. However, there is no guarantee that PML

will be able to maintain its tax resident status, and the termination of this status could result in the loss of tax benefits, thereby affecting the Compartment's net asset value per share.

PML operates as an investment holding company. The Mauritian supervisory commission (the Mauritius Financial Services Commission) does not stand surety for the solvency of PML or for the accuracy of any statement or opinion issued in its regard.

Correspondent of the Depositary Bank in India

The Depositary Bank has appointed Deutsche Bank AG, Mumbai Branch, as local custodian of the securities and other assets of the Compartment in India.

For the portion of assets to be invested in India, investors should note the following:

- a) Pictet Asset Management Ltd has been granted Foreign Institutional Investor ("FII") status by the Securities and Exchange Board of India ("SEBI") and is therefore authorised to invest in Indian securities on behalf of the Fund. The Fund's investments in India are largely dependent on the FII status granted to the manager, and, while it may be assumed that this authorisation will be renewed, this cannot be guaranteed.
- b) In accordance with Indian legislation governing foreign investments, the Compartment's assets must be held by the Indian correspondent on behalf of Pictet Asset Management Ltd, a PML sub-account.
- c) **By investing through PML, the Fund intends to take advantage of the DTA between Mauritius and India, as described more fully above. It cannot be guaranteed that the Fund will always have these tax advantages. Furthermore, amendments could also be made to the DTA, and these could affect the taxation of the Fund's investments and/or the taxation of PML and, consequently, the value of shares in the Fund.**

34. PICTET – EUROPE INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI Europe Standard Index.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI Europe Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.20% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Europe Standard Index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

35. PICTET – USA INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the S&P 500 Composite Index.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the S&P 500 Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The composition of the Benchmark Index may be obtained at the address: <http://www.standardandpoors.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.20% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk

36. PICTET – EUROPEAN SUSTAINABLE EQUITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies that are part of the MSCI Europe Index by identifying the sector leaders practising sustainable development.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment will invest at least two-thirds of its total assets/total wealth in equities issued by companies that are headquartered in and/or conduct their main business in Europe and will aim to benefit from the superior potential of companies practising sustainable development principles in their activities.

The manager uses appropriate information sources on environmental, social and corporate governance aspects to evaluate companies and define the investment universe. The portfolio is constructed using a quantitative method that adapts the portfolio according to financial stability, and the objective is to build a portfolio with superior financial and sustainable characteristics.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Europe index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd, PAM S.A.

Reference currency of the Compartment: EUR

Cut-off time for receipt of orders

Subscription

By 3:00 pm on the Banking Day preceding the NAV calculation date.

Redemption

By 3:00 pm on the Banking Day preceding the NAV calculation date.

37. PICTET – JAPAN INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI Japan Standard Index.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI Japan Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.20% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally

subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Japan Standard Index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

38. PICTET – PACIFIC EX JAPAN INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI Pacific Ex Japan Standard Index.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI Pacific ex Japan Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.30% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets per issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Pacific Ex Japan Standard Index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

39. PICTET – DIGITAL COMMUNICATION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares of companies worldwide conducting business in digital communications.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

The investment policy of this compartment aims to achieve capital growth by investing at least two-thirds of its total assets/total wealth in equities or any other similar securities issued by companies using digital technology to offer interactive services and/or products related to interactive services in the communications sector.

Risks will be minimised by diversified geographic distribution of the portfolio. Indeed, the investment universe is not limited to a specific geographic region (including emerging countries).

This compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preference shares, and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase

transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI World index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

40. PICTET – BIOTECH

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares in the biotechnology sector worldwide.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to achieve growth by investing in equities or similar securities issued by biopharmaceutical companies that are at the forefront of innovation in the medical sector. The Compartment will invest at least two-thirds of its total assets/total wealth in equities issued by companies operating in this sector. Geographically, the Compartment's investment universe is not restricted to a particular area (including emerging countries). However, in light of the particularly innovative nature of the pharmaceutical industry in North America and Western Europe, the vast majority of investments will be made in these regions.

To capitalise on particularly innovative projects in the pharmaceuticals field, the Biotech Compartment may invest up to 10% of its net assets in Private Equity and/or unlisted securities.

This Compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preference shares, and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI World index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

41. PICTET – PREMIUM BRANDS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest on a worldwide level in the shares of companies that specialise in high-end products and services, and that enjoy broad recognition and respond to different human aspirations.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment will apply a capital growth strategy by investing at least two-thirds of its total assets/total wealth in equities issued by companies operating in the premium brands sector, which offer high quality services and products. These companies enjoy strong market recognition because they have the ability to create or channel consumer trends. They may also have a certain ability to set prices. These companies are particularly specialised in high-end products and services or in financing this type of activity. The Compartment's investment universe will not be limited to any particular region (including emerging countries).

This Compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preference shares, and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transfe-

rable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

42. PICTET – WATER

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the shares of companies focused on the water-related sector worldwide.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to invest in equities issued by companies operating in the water and air sector worldwide (including in emerging countries).

The companies targeted in the water sector will include water production companies, water conditioning and desalination companies, water suppliers, water bottling, transport and dispatching companies, companies specialising in the treatment of waste water, sewage and solid, liquid and chemical waste, companies operating sewage treatment plants and companies providing equipment, consulting and engineering services in connection with the activities described above.

The companies targeted in the air sector will include companies responsible for inspecting air quality, suppliers of air-filtration equipment and manufacturers of catalytic converters for vehicles.

The Compartment will invest at least two-thirds of its total assets/total wealth in equities issued by companies operating in the water sector.

This Compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preference shares, and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

43. PICTET – INDIAN EQUITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in India and/or whose main business is conducted in India.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to invest directly or indirectly in transferable securities, (described in further detail below) issued by companies and institutions that are based in India or conduct their main business in India.

The Compartment will invest a minimum of two-thirds of its total assets/total wealth in equities issued by companies that are headquartered in India or conduct the majority of their business in India.

On an ancillary basis, the Compartment may also invest its assets in securities issued by companies that are based in or have their main activity in Pakistan, Bangladesh and Sri Lanka.

The Compartment will hold a diversified portfolio primarily composed of securities issued by companies listed on a stock exchange or traded on a regulated market that operates regularly and is recognised and open to the public. The Compartment may invest up to 10% of its net assets in unlisted securities.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The portfolio may include ordinary or preference shares and convertible bonds as well as warrants on transferable securities. The portfolio may also include global depositary receipts (GDRs) issued by companies in India, or similar instruments listed on a stock exchange in India or elsewhere.

If required by market conditions, the portfolio may also hold bonds issued by companies based in India and bonds issued or guaranteed by the Indian Government.

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act, and, subject to the limits allowed by the investment restrictions, in warrants on transferable securities and subscription rights.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Managers: PAM Ltd, PAM S.A.

Reference currency of the Compartment: USD

Investments through Pictet Country (Mauritius) Ltd

The Management Company may decide that the portion of the Compartment’s assets to be invested in India should be invested indirectly through a

company incorporated in Mauritius named Pictet Country (Mauritius) Ltd, which is wholly controlled by the Fund and conducts investment and advisory activities exclusively for the Compartment (hereafter “PCML”) and in particular the advisory activities concerning large-volume redemptions of the Compartment’s units. Indirect investments are generally covered by the double taxation agreement (DTA) in existence between India and Mauritius.

To this end, the Management Company will use the portion of the Compartment’s assets available for investment in India to acquire all the PCML shares, which will thus be controlled entirely by the Fund. PCML shares will be issued in registered form only.

PCML was initially incorporated on 11 October 1995 as an offshore limited company under the Mauritius Offshore Business Activities Act 1992 in the name of Pictet Investments (Mauritius) Limited (No. 15437/2168). PCML holds a “Category 1 Global Business Licence” issued pursuant to the Financial Services Act of 2007. PCML has been granted a tax residence certificate from the Commissioner of Income Tax in Mauritius. Accordingly, PCML is considered to be resident in Mauritius for tax purposes and may thus benefit from the DTA. However, there is no guarantee that PCML will be able to maintain its tax resident status, and the termination of this status could result in the loss of tax benefits, thereby affecting the Compartment’s net asset value per share.

The exclusive purpose of PCML is to perform investment and advisory activities on behalf of the Compartment. The PCML Board of Directors is composed of Eric A Venpin, Jimmy Wong Yuen Tien, Benoît Beisbardt, Pascal Chauvaux and Alexandre Ris. Benoît Beisbardt, Pascal Chauvaux and Alexandre Ris are also directors of the Fund. The PCML Board of Directors will at all times include at least two residents of Mauritius and a majority of directors who are also directors of the Fund.

PCML’s advisory activities for the Compartment include providing regular information regarding the applicability of the treaty between India and Mauritius as well as making investment recommendations for the Indian market. PCML also advises in cases of redemptions of the Compartment’s shares greater than 20% of the net value in order to enable the manager to divest as necessary when faced with large-volume redemption requests.

PCML’s financial statements will be audited by Deloitte S.A. For the establishment of the Compartment’s financial statements and semi-annual and annual reports, PCML’s financial results will be consolidated in the financial results of the Compartment. Similarly, these reports will contain a breakdown of the Compartment’s portfolio in terms of the underlying securities held by PCML. In accordance with the investment restrictions contained in the Prospectus, the underlying investments will be taken into consideration as if PCML did not exist.

PCML operates as an investment holding company.

The Mauritian supervisory commission (the Mauritius Financial Services Commission) does not stand surety for the solvency of PCML or for the accuracy of any statement or opinion issued in its regard.

Depository Bank in India

The Depository Bank and the Manager have appointed Deutsche Bank AG, Mumbai Branch, as local custodian of the securities and other assets of the compartment held in India.

Pictet Asset Management Ltd has been granted FII status by the SEBI and is therefore authorised to invest in Indian securities on behalf of the Fund. The Fund’s investments in India are largely dependent on the FII status granted to the manager, and, while it may be assumed that this authorisation will be renewed, this cannot be guaranteed.

In accordance with Indian legislation governing foreign investments, the Compartment’s assets must be held by the Indian correspondent on behalf of Pictet Asset Management Ltd, a PCML sub-account.

By investing through PCML, the Fund intends to take advantage of the DTA between Mauritius and India, as described more fully above. It cannot be guaranteed that the Fund will always have these tax advantages. Furthermore, amendments could also be made to the DTA, and these could affect the taxation of the Fund’s investments and/or the taxation of PCML and, consequently, the net asset value of shares in the Fund.

Cut-off time for receipt of orders

Subscription

By 3:00 pm on the Banking Day preceding the NAV calculation date.

Redemption

By 3:00 pm on the Banking Day preceding the NAV calculation date.

Switch

The more restrictive time period of the two compartments concerned.

Frequency of NAV calculation

Each Banking Day as well as the last calendar day of the month, unless that day is a Saturday or a Sunday.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate an NAV that cannot be used for trading purposes due to closure of one or more markets in which the Fund is invested and/or which it uses to value a material part of the assets.

For further information, please refer to our website www.pictetfunds.com.

Payment value date for subscriptions and redemptions

Within 5 Banking Days following the applicable NAV calculation date.

** PCML will be responsible for and pay certain costs and expenses arising in relation to its investment activities in Indian securities. These costs and expenses include brokerage fees and commissions, the costs of transactions associated with exchanging rupees into US dollars, and the costs of registration and taxes in relation to the incorporation and activities of PCML. PCML will also be responsible for its own operating expenses, including the costs of its local domiciliation and administrative agent and local auditor.

(1) USD 1,000,000 converted to EUR or GBP on the NAV calculation date.

44. PICTET – JAPANESE EQUITY OPPORTUNITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in Japan and/or whose main business is conducted in Japan.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This compartment aims to enable investors to participate in the growth in the Japanese equity market. The Compartment will seek to maximise the total return in terms of Japanese yen through capital gains from investment in a broadly diversified portfolio of Japanese equities by maximising the potential for alpha generation through the use of “130/30” management, while observing the principle of risk spreading.

Long positions will theoretically represent 130% and short positions 30% of the total assets, but they may reach 150% and 50%, respectively. Depending on market conditions, long positions may drop to 100%, in which case short positions would be 0.

This investment strategy refers to a portfolio composition made up of long positions, compensated by sales of short positions via derivative instruments, as authorised in the investment restrictions. The net exposure of the portion invested in equities – thus the net sum of long and short positions – is generally between 80% and 100% of the net assets, which is close to the exposure in a traditional “long only” fund.

The Compartment will invest a minimum of two-thirds of its total assets/total wealth in equities issued by companies that are headquartered in Japan or conduct the majority of their business in Japan.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act, and, subject to the limits allowed by the investment restrictions, in warrants on transferable securities and options.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the TOPIX index.

Expected leverage: 30%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Managers: PAM Ltd, PAM S.A.

Reference currency of the Compartment: JPY

45. PICTET – ASIAN EQUITIES EX JAPAN

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares of Asian companies, with the exception of Japan.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to achieve long-term capital growth by investing at least two-thirds of its total assets/total wealth in equities issued by companies that have their registered headquarters and/or conduct the majority of their business in Asian countries (including Mainland China), with the exception of Japan. The Compartment may also, within the limits of the investment restrictions, invest in warrants on transferable securities and in convertible bonds.

The Compartment may invest up to 49% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Settlement risk
- Asset liquidity risk
- Investment restriction risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Political risk
- Tax risk
- Risk of investing in the PRC
- QFII risk

- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI AC Asia Ex Japan index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd

Reference currency of the Compartment: USD

Investment through Pictet Asian Equities (Mauritius) Limited

The Management Company may decide that the portion of the Compartment's assets to be invested in India should be invested indirectly through a company incorporated in Mauritius named Pictet Asian Equities (Mauritius) Limited, which is wholly controlled by the Fund and conducts its advisory activity exclusively for the compartment (hereinafter “PAEML”) and in particular investment and advisory activities concerning large volume redemptions of the Compartment's shares. Indirect investments are generally

covered by the double taxation agreement (DTA) in existence between India and Mauritius.

To this end, the Management Company will use the portion of the Compartment's assets available for investment in India to acquire all the PAEML shares which will thus be controlled entirely by the Fund on behalf of the Pictet – Asian Equities Ex Japan compartment. PAEML shares will be issued in registered form only.

The exclusive purpose of PAEML is to perform investment and advisory activities on behalf of the compartment. The members of the PAEML Board of Directors are:

Eric A Venpin
Jimmy Wong Yuen Tien
Pascal Chauvaux
Benoît Beisbardt
Alexandre Ris

The Board of Directors will at all times include at least two residents of Mauritius and a majority of directors who are also directors of the Fund.

PAEML's advisory activities for the Compartment include providing regular information regarding the applicability of the treaty between India and Mauritius as well as making investment recommendations for the Indian market. PAEML also advises in cases of redemptions of the Compartment's shares greater than 20% of the net value in order to enable the manager to divest as necessary when faced with large volumes of redemption requests.

The financial statements of PAEML will be audited by Deloitte S.A., which is the statutory auditor for the Fund, or by any other statutory auditor established in Mauritius that is an associate of the Fund's statutory auditor. For the establishment of the Compartment's financial statements and semi-annual and annual reports, PAEML's financial results will be consolidated in the financial results of the compartment. Similarly, these reports will contain a breakdown of the Compartment's portfolio in terms of the underlying securities held by PAEML. In accordance with the investment restrictions contained in the prospectus, the underlying investments will be taken into consideration as if PAEML did not exist.

PAEML was incorporated on 24 February 2009 in Mauritius and holds a Category 1 Global Business Licence in compliance with the Financial Services Act of 2007.

PAEML has obtained a tax residence certificate from the Commissioner of Income Tax in Mauritius.

Accordingly, PAEML is considered to be resident in Mauritius for tax purposes and may thus take advantage of the DTA. However, there is no guarantee that PAEML will be able to maintain its tax resident status, and the termination of this status could result in the loss of tax benefits, thereby affecting the Compartment's net asset value per share.

PAEML operates as an "investment holding company".

Investors in PAEML are not protected by any legal provision of Mauritius in the event of the bankruptcy of PAEML.

The Mauritian supervisory commission ("the Mauritius Financial Services Commission") does not answer for the solvency of PAEML or to the accuracy of any statement or opinion issued in its regard.

Correspondent of the Depositary Bank in India

The Depositary Bank has appointed Deutsche Bank AG, Mumbai Branch, as local custodian of the securities and other assets of the Compartment in India.

For the portion of assets to be invested in India, investors should note the following:

- a) Pictet Asset Management Ltd has been granted Foreign Institutional Investor ("FII") status by the Securities and Exchange Board of India ("SEBI") and is therefore authorised to invest in Indian securities on behalf of the Fund. The Fund's investments in India are largely dependent on the FII status granted to the manager, and, while it may be assumed that this authorisation will be renewed, this cannot be guaranteed.
- b) In accordance with Indian legislation governing foreign investments, the Compartment's assets must be held by the Indian correspondent on behalf of Pictet Asset Management Ltd, in a PAEML sub-account.
- c) **By investing through PAEML, the Fund intends to take advantage of the DTA between Mauritius and India, as described more fully above. It cannot be guaranteed that the Fund will always have these tax advantages. Furthermore, amendments could also be made to the DTA, and these could affect the taxation of the Fund's investments and/or the taxation of PAEML and, consequently, the value of shares in the Fund.**

47. PICTET – JAPANESE EQUITY SELECTION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in a limited number of equities issued by companies with headquarters in Japan and/or whose main activities are conducted in Japan.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This compartment aims to enable investors to benefit from growth in the Japanese equity market.

The Compartment will invest a minimum of two-thirds of its total assets/total wealth in equities issued by companies that are headquartered in Japan or conduct the majority of their business in Japan.

The portfolio will be composed of a limited selection of securities that, in the opinion of the manager, have the most favourable outlook.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and, to a lesser extent, warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Japan index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

48. PICTET – HEALTH

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in equities of international companies active in segments related to health.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to achieve capital growth by investing primarily in equities or similar securities issued by companies that are active in sectors related to health. The Compartment may invest in any country (including emerging countries).

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI World index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

49. PICTET – EMERGING MARKETS INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI Emerging Markets Standard Index.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 7 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI Emerging Markets Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.30% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A

decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Asset liquidity risk
- Investment restriction risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Political risk

- Risk of investing in Russia
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI Emerging Markets Standard Index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

50. PICTET – EUROLAND INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI EMU Standard Index.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI EMU Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.20% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment will invest a minimum of 75% of its net assets in shares issued by companies that have their registered headquarters in countries that are part of the European monetary union.

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

French tax resident investors should be aware that the Compartment is eligible to be held within a “plan d’épargne en actions” (“PEA”) in France. The Fund undertakes that the Compartment will invest at least 75% of its assets on a permanent basis in securities or rights eligible to the PEA.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk

- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI EMU Standard Index.

51. PICTET – US EQUITY SELECTION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in and/or whose main activities are conducted in the United States.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This compartment aims to enable investors to participate in the growth of the American equity market.

The Compartment will invest at least two-thirds of its total assets/total wealth in equities issued by companies that are headquartered in or conduct their main activity in the United States.

The portfolio will be composed of a limited selection of securities that, in the opinion of the manager, have the most favourable outlook.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and, to a lesser extent, warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Equity risk
- Volatility risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the S&P 500 Composite index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

52. PICTET – SECURITY

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment applies a capital growth strategy by investing primarily in shares or similar securities issued by companies that contribute to providing integrity, health, and freedom, whether it be individual, corporate or political. The Compartment will invest at least two-thirds of its total assets/total wealth in equities issued by companies operating in this sector.

The targeted companies will be active, mainly, but not exclusively, in the following areas: internet security; software, telecommunications and computer hardware security; physical safety and health protection; access and identification security; traffic security; workplace security and national defence, etc.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of the MSCI World index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

53. PICTET – CLEAN ENERGY

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in securities of companies worldwide that produce clean energy and encourage its use.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

This Compartment applies a capital growth strategy by investing at least two-thirds of its total assets/total wealth in shares issued by companies that contribute to the reduction of carbon emissions (by encouraging the production and use of clean energy, for example). The investment universe is not limited to a specific geographic region (including emerging countries).

The targeted companies will be in particular, but not exclusively, companies active in the following domains: cleaner resources and infrastructures; equipment and technologies that reduce carbon emissions; the generation, transmission and distribution of cleaner energy; and cleaner and more energy-efficient transportation and fuels.

This Compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preference shares, convertible bonds and to a lesser extent warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transfe-

rable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

54. PICTET – RUSSIAN EQUITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies with headquarters in Russia and/or whose main business is conducted in Russia.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

The Compartment will invest a minimum of two-thirds of its total assets/total wealth in equities or any other kind of “equity”-type security issued by companies that are headquartered in Russia or that conduct the majority of their activity in Russia. These other “equity”-type securities may be American depositary receipts (ADRs), European depositary receipts (EDRs) and Global depositary receipts (GDRs), whose underlying assets are issued by companies domiciled in Russia then traded on regulated markets outside these countries, mainly in the US and in Europe.

This compartment will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preferred shares, convertible bonds and, to a lesser extent, warrants and options.

This compartment may also invest in securities traded on the Russian Trading System (RTS) and the Moscow Interbank Currency Exchange (MICEX) markets, which are considered regulated markets.

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

55. PICTET – TIMBER

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares of companies worldwide active in the forestry value chain.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

This compartment applies a strategy for capital growth by investing at least two-thirds of its total assets / total wealth in shares or any other securities related to shares issued by companies active in the financing, planting, and management of forests and wooded areas and/or in the processing, production and distribution of wood for construction and other services and products derived from wood contained in the forestry value chain.

This compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preferred shares, convertible bonds and, to a lesser extent, warrants and options.

The investment universe is not limited to a specific geographic region (including emerging countries).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR) and in real estate investments trusts (REIT).

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

56. PICTET – AGRICULTURE

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the securities of companies that contribute to and/or profit from the value chain in the agricultural sector.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

This compartment applies a strategy for capital growth by investing primarily in shares issued by companies contributing to and/or profiting from the value chain of the agricultural sector. The Compartment's investment universe is not limited to a specific geographic region (including emerging countries).

Within this value chain, the primarily targeted companies will be those which are active in production, processing and supply, as well as the production of agricultural equipment.

The risks will be minimised in a general environment of geographic diversification.

This compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preferred shares and, to a lesser extent, warrants and options.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, including deposits, money market instruments and money

market type UCITS and other UCIs within the above-mentioned limits.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

57. PICTET – GLOBAL MEGATREND SELECTION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in securities exposed to global megatrends.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

The Compartment will apply a strategy for capital growth by investing at least two-thirds of its total assets/total wealth in equities or in any other security linked to equities, issued by companies throughout the world (including in emerging countries).

The Compartment will invest primarily in securities that may benefit from global megatrends, i.e. long-term market trends resulting from sustainable, secular changes in economic and social factors such as demographics, lifestyle, regulations and the environment.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR) and in real estate investments trusts (REIT).

The risks will be minimised in a general environment of geographic diversification.

This compartment will hold a diversified portfolio composed, within the limits of the investment restrictions, of securities in listed companies. These securities may be ordinary or preferred shares and, to a lesser extent, warrants and options.

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transfe-

rable securities, or an undertaking for collective investment, for example.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

58. PICTET – GLOBAL ENVIRONMENTAL OPPORTUNITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the securities of companies worldwide that are active throughout the environmental value chain.
- Who are willing to bear significant fluctuations in market value and thus have a low aversion to risk.

Investment policy and objectives

The Compartment applies a capital growth strategy, by investing principally in equities, or in any other transferable security linked to or similar to equities (including structured products as described below), issued by companies throughout the world (including emerging countries).

It will invest mainly in securities issued by companies active throughout the environmental value chain, for example in agriculture, forestry, clean energy and water.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

Investments in unlisted securities and in listed securities in Russia other than on the MICEX-RTS stock exchanges, and investments in UCI other than those listed in §1 of the investment restrictions section, will not together exceed 10% of the Compartment's net assets.

Risks will be minimised by diversified geographic distribution of the portfolio.

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, including deposits, money market instruments, and money market type UCITS and other UCIs (within the above-mentioned 10% limit).

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may also invest in structured products, such as in particular credit-linked notes, certificates or any other transferable security whose returns are linked to, among others, an index that adheres to the procedures stipulated in Article 9 of the Luxembourg regulations of 8 February 2008 (including indexes on commodities, precious metals, volatility, etc.), currencies, interest rates, transferable securities, a basket of transferable securities, or an

undertaking for collective investment, in compliance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk

59. PICTET – HIGH DIVIDEND SELECTION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the shares of companies worldwide, from which regular dividend distributions are expected.
- Who are willing to bear significant fluctuations in market value and thus have a low aversion to risk.

Investment policy and objectives

This Compartment will invest mainly in shares and similar securities (including structured products as described below) of companies from which high, and/or higher dividends than those of their reference market, are expected.

The Compartment may invest up to 30% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group, (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The choice of investments will not be limited to a particular sector of economic activity. However, depending on market conditions, the investments may be focused on a limited number of economic activity sectors.

Risks will be minimised by diversified geographic distribution of the portfolio. The Compartment may invest in any country (including emerging countries).

Investments in unlisted securities and in listed securities in Russia other than on the MICEX-RTS stock exchange, and investments in UCIs other than those listed in §1 of the investment restrictions section, will not together exceed 10% of the Compartment's net assets.

Risks will be minimised by diversified geographic distribution of the portfolio.

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its net assets in bonds or any other debt security (including convertible bonds and preferential shares), money market instruments, derivatives and/or structured products whose underliers are or offer exposure to bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may

hold up to 100% of its net assets in liquidities, including deposits, money market instruments and money market type UCITS and other UCIs within the above-mentioned limits.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15% of the Compartment's net assets.

The Compartment may also invest in structured products, such as in particular credit-linked notes, certificates or any other transferable security whose returns are linked to, among others, an index that adheres to the procedures stipulated in Article 9 of the Luxembourg regulations of 8 February 2008 (including indexes on commodities, precious metals, volatility, etc.), currencies, interest rates, transferable securities, a basket of transferable securities, or an undertaking for collective investment, in compliance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk

60. PICTET – CHINA INDEX

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to replicate the performance of the MSCI China Standard Index.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.

Investment policy and objectives

The Compartment aims for the full and complete physical replication of the MSCI China Standard Index (hereinafter the “Benchmark Index”). It aims to achieve its investment objective by investing in a portfolio of transferable securities or other eligible assets comprising all (or, on an exceptional basis, a substantial number) of the components of the index concerned.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The composition of the Benchmark Index may be obtained at the address: <http://www.msci.com>. As a rule, the Benchmark Index shall be rebalanced four times a year.

The a priori tracking error between the change in the value of the underliers of the Compartment and those of the Benchmark Index is expected to be below 0.30% p.a. in normal market conditions.

Due to this physical replication, it may be difficult or even impossible to purchase all the components of the Benchmark Index in proportion to their weighting in the Benchmark Index or to purchase certain components due to their liquidity, the investment limits described in the section “Investment Restrictions”, other legal or regulatory limits, transaction and other fees incurred by the Compartment, existing differences and the potential mismatch between the Compartment and the Benchmark Index when the markets are closed.

In addition, exceptional circumstances such as market disruptions or extreme volatility can lead to substantial differences between the composition of the Compartment’s portfolio and that of the Benchmark Index.

Because the Compartment aims to physically replicate the Benchmark Index, the composition of the portfolio will not be adjusted, except (if applicable) in an effort to better reproduce the performance of the Benchmark Index. Consequently, the Compartment will not aim to “outperform” the Benchmark Index and will not try to adopt a defensive positioning when markets are declining or considered overvalued. A decline in the Benchmark Index could thus lead to a

corresponding decline in the value of the Compartment’s shares.

Investors should also be aware that rebalancing the Benchmark Index may incur transaction fees that will be borne by the Compartment and may affect the Compartment’s net asset value.

In addition to the specific risks linked to the physical replication of the Benchmark Index, investors should be aware that the Compartment is more generally subject to market risks (i.e. the risk of the decrease in the value of an investment due to changes in market factors such as exchange rates, interest rates, share prices or volatility).

The Compartment may, in application of Article 44 of the 2010 Act, invest up to 20% (and even 35% (for a single issuer) in exceptional market circumstances, particularly in the case of regulated markets where certain transferable securities are largely dominant) of its net assets in the same issuer in order to replicate the composition of its Benchmark Index.

The Compartment will hold a diversified portfolio and could contain convertible bonds.

The Compartment will not invest in UCITS and other UCIs.

If the manager deems it necessary and in the best interest of the shareholders, and to ensure adequate liquidity, the Compartment may hold liquid instruments such as deposits and money market instruments, among others.

If the manager deems it necessary and in the best interest of the shareholders, and to minimise the risk of underperforming the Benchmark, the Compartment may use financial derivative instruments and techniques for efficient management, within the limits specified in the investment restrictions.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Asset liquidity risk
- Investment restriction risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- Political risk

- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of MSCI China Standard Index.

Expected leverage: 0%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd, PAM S.A.

Reference currency of the Compartment: USD

Cut-off time for receipt of orders

Subscription

By 12:00 noon, 2 Banking Days preceding the NAV calculation date.

Redemption

By 12:00 noon, 2 Banking Days preceding the NAV calculation date.

Switch

The more restrictive time period of the two compartments concerned.

Frequency of NAV calculation

Each Banking Day as well as the first calendar day of the month, unless that day is a Saturday or a Sunday.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate an NAV that cannot be used for trading purposes due to closure of one or more markets in which the Fund is invested and/or which it uses to value a material part of the assets.

For further information, please refer to our website www.pictetfunds.com.

Payment value date for subscriptions and redemptions

Within 2 Banking Days following the applicable NAV calculation date.

Calculation of the NAV

The effect of net asset value corrections, more fully described in the section "Calculation of the net asset value", will not exceed 1%.

Shares not yet issued that may be activated at a later date

P dy USD, Z USD and I EUR shares, as defined in the section "Sub-classes of Shares".

Initial subscription price: the net asset value of the P USD and I USD share, and for the I EUR share, the net asset value of the I USD share converted to EUR on the day it is activated.

63. PICTET – EMERGING MARKETS HIGH DIVIDEND

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in shares issued by companies whose headquarters are located in and/or that conduct their main activities in emerging markets, to generate regular distribution of revenues.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment will invest mainly in shares and similar securities of companies whose headquarters are located in and/or that conduct their main activity in emerging countries and for which it is expected that dividends are higher or greater than those of their reference market.

The Compartment may invest up to 49% of its net assets in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The choice of investments will not be limited to a particular geographic sector, a particular sector of economic activity or a given currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Ukraine, Malaysia, Croatia, and Russia.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

The Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase

transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds and preference shares), money market instruments, derivatives and/or structured products whose underliers are, or offer exposure to, bonds or similar debt and interest-rate securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in the assets listed above are also included in the 10% limit.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

For hedging and for any other purposes, within the limits set out in the chapter "Investment restrictions" of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Collateral risk
- Asset liquidity risk
- Investment restriction risk
- Currency risk
- Equity risk
- Volatility risk

- Emerging market risk
- Political risk
- Tax risk

64. PICTET – EMERGING MARKETS SUSTAINABLE EQUITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the shares of companies whose headquarters are located in and/or that conduct their main activity in emerging markets by identifying the sector leaders that practise sustainable development.
- Who are willing to bear price variations and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment will invest mainly in shares and similar securities (such as ADRs and GDRs) of companies whose headquarters are located in and/or that conduct their main activity in emerging countries, and that incorporate sustainable development principles in their activities.

The emerging countries are defined as those which, at the time of the investment, are included in the universe of the MSCI Emerging Markets Index.

The manager uses appropriate information sources on environmental, social and corporate governance aspects to evaluate companies and define the investment universe. The portfolio is constructed using a quantitative method that adapts the portfolio according to financial stability, and the objective is to build a portfolio with superior financial and sustainable characteristics.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

Investments in unlisted securities and in Russia, other than on the MICEX-RTS stock exchange, will not exceed 10% of the Compartment's net assets.

In addition, the Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

Investments in debt instruments as defined by the European Directive 2003/48/EC will not exceed 15%.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

For hedging and for any other purposes, within the limits set out in the chapter "Investment restrictions" of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments, and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

65. PICTET – QUALITY GLOBAL EQUITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest worldwide in the shares of top quality companies (in terms of soundness and financial stability).
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This compartment aims to enable investors to benefit from growth in the worldwide equity market (including in emerging countries).

This compartment will invest primarily in shares and similar securities of companies that the manager considers to be of superior quality in terms of soundness and financial stability.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment will not invest more than 10% of its assets in bonds (including convertible bonds and preferential shares) and any other debt security within the meaning of European Directive 2003/48/EC, money market instruments, derivatives and/or structured products and/or undertakings for collective investment (UCIs) whose underlying assets are, or offer exposure to, bonds or similar debt and interest-rate securities.

The Compartment may also invest in structured products such as bonds or other transferable securities whose returns could be, for example, related to the performance of an index in accordance with Article 9 of the Luxembourg regulations of 8 February 2008, transferable securities or a basket of transferable securities, or an undertaking for collective investment in accordance with the Luxembourg regulations of 8 February 2008.

The Compartment may use derivative techniques and instruments for hedging or for efficient portfolio management within the limits stipulated in the investment restrictions.

If the manager deems it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits, money market instruments,

and monetary-type UCITS and other UCIs (within the limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

66. PICTET – ROBOTICS

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in equities of international companies that contribute to and/or profit from the value chain in robotics and enabling technologies.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

This compartment aims to achieve capital growth by investing mainly in equities and equity related securities (such as convertible bonds, ADR, GDR) issued by companies that contribute to and/or profit from the value chain in robotics and enabling technologies. These investments will be made in compliance with article 41 of the 2010 Act.

The targeted companies will be active mainly, but not exclusively, in the following areas: Robotics applications and components, automation, autonomous systems, sensors, microcontrollers, 3D printing, data processing, actuation technology as well as image, motion or voice recognition and other enabling technologies and software.

The Compartment may invest in China A Shares through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to an entity of the Pictet Group and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment may invest in any country (including emerging countries), in any economic sector and in any currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

On an ancillary basis, the Compartment may invest in any other type of eligible assets, such as equities other than those above-mentioned, debt securities (including money market instruments), structured products (as described below), undertakings for collective investment (UCITS and other UCIs), cash.

However the Compartment:

- may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to the provisions of Article 181 of the Law of 2010;
- may not invest more than 10% of its net assets in debt securities of any type (including convertible bonds and preference shares) and money market instruments, directly or indirectly (via derivatives, structured products, UCITS and other UCIs).

If the manager deems it necessary and in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Compartment may hold up to 100% of its net assets in liquidities, e.g. deposits, money market instruments and money market UCITS and other UCIs (within the 10% limit above-mentioned).

The Compartment may invest in structured products such as bonds or other transferable securities whose returns are linked, for example, to the performance of an index in accordance with Article 9 of the Luxembourg regulations of 8 February 2008, transferable securities or a basket of transferable securities, or an undertaking for collective investment in accordance with the Luxembourg regulations of 8 February 2008.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or income, or to reduce costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- Concentration risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR), comparing the VaR of the compartment with the VaR of the benchmark, the MSCI World index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

67. PICTET – GLOBAL EQUITIES DIVERSIFIED ALPHA

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to benefit from the performance of global equities, as well as from active and diversified management.
- Who are willing to bear variations in market value and thus have a low aversion to risk.
- Who have a medium- to long-term investment horizon (at least 5 years).

Investment policy and objectives

This Compartment has two aims; enabling investors to benefit firstly from growth in the worldwide equity market and secondly from active management strategies.

This Compartment is a feeder fund for the compartment Pictet Total Return - Diversified Alpha (the “Master Fund”) and it will invest at least 85% of its assets in Class I shares in the Master Fund.

In addition, the Compartment may also invest up to 15% of its assets in

- Liquidities on an ancillary basis.
- Derivative financial instruments for hedging purposes.

The Compartment may use derivative financial instruments for the purposes of hedging in relation to its benchmark index, the MSCI World index. In this way, derivative instruments will be used to expose the Compartment to global equities, for example, by concluding swaps contracts exchanging the performance of global equities for monetary rates. This exposure will amount to around 100% of its assets.

Investment policy and objectives of the Master Fund:

The Master Fund follows a set of long/short investment strategies which are generally market neutral. The objective of the Master Fund is to achieve long-term capital growth in absolute terms with a strong focus on capital preservation.

Traditional long positions are coupled with (synthetic) long and short positions, which will be achieved through the use of financial derivative instruments (amongst others total return swaps, credit default swaps, futures and options).

The Master Fund will principally invest in bonds and other related debt securities (such as corporate and/or sovereign and/or financial bonds, covered bonds and convertible bonds), equities, equity related securities (such as but not limited to ordinary or preferred shares), deposits and money market instruments (for cash management only). For that purpose, the Master Fund may invest up to 25% of its assets in China A Shares through (i) the RQFII quota granted to PAM Ltd (ii) the Shanghai-Hong Kong Stock Connect programme. The Master Fund may also use financial derivative instruments on China A Shares.

The Master Fund may also invest up to 10% of its assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.

The choice of investments will neither be limited by geographical area (including emerging markets), an economic sector nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country and/or in a single currency and/or in a single economic sector.

The Master Fund may enter into securities lending, repurchase and reverse repurchase transactions in order to increase its capital or its revenue or to reduce its costs or risks.

For hedging and for any other purposes, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Master Fund may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Master Fund may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference, credit default swaps) and forwards on any underlying in line with the Law of 2010 as well as the investment policy of the Master Fund, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment. As a consequence of this use of financial derivative instruments for the long and short positions, the Master Fund will have a considerable leverage.

The Master Fund may also invest in structured products, such as but not limited to notes, certificates or any other transferable securities whose returns are correlated with changes in, among others, an index selected in accordance with the article 9 of the grand-ducal regulation dated 8 February 2008, currencies, exchange rates, transferable securities, a basket of transferable securities, or an undertaking for collective investment, at all times in compliance with the grand-ducal regulation.

Those investments may not be used to elude the investment policy of the Master Fund.

In addition, the Master Fund may invest up to 10% of its net assets in UCITS and/or other UCIs including, without limitation, other compartments of the Master Fund itself, pursuant to Article 181 of the 2010 Act as indicated in the “investment restrictions” section.

At times where the Investment Managers consider it as appropriate, prudent levels of cash, cash equivalents, money market funds (within the above mentioned 10% limit) and money market instruments will be maintained, which may be substantial or even repre-

sent, under exceptional circumstances, 100% of the Master Fund's assets.

The performance of the Compartment and of the Master Fund will not be identical, primarily due to the way in which the Compartment hedges risk in relation to its benchmark index and secondly, due to the fees and commissions that the Compartment incurs.

General information about the Master Fund:

The Master Fund is a compartment of Pictet Total Return, an open-ended investment company incorporated under Luxembourg law on 8 January 2008 and classified as an undertaking for collective investment in transferable securities ("UCITS") in accordance with Directive 2009/65/EC of the European Parliament and Council issued on 13 July 2009, as amended.

The Master Fund's Management Company is Pictet Asset Management (Europe) S.A. (the "Management Company"), a '*société anonyme*' ("limited company") incorporated on 14 June 1995, the registered offices of which are located at 15, avenue J. F. Kennedy, Luxembourg. Pictet Asset Management (Europe) S.A. is also the management company for the Fund.

The Master Fund's prospectus and its most recent annual and/or semi-annual report may be obtained from the fund's registered office or from the website www.pictetfunds.com.

The Compartment and the Master Fund have taken appropriate measures to coordinate the timing of their respective net asset value calculation and publication in order to avoid market timing in their fund units, preventing arbitrage opportunities.

The Management Company has set out internal rules of conduct governing the documents and any information that the Master Fund is required to give the Compartment.

Tax implications

Please refer to the tax status section of this prospectus.

Risk factors

As a feeder fund, the Compartment is subject to the same risks as the Master Fund.

Risk factors for the Master Fund:

The risks listed below are the main risks of the Master Fund. Investors should be aware that other risks may also be relevant to the Master Fund. Please refer to the section "Risk Considerations" of the prospectus of the Master Fund for a full description of these risks.

- Counterparty risk;
- Credit risk;
- High Yield investment risk;
- Equity risk;
- Interest rate risk;
- Emerging market risk;
- Derivative risk;

- Synthetic short exposure risk;
- Leverage risk;
- Sukuk risk;
- Concentration risk;
- Political risk;
- RQFII risk;
- Shanghai-Hong Kong Stock Connect risk.

Invested capital may fluctuate downwards as well as upwards, and investors may not recuperate the entire value of the capital initially invested.

Risk profile:

The risks listed below are the most relevant risks of the Compartment in addition to the above-mentioned risks inherent to the Master Fund, to which the Compartment is exposed by virtue of its investment in this fund. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section "Risk Considerations" for a full description of these risks.

- Collateral risk
- Currency risk
- Volatility risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

As the Fund invests in other UCITS and/or UCIs, the investor is exposed to a duplication of fees and commissions.

Risk management method for the Master Fund: Absolute value-at-risk approach.

Risk management method for the Compartment: Relative value at risk (VaR). The VaR of the Compartment shall be compared with the VaR of the MSCI World index.

Expected leverage of the Compartment: 100%. Depending on market conditions, the leverage may be greater.

Expected cumulative leverage with the Master Fund: 500%. Depending on market conditions, the leverage may be greater.

Method of calculating leverage of the Master Fund and the Compartment: the sum of the notional amounts.

Manager: PAM S.A., PAM Ltd

Reference currency of the Master Fund and the Compartment: EUR

Cut-off time for receipt of orders

Subscription

By 12:00 noon, three Banking Days preceding the NAV calculation date.

Redemption

By 12:00 noon, three Banking Days preceding the NAV calculation date.

Switch

The most restrictive time period of the two compartments concerned.

Frequency of NAV calculation

Each Friday (the following Banking Day if that day is not a Banking Day).

Furthermore, an additional NAV may be calculated on each Banking Day; however, this additional NAV, whilst published, will only be used for valuation purposes, no subscription or redemption orders will be accepted on the basis of it.

In addition, a non-negotiable NAV may also be calculated on other days, particularly when the last/first day of the calendar month falls on a public holiday in Luxembourg; these non-negotiable NAVs may be published but may only be used to calculate performance, statistics (particularly in order to be able to make comparisons to benchmark indices) or fees, and cannot under any circumstances be used as a basis for subscription or redemption orders.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate a NAV that cannot be used for trading purposes due to closure

of the Master Fund and/or of one or several of the markets in which the Fund is invested and/or which it uses to value a material part of the assets.

For further information, please refer to our website www.pictetfunds.com.

Payment value date for subscriptions and redemptions

Within 2 Banking Days following the applicable NAV calculation day.

Shares not yet issued that may be activated at a later date

All shares as listed in the below table may be launched at a later date at an initial subscription price determined by the Board of Directors.

Initial subscription period

The initial subscription will take place on 14 June 2016 until 12.00 noon at an initial price equal to 100 USD for the share classes denominated in USD and to 100 CHF for the share classes denominated in CHF. The payment value date will be 21 June 2016.

The Compartment may however be launched on any other date decided by the board of Directors of the Fund.

(1) EUR 1,000,000 converted to USD, CHF, GBP or JPY on the day of the NAV calculation.

Fees invoiced within the Master Fund and met by the Compartment due to its investment in the Master Fund:

Management fee: Max 1,60%.

Service fee: Max 0.35%.

Custodian Bank fee: max 0.22%.

Performance fee: 20% per year of the performance of the NAV per share, (measured against the High Water Mark) over the performance of the benchmark index.

For more information on the costs borne by the Compartment as a result of its investment in units of the Master Fund, please refer to the section “Fund Expenses” in the Master Fund’s prospectus.

68. PICTET – GLOBAL THEMATIC OPPORTUNITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in securities exposed to global investment themes.
- Who are willing to bear significant variations in market value and thus have a low aversion to risk.
- Who have a long-term investment horizon (at least 7 years).

Investment policy and objectives

The Compartment aims to achieve capital growth by investing mainly in equities and equity related securities (such as ADR, GDR, EDR) issued by companies throughout the world (including emerging countries). The Compartment will invest mainly in securities that may benefit from global long-term market themes resulting from secular changes in economic and social factors such as demographics, lifestyle, regulations or the environment.

The Compartment may also invest up to 10% of its net assets in real estate investments trusts (REITs).

In addition, the Compartment may also invest up to 10% of its net assets in UCITS and other UCIs in compliance with the provisions of Article 41.(1) e) of the 2010 Act, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

The Compartment may invest in any country (including emerging countries), in any economic sector and in any currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

The Compartment may invest in China A Shares through (i) the QFII quota granted to the Managers (subject to a maximum of 35% of its net assets), (ii) the RQFII quota granted to the Managers and/or (iii) the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares.

The Compartment will not invest more than 10% of its assets in bonds or any other debt security (including convertible bonds), money market instruments, financial derivative instruments and/or structured products whose underliers are, or offer exposure to debt securities.

By analogy, investments in undertakings for collective investment whose main objective is to invest in debt securities are also included in the 10% limit.

If the manager deems it necessary and in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Compartment may hold up to 100% of its net assets in liquidities, e.g. deposits, money market instruments and money market UCITS and other UCIs (within the 10% limit above-mentioned).

The Compartment may invest in structured products without embedded derivatives, such as bonds or

other transferable securities whose returns are linked, for example, to the performance of an index in accordance with Article 9 of the Luxembourg regulations of 8 February 2008, transferable securities or a basket of transferable securities, or an undertaking for collective investment in accordance with the Luxembourg regulations of 8 February 2008 and the 2010 Act.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or income, or to reduce costs or risks.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures, swaps, contracts for difference, forward exchanges contracts (including non-deliverable forwards).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Collateral risk
- Currency risk
- Equity risk
- Volatility risk
- Emerging market risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Chinese currency exchange rate risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Concentration risk
- Real Estate Investment Trusts (REITs)
- Depositary receipts risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: relative value at risk (VaR). The VaR of the compartment shall be compared with the VaR of MSCI World index.

Expected leverage: 50%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Annex 3: Balanced Compartments and other compartments

This annex will be updated to account for any change in an existing compartment or when a new compartment is created.

69. PICTET – PICLIFE

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in the shares and bonds of listed companies, as well as in money market instruments throughout the world.
- Who seek a moderate but more stable capital growth than that through exposure to equities.
- Whose reference currency is the Swiss franc.
- Who are willing to bear variations in market value.

Investment policy and objectives

The aim of this compartment is to enable investors to benefit from the general investment strategy of Pictet Asset Management S.A., by providing the opportunity to invest in an overall balanced portfolio that will be broadly inspired by the investment policy applicable to the Swiss pension funds.

The Compartment will invest mainly in equities, fixed-income instruments and money market instruments worldwide (including in emerging countries), as well as through a portfolio of UCITS and other UCIs (including, without limitation, in other Compartments of the Fund, pursuant to Article 181 of the 2010 Act as presented in the section “Investment Restrictions”) offering exposure or investing in equities, money market instruments and fixed-income investments worldwide.

The Compartment may invest in China A Shares, bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group. It may also invest in China A Shares through the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares. Investments in China may be performed, inter alia, on the China Interbank Bond Market (“CIBM”).

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquid instruments, including deposits, money market instruments and money market investment funds.

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns may for example be linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may conduct credit default swaps.

To hedge against certain credit risks for particular bond issuers in the portfolio, the Compartment may purchase credit default swaps.

The Compartment may, when it is in its own interest, sell credit default swaps in order to acquire specific credit risks and/or acquire protection without holding the underlying assets, within the limits defined in the investment restrictions.

The Fund may only conclude credit default swap transactions with leading financial institutions specialising in such transactions and in accordance with the standardised provisions of the ISDA Master Agreement.

The Compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

Due to the fact the Compartment will invest in other UCI/UCITS funds, the investor is exposed to a possible duplication of fees and charges. However, when the Compartment invests in other UCITS and other UCIs managed directly or by delegation by the same management company or by any other company with which the management company is linked through common management or control or through a substantial direct or indirect equity holding, the maximum percentage of the fixed management fees that may be obtained at the level of the target UCITS and other UCIs will be 1.6%, to which, if applicable, a fee may be added at a maximum of 20% of the performance of the NAV per share.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk

- Collateral risk
- Credit risk
- Credit rating risk
- Currency risk
- Equity risk
- Interest rate risk
- Emerging market risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Risk linked to investments in other UCIs
- CIBM risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 80%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

70. PICTET – MULTI ASSET GLOBAL OPPORTUNITIES

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in a mixed portfolio composed of shares/units of undertakings for collective investment (UCI) and/or undertakings for collective investment in transferable securities (UCITS) investing in shares, bonds and other classes of assets of different countries and economic sectors.
- Who are willing to bear variations in market value.
- Who have an investment horizon of 3 years or longer.

Investment policy and objectives

This compartment's objective is to enable investors to benefit from the growth of the financial markets through a professionally managed portfolio of UCITS and other UCIs (including, without limitation, other Compartments of the Fund), pursuant to Article 181 of the 2010 Act as indicated in the "investment restrictions" section), that offer exposure to the following asset classes: currencies, all types of debt securities (public or private), money market instruments, shares and similar securities, real estate, indexes on volatility and commodities.

The Compartment may invest in China A Shares, bonds and other debt securities denominated in RMB through (i) the QFII quota granted to an entity of the Pictet Group (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to an entity of the Pictet Group. It may also invest in China A Shares through the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares. Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Compartment may also invest in depositary receipts (ADR, GDR, EDR).

The Compartment may, on an ancillary basis, invest in other eligible assets, in particular directly in equities, debt instruments, money market instruments, structured products (as described below), and derivative instruments that offer exposure to the above-mentioned asset classes.

It is understood that the Compartment will not directly hold property assets or commodities and that in, the case of indirect investment, the manager will ensure that no physical delivery is permitted.

Exposure of the underlying assets of the Target Funds (whether other compartments of the Fund or other UCITS and other UCIs) will not be limited to a geographic sector (including emerging countries), a particular sector of economic activity or a given currency. However, depending on market conditions, this exposure may be focused on one country or on a limited number of countries and/or one economic

activity sector and/or one currency and/or one class of assets.

The Compartment may invest or be exposed for up to 50% of its net assets in markets of Emerging Countries.

For hedging and for any other purposes, within the limits set out in the chapter "Investment restrictions" of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference, credit default swaps) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

For diversification of risk, the Compartment may use financial derivative instruments whose underliers are commodities indexes, in accordance with the law and with ESMA guidelines 2012/832.

The Compartment will achieve its investment policy by positioning itself for the growth and/or the volatility of the markets. To achieve this management objective, the Compartment may use derivative instruments whose underlying assets are market volatility, including instruments such as futures contracts and options on volatility, volatility swaps or variance swaps. Such derivative instruments may generate a profit due to the difference between implicit volatility and actual volatility over a defined period of time.

The Compartment may also invest in structured products, such as credit-linked notes, certificates or any other transferable security whose returns are linked to, among others, an index that adheres to the procedures stipulated in Article 9 of the Luxembourg Regulations of 8 February 2008 (including indexes on commodities, precious metals, volatility, etc.), currencies, interest rates, transferable securities, a basket of transferable securities, or an undertaking for collective investment.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or its income or to reduce its costs or risks.

The Compartment may also invest in structured products without embedded derivative instruments which give rise to cash payments, linked to growth in commodities (including precious metals).

If the manager deems it necessary and in the best interest of the shareholders, the Compartment may hold up to 100% of its net assets in liquidities, such as

deposits, money market instruments, and monetary-type UCITS and other UCIs.

Due to the fact the Compartment will invest in other UCI/UCITS funds, the investor is exposed to a possible duplication of fees and charges. However, when the Compartment invests in other UCITS and other UCIs managed directly or by delegation by the same management company or by any other company with which the management company is linked through common management or control or through a substantial direct or indirect equity holding, the maximum percentage of the fixed management fees that may be obtained at the level of the target UCITS and other UCIs will be 1.6%, to which, if applicable, a fee may be added at a maximum of 20% of the performance of the NAV per share.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Currency risk
- Equity risk
- Interest rate risk
- Emerging market risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Risk linked to investments in other UCIs
- CIBM risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 100%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM S.A., PAM Ltd, PAM Ltd-Italy

Reference currency of the compartment: EUR

Cut-off time for receipt of orders

Subscription

By 02:00 p.m. on the Banking Day preceding the NAV calculation date.

Redemption

By 02:00 p.m. on the Banking Day preceding the NAV calculation date.

Switch

The more restrictive time period of the two compartments concerned.

Payment value date for subscriptions and redemptions

Within 3 Banking Days following the applicable NAV calculation date.

Frequency of NAV calculation

Each Banking Day as well as the first calendar day of the month, unless that day is a Saturday or a Sunday.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate an NAV that cannot be used for trading purposes due to closure of one or more markets in which the Fund is invested and/or which it uses to value a material part of the assets.

For further information, please refer to our website www.pictetfunds.com.

Shares not yet issued that may be activated at a later date

P dy EUR, R dy EUR, Z EUR, ZX EUR, IX EUR, PX EUR or RX EUR shares as defined in the section “Sub-classes of Shares”.

Initial subscription price: the net asset value of the corresponding shares, on the day they are activated.

* Per year of the average net assets attributable to this type of share.

(1) EUR 1,000,000 converted to USD, CHF or GBP on the NAV calculation date.

(2) In principle, no tax reporting for the dm sub-class of shares will be provided for German investors.

Performance fee:

The manager will receive a performance fee, for all of the Compartment's shares with the exception of X shares, provisioned every valuation day and paid annually, based on the net asset value (NAV), equivalent to 10% of the performance of the NAV per share (measured against the "high water mark") versus the index below for each asset class since the last payment of the performance fee:

Type of share	Index
Share classes denominated in EUR	EONIA + 3%
Hedged share classes denominated in USD	LIBOR USD Overnight + 3%
Hedged share classes denominated in CHF	LIBOR CHF Spot Next + 3%
Hedged share classes denominated in GBP	LIBOR GBP Overnight + 3%

The EONIA (Euro Over Night Index Average) index reflects the weighted average rate of interbank investments from one day to the next in the Eurozone) since the last payment of the performance fee.

The performance fee is calculated on the basis of the NAV after deducting all fees, liabilities and management fees (but not the performance fee), and then adjusted to take account of all subscriptions and redemptions.

The performance fee is based on the outperformance of the NAV per share, multiplied by the number of shares in circulation during the calculation period. No performance fee is due if the NAV per share before the performance fee is lower than the high water mark for the calculation period in question.

The high water mark is defined as the greater of the following two values:

- the last recorded historical net asset value per share for which a performance fee was paid; and
- the initial NAV per share.

The dividends paid to shareholders will be deducted from the high water mark.

A provision will be created for the performance fee on each calculation date. If the NAV per share decreases during the calculation period, the provisions created for the performance fee will be reduced accordingly. If these provisions drop to zero, no performance fee is payable.

If shares are redeemed at a date other than that on which a performance fee is paid and a provision has been created for performance fees, the performance fees for which the provision has been created that are assigned to the shares redeemed will be paid at the end of the period, even if the performance fee provision no longer exists at that date. Capital gains that have not been realised can be taken into account in the calculation and payment of performance fees.

When subscriptions are made, the calculation of the performance fee is adjusted to prevent the subscription from having an impact on the amount of provisions for performance fees. For the purposes of this adjustment, the outperformance of the net asset value per share compared to the minimum rate of return up to the subscription date is not taken into consideration in the calculation of the performance fee. The amount of this adjustment is based on the product of the number of shares subscribed times the positive difference between the subscription price and the high water mark adjusted by the minimum rate of return on the date of the subscription. The amount of this accumulated adjustment is used to calculate performance fees up to the end of the period concerned and is adjusted to account for subsequent redemptions in the period.

The reference period corresponds to the Fund's financial year.

The performance fee (F) is calculated as follows:

$$\begin{aligned}
 F &= 0 && \text{If } [(B / E - 1) - X] \leq 0 \\
 F &= [(B / E - 1) - X] * E * C * A && \text{If } [(B / E - 1) - X] > 0 \\
 \text{The new high water mark} &= \begin{aligned} &\text{If } F > 0; D \\ &\text{If } F = 0; E \end{aligned}
 \end{aligned}$$

Based on:

A = Number of outstanding shares

B = NAV/share before the performance fee

C = Rate of the performance fee (10%)

D = NAV/share after the performance fee

E = High Water Mark

F = Performance fee

X = Minimum return based on the index given above accumulated at each valuation date since the last payment of a performance fee.

71. PICTET – ABSOLUTE RETURN FIXED INCOME

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to invest in an internationally well-diversified portfolio that includes bonds, other fixed-income instruments and currencies.
- Who are willing to bear variations in market value and thus have a low to medium aversion to risk.
- Who have a short/medium-term investment horizon (at least 3 years).

Investment policy and objectives

The objective of this compartment is to achieve positive absolute returns by investing primarily in any form of debt securities (including but not limited to government or corporate bonds, convertible bonds, inflation-indexed bonds, ABS, MBS), money market instruments and currencies.

The Compartment will thus invest primarily as follows:

- directly in the securities/asset classes listed above; and/or
- in transferable securities (such as structured products, as described below) linked to performance or offering exposure to the securities/asset classes mentioned in the preceding paragraph; and/or
- via financial derivative instruments whose underliers are the securities mentioned in the preceding paragraph or assets offering exposure to these securities/asset classes.

The Compartment may invest in any country (including emerging countries), in any economic sector and in any currency. However, depending on market conditions, the investments may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

The Compartment may be exposed to non-investment grade debt securities, including distressed and defaulted securities.

The Compartment may also invest up to 20% of its net assets in contingent convertible bonds (“CoCo Bonds”).

The Compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

To achieve its investment objective and through the use of financial derivative instruments, the Compartment can hold a significant portion of liquid assets (such as deposits and money market instruments).

The Compartment may use techniques and instruments on transferable securities and money market instruments (such as securities lending transactions and repurchase and reverse repurchase transactions)

in order to increase its capital or its income, or to reduce costs or risks.

The Compartment may invest up to 10% of its net assets in UCITS and other UCIs, including other compartments of the Fund pursuant to Article 181 of the 2010 Act.

For hedging and for any other purposes, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference) and forwards on any underlying in line with the 2010 Act as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), interest rates, transferable securities, basket of transferable securities, indices (including but not limited to commodities, precious metals or volatility indices), undertakings for collective investment.

The Compartment may conduct non-deliverable forward transactions. A Non-Deliverable Forward is a bilateral financial futures contract on an exchange rate between a strong currency and an emerging currency. At maturity, there will be no delivery of the emerging currency; instead there is a cash settlement of the contract’s financial result in the strong currency.

The International Swaps and Derivatives Association (ISDA) has published standardised documentation for these transactions, included in the ISDA Master Agreement. The Compartment may only conduct non-deliverable forward transactions with leading financial institutions that specialise in this type of transaction, and with strict adherence to the standardised provisions of the ISDA Master Agreement.

If the manager deems it necessary and on an occasional basis (in circumstances other than those mentioned above), and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as deposits, money market instruments and money market UCITS and other UCIs (subject to a limit of 10% for UCITS and other UCIs).

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk

- High Yield investment risk
- Currency risk
- Interest rate risk
- Emerging market risk
- Political risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Structured Finance Securities risk
- Contingent Convertibles instruments risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value-at-risk approach.

Expected leverage: 400%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

* Per year of the average net assets attributable to this type of share.

(1) USD 1,000,000 converted to EUR, CHF, GBP, or JPY on the NAV calculation date

(2) USD 50,000,000 converted EUR or GBP on the NAV calculation date

Performance fee:

The manager will receive a performance fee for all shares of the Compartment, except for Z and X shares, provisioned every valuation day and paid annually, based on the net asset value (NAV), equivalent to 10% of the performance of the NAV per share (measured against the high water mark) versus the index shown in the table below for each class of shares since the last payment of the performance fee.

Type of share	Index
Share classes denominated in USD and EUR	LIBOR USD Overnight + 1.5%
Hedged share classes denominated in EUR	EONIA + 1.5%
Hedged share classes denominated in CHF	LIBOR CHF Spot Next + 1.5%
Hedged share classes denominated in JPY	LIBOR JPY Spot Next + 1.5%
Hedged share classes denominated in GBP	LIBOR GBP Overnight + 1.5%

The performance fee is calculated on the basis of the NAV after deducting all fees, liabilities and management fees (but not the performance fee), and then adjusted to take account of all subscriptions and redemptions.

The performance fee is based on the outperformance of the NAV per share, multiplied by the number of shares in circulation during the calculation period. No performance fee is due if the NAV per share before the performance fee is lower than the high water mark for the calculation period in question.

The high water mark is defined as the greater of the following two values:

- the last recorded historical net asset value per share for which a performance fee was paid; and
- the initial NAV per share.

The dividends paid to shareholders will be deducted from the high water mark.

A provision will be created for the performance fee on each calculation date. If the NAV per share decreases during the calculation period, the provisions created for the performance fee will be reduced accordingly. If these provisions drop to zero, no performance fee is payable.

If shares are redeemed at a date other than that on which a performance fee is paid and a provision has been created for performance fees, the performance fees for which the provision has been created that are assigned to the shares redeemed will be paid at the end of the period, even if the performance fee provision no longer exists at that date. Capital gains that have not been realised can be taken into account in the calculation and payment of performance fees.

When subscriptions are made, the calculation of the performance fee is adjusted to prevent the subscription from having an impact on the amount of provisions for performance fees. For the purposes of this adjustment, the outperformance of the net asset value per share compared to the minimum rate of return up to the subscription date is not taken into consideration in the calculation of the performance fee. The amount of this adjustment is based on the product of the number of shares subscribed times the positive difference between the subscription price and the high water mark adjusted by the minimum rate of return on the date of the subscription. The amount of this accumulated adjustment is used to calculate performance fees up to the end of the period concerned and is adjusted to account for subsequent redemptions in the period.

The reference period corresponds to the Fund's financial year.

The performance fee (F) is calculated as follows:

$$\begin{aligned}
 F &= 0 && \text{If } [(B / E - 1) - X] \leq 0 \\
 F &= [(B / E - 1) - X] * E * C * A && \text{If } [(B / E - 1) - X] > 0 \\
 \text{The new high water mark} &= \begin{cases} \text{If } F > 0; D \\ \text{If } F = 0; E \end{cases}
 \end{aligned}$$

Based on:

A = Number of outstanding shares

B = NAV/share before the performance fee

C = Rate of the performance fee (10%)

D = NAV/share after the performance fee

E = High Water Mark

F = Performance fee

X = Minimum return based on the index shown in the table above for each class of shares accumulated at each valuation date since the previous valuation date payment of a performance fee.

72. PICTET – SHORT-TERM STRATEGIES

Investor type profile

The compartment is an investment vehicle for investors:

- who wish to be exposed to debt securities and equities by investing their assets with selected undertakings for collective investment; and
- who are willing to bear variations in market value and thus have a low to medium aversion to risk.

Investment policy and objectives

The objective of the Compartment is to achieve long-term capital growth in absolute terms with a strong focus on capital preservation. The Compartment will invest principally in undertakings for collective investment (UCIs), i.e. in UCITS and/or UCIs other than UCITS in compliance with the provisions of Article 41.1.E of the 2010 Act, including without limitation other compartments of the Fund (pursuant to the provisions of Article 181 of the 2010 Act, as indicated in the “investment restrictions” section), all hereafter defined as the “Target Funds”, and which offer an exposure to the following asset classes: currencies, all types of debt securities (public or private), money market instruments, equities and equity related securities.

In order to achieve its objective, the Compartment will select a limited number of specific strategies, which will be reviewed on a regular basis and which might be invested into for a short period of time, hence the Compartment name Short-Term Strategies.

The Compartment may, on an ancillary basis, invest in any other type of eligible assets, such as in UCIs other than those above-mentioned, equities, debt securities, money market instruments and cash.

Exposure of the underlying assets of the Target Funds will not be limited to a geographic sector (including emerging countries), a particular sector of economic activity or a given currency. However, depending on market conditions, this exposure may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency and/or one class of assets.

For hedging and for efficient portfolio management, within the limits set out in the chapter “Investment restrictions” of the prospectus, the Compartment may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions. In particular, the Compartment may take exposure through any financial derivative instruments such as but not limited to warrants, futures, options, swaps (including but not limited to total return swaps, contracts for difference, credit default swaps) and forwards on any underlying in line with the Law of 2010 as well as the investment policy of the Compartment, including but not limited to, currencies (including non-deliverable forwards), transferable securities, basket of transferable securities and indices.

If the investment managers deem it necessary and in the best interests of the shareholders, the Compartment may hold up to 100% of its net assets in liquid assets, such as, among others, deposits and money market UCIs.

Also due to the fact that the Compartment will invest in Target Funds, the investor is exposed to a possible duplication of fees and charges. However, when the compartment invests in Target Funds managed directly or by delegation by the Management Company or by any other company with which the Management Company is linked through common management or control or through a substantial direct or indirect equity holding, the maximum percentage of the fixed investment management fees that may be obtained at the level of a Target Fund will be 1.6%.

Risk profile

The risks listed below are the most relevant risks of the compartment. Investors should be aware that other risks may also be relevant to the compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Credit risk
- Credit rating risk
- High Yield investment risk
- Equity risk
- Interest rate risk
- Financial derivative instruments risk
- Risk linked to investments in other UCIs

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: Absolute value at risk approach.

Expected leverage: 150%. Depending on market conditions, the leverage may be higher.

Leverage calculation method: sum of notional amounts.

Managers: PAM SA, PAM Ltd

Reference currency of the compartment: EUR

Cut-off time for receipt of orders

Subscription

By 10:00 am on the Banking Day preceding the NAV calculation date.

Redemption

By 10:00 am on the Banking Day preceding the NAV calculation date.

Switch

The most restrictive time period of the two compartments concerned.

Payment value date for subscriptions and redemptions

Within 2 Banking Days following the applicable NAV calculation day.

Frequency of NAV calculation

Each Banking Day as well as the first calendar day of the month, unless that day is a Saturday or a Sunday.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate a NAV that cannot be used for trading purposes due to closure of one or more markets in which the Fund is invested and/or which it uses to value a material part of the assets.

For further information, please refer to our website www.pictetfunds.com.

Shares not yet issued that may be activated at a later date

All shares as listed in the below table may be launched at a later date at an initial subscription price determined by the Board of Directors.

Initial subscription period

The initial subscription will take place from 13 to 21 June 2016 at an initial price equal to 100 EUR for share classes denominated in EUR and 100 CHF for share classes denominated in CHF. The payment value date will be 24 June 2016.

The Compartment may however be launched on any other date decided by the board of Directors of the Fund.

(1) EUR 1,000,000 converted to USD, GBP, CHF or JPY on the day of the NAV calculation.

73. PICTET – GLOBAL DYNAMIC ALLOCATION

Typical investor profile

The Compartment is an investment vehicle for investors:

- Who wish to be exposed to multiple asset classes (equities, debt securities, commodities, real estate, cash and currencies).
- Who are willing to bear variations in market value.

Investment policy and objectives

The objective of the Compartment is to provide investors with a return superior to that of its benchmark index, the USD 3 months ICE LIBOR.

The Compartment is looking to be exposed to, and benefit from, the performance of the following asset classes: debt securities of any type (corporate and sovereign), including money market instruments, equities, commodities (including precious metals), real estate, cash and currencies.

It is understood that the Compartment will not directly hold property assets or commodities and that, in the case of indirect investment, the manager will ensure that no physical delivery is permitted.

In order to achieve its objective, the Compartment will mainly invest:

- directly in the securities/asset classes mentioned in the previous paragraph (except for the commodities and real estate asset classes); and/or
- in undertakings for collective investment (UCITS and other UCIs in compliance with the provisions of Article 41. (1) e) of the 2010 Act), including, without limitation, other compartments of the Fund (pursuant to the provisions of Article 181 (8) of the Law of 2010) whose main objective is to invest in the securities/asset classes listed above; and/or
- in any transferable securities (such as structured products) linked or offering an exposure to the performance of the above-mentioned asset classes/securities.

The proportion of assets devoted to each asset class varies over time, and sometimes the Sub-Fund can be exposed to several or only one of the above asset classes.

The Compartment may invest in any country (including emerging countries), in any economic sector and in any currency. However, depending on market conditions, the investments or exposure may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency and/or in a single asset class.

The Compartment will however respect the following limits:

- The Compartment may invest in depositary receipts (such as ADR, GDR, EDR) without limitation and in real estate investments trusts (REIT) up to 30% of its net assets.

- The Compartment may invest in China A Shares, bonds and other debt securities denominated in RMB through (i) the QFII quota granted to the Managers (subject to a maximum of 35% of its net assets) and/or (ii) the RQFII quota granted to the Managers.

It may also invest in China A Shares through the Shanghai-Hong Kong Stock Connect programme. The Compartment may also use financial derivative instruments on China A Shares. Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").

The Compartment may be exposed to non-investment grade debt securities up to 30% of its net assets, in addition it may also be exposed to distressed and defaulted securities up to 10% of its net assets.

- Investments in convertible bonds (other than contingent convertible bonds) may not exceed 15% of the Compartment's net assets.
- The Compartment may also invest up to 15% of its net assets in contingent convertible bonds.
- The Compartment may invest up to 10% of its net assets in Sukuk al Ijarah, Sukuk al Wakalah, Sukuk al Mudaraba or any other type of Shariah-compliant fixed-income securities, in compliance with the requirements of the grand-ducal regulation dated 8 February 2008.
- Investments in Rule 144A Securities may not exceed 30% of the Compartment's net assets.

The Compartment may invest in structured products, with or without embedded derivatives, such as, in particular, notes, certificates or any other transferable security whose returns are linked to, among others, an index (including indices on volatility), currencies, interest rates, transferable securities, a basket of transferable securities, or an undertaking for collective investment in accordance with grand-ducal regulation dated 8 February 2008.

In compliance with the grand-ducal regulation dated 8 February 2008, the Compartment may also invest in structured products without embedded derivatives, correlated with changes in commodities (including precious metals) with cash settlement.

The underlyings of the structured products with embedded derivatives in which the Compartment will invest will be in line with the grand-ducal regulation dated 8 February 2008 and the 2010 Act.

The Compartment may use derivative techniques and instruments for hedging and/or efficient portfolio management within the limits specified in the investment restrictions.

Financial derivative instruments may include options, futures, forward exchange contracts, non-deliverable forward transactions, swaps (such as but not limited to Credit Default Swaps and Total Return Swaps).

If the manager deems it necessary and in the best interest of the shareholders, on a temporary basis and

for defensive purposes, the Compartment may hold up to 100% of its net assets in liquidities, e.g. deposits, money market instruments and money market UCIs.

The Compartment may enter into securities lending agreements and repurchase and reverse repurchase transactions in order to increase its capital or income, or to reduce costs or risks.

Due to the fact the Compartment may invest a substantial part of its assets in other UCIs (UCITS and UCIs other than UCITS), the investor is exposed to a possible duplication of fees and charges. However, when the Compartment invests in other UCIs managed directly or by delegation by the same management company or by any other company with which the management company is linked through common management or control or through a substantial direct or indirect equity holding, the maximum percentage of the fixed management fees that may be obtained at the level of the target UCIs will be 1.6%, to which, if applicable, a fee may be added at a maximum of 20% of the performance of the NAV per share.

Risk profile

The risks listed below are the most relevant risks of the Compartment. Investors should be aware that other risks may also be relevant to the Compartment. Please refer to the section “Risk Considerations” for a full description of these risks.

- Counterparty risk
- Collateral risk
- Credit risk
- Credit rating risk
- Currency risk
- Equity risk
- Interest rate risk
- Emerging market risk
- QFII risk
- RQFII risk
- Shanghai-Hong Kong Stock Connect risk
- Securities lending risk
- Repurchase and reverse repurchase agreement risk
- Financial derivative instruments risk
- Risk linked to investments in other UCIs
- CIBM risk
- High Yield investment risk
- Contingent Convertible instruments risk
- Investment restriction risk
- Sukuk risk

- Structured Finance Securities risk
- Depositary receipts risk
- Real Estate Investment Trusts (REITs) risk

The capital invested may fluctuate up or down, and investors may not recover the entire value of the capital initially invested.

Risk management method: absolute value at risk (VaR).

Expected leverage: 200%. Depending on market conditions, the leverage may be greater.

Leverage calculation method: sum of notional amounts.

Manager: PAM Ltd, PAMS, PAM S.A.

Reference currency of the Compartment: USD

Cut-off time for receipt of orders

Subscription

By 3:00 pm two Banking Days preceding the NAV calculation date.

Redemption

By 3:00 pm two Banking Days preceding the NAV calculation date.

Switch

The more restrictive time period of the two compartments concerned.

Frequency of NAV calculation

Each Banking Day as well as the first/last calendar day of the month, unless that day is a Saturday or a Sunday.

However, the Board of Directors reserves the right not to calculate the NAV or to calculate an NAV that cannot be used for trading purposes due to closure of one or more markets in which the Fund is invested and/or which it uses to value a material part of the assets.
